Smallscale Fishing With Driftnets:

Small-scale Fishing with Driftnets Ludvik Karlsen, Bjorn A. Bjarnason, Food and Agriculture Organization of the United Nations, 1987-01-01 Driftnetting offers considerable advantages over anchored or bottom set gillnetting as it can be conducted by artisanal fishermen without any mechanical assistance and regardless of the water depth The paper provides guidance for upgrading of fishing technology in relation to gillnetting with emphasis on the needs of developing fisheries advantages and disadvantages of various gear materials and appropriate fishing methods and technology for optimizing fish capture and fishing operations with driftnets Simple and easily understood drawings of driftnet fishing gear and methods are provided for the benefit of the fishermen themselves For teaching and training purposes there are technical details and cacluations for rigging of driftnets Information is provided on gear and methods used in some well known driftnet fisheries in Europe and the Far East Particular attention is given to the selction and calculation of material needed to construct a driftnet and the importance of safe operation The Regulation of Driftnet Fishing on the High Seas Ellen Hey, 1991-01-01

Driftnet Fisheries and Their Impacts on Non-target Species Simon P. Northridge, 1991-01-01 A Taiwanese driftnet fishery also operates in the Arafura Sea and is reported to have taken 20 000 tonnes of tunas sharks and spanish mackerel in 1987

Small Cetaceans of Japan Toshio Kasuya, 2017-05-08 This book summarizes and analyzes the biology ecology exploitation and management of small cetaceans in Japan It describes the various types of cetacean fisheries in Japan and their historical development the life histories and ecologies of the main species involved and the history and problems of conservation and management The data show that in some cases the number of small cetaceans harvested exceed sustainable limits and have led to depletion of populations The book provides a case study of what can go wrong when the needs of industry and conservation collide The descriptions of life history and ecology are relevant to issues of conservation and management not just for cetaceans but for all fisheries around the world **International Organizations and the Law of the Sea 1991**

Fisheries in Europe: Status, Resilience and Governance José J. Pascual-Fernández, Cristina Pita, Maarten

Bavinck, 2020-04-28 This book offers a comprehensive account of the status and dynamics of people participating in the small scale fisheries SSF of Europe It covers the situation of SSF in 25 coastal countries thereby providing a portrait of almost every coastal country on the continent and analyzing the recent evolution of the sector Small scale fisheries are argued to be extremely important in Europe as they provide employment and welfare while increasing food sovereignty and maintaining communities in coastal areas The recent worldwide focus on SSF derives from their environmental sustainability which distinguishes many of their activities from those of large scale fisheries This book analyses the diversity of SSF and shows

how fishing communities have sometimes developed successful governing models demonstrating social and economic resilience While the book emphasizes the strengths of SSF and the synergies that occur with other marine sectors it also presents cases of failure in which collective action and policy have actually contributed to a weakening of the sector In this context the book shows how governmental policies toward SSF vary considerably from country to country in a way that is not entirely consistent with European policies

International Organizations and the Law of the Sea Netherlands Institute for the Law of the Sea,1987 Already in its sixth year of existence this Documentary Yearbook provides you with the only independent collection of documents related to ocean affairs and the law of the sea issued each year by international organizations The Yearbook is arranged systematically and thereby gives the community of scholars and practitioners in ocean affairs and the law of the sea much improved access to essential documentation Like the previous volumes the 1990 volume focuses on the United Nations family of international organizations and on several non UN intergovernmental organizations of developing states The most important documents which were issued in the course of 1990 are reproduced in whole or in part while other relevant documents are listed An extensive index of Keywords facilitates access by the reader to the complex and often interrelated matters dealt with by various organizations as well as to the information concerning individual states regions and international instruments

Securing sustainable small-scale fisheries: sharing good practices from around the world Food and Agriculture Organization of the United Nations,2019-02-26 This document includes eight studies showcasing good practices in support of sustainable small scale fisheries FAO commissioned these studies aiming to

share experiences and promote the implementation of the Voluntary Guidelines for Securing Sustainable Small Scale Fisheries in the Context of Food Security and Poverty Eradication SSF Guidelines The case studies were also intended to promote participatory approaches in line with the SSF Guidelines principles and to promote increased interaction between research and fishing communities including the use of traditional knowledge and participatory research It is hoped that the case studies will inform policy and policy processes and in this way promote sustainable small scale fisheries according to the SSF Guidelines and the human rights based approach to development HRBA The case studies constitute a rich selection of experiences and are diverse not only with regard to their geographical setting but also in scope and approach They span from looking at one specific tool for sharing experiences the fisheries learning exchanges methodology in Madagascar and Mozambique or examining the enabling environment in a specific thematic area disaster risks in Bangladesh to regional policy formulation on small scale fisheries the SSF Guidelines protocol for Caribbean policies and reflection on how to use the SSF Guidelines in participatory processes the Myanmar step by step approach to discussions with small scale fisheries communities A few of the papers look at co management in some cases combining fisheries management and social development Senegal Uruguay and Nepal with one focusing on the role of small scale fisheries and community organizations India Generally the case studies refer to HRBA but perhaps because many of the activities have taken place in the past it seems that HRBA has rarely been consciously and explicitly implemented Still the case studies bear witness to a number of experiences and practices that are clearly steps in the right direction Key good practices emerging from the studies refer to among other things holistic approaches to co management and social responsibility broad engagement inclusiveness and partnerships the power of communication and gender equality and the role of women As more experience is gained our knowledge of how to go about implementing the SSF Guidelines will improve and nurture new and continued initiatives For the present and the future efforts should be made to apply HRBA while continuing to share experiences and good practices showing how to do so when implementing the SSF Guidelines

Marine

Conservation P. Keith Probert, 2017-07-06 Providing a comprehensive account of marine conservation this book examines human use and abuse of the world's seas and oceans and their marine life and the various approaches to management and conservation. Healthy marine ecosystems, the goods and services that they provide are of vital importance to human wellbeing. There is a pressing need for a global synthesis of marine conservation issues and approaches. This book covers conservation issues pertinent to major groups of marine organisms such as sharks, marine turtles, seabirds and marine mammals, key habitats from estuaries, wetlands and coral reefs to the deep sea and from local and regional to international initiatives in marine conservation. An ideal resource for students, researchers and conservation professionals, the book pays appropriate attention to the underlying marine biology and oceanography and how human activities impact marine ecosystems, enabling the reader to fully understand the context of conservation action and its rationale.

Expansion of the North Pacific High Seas Driftnet Fisheries United States. Congress. Senate. Committee on Appropriations. Subcommittee on the Department of the Interior and Related Agencies, 1990

Ecosystem Effects of Fishing in the Mediterranean Sergi Tudela, 2004 Most of the major impacts of fishing on the ecosystems recorded around the world occur in the Mediterranean. This variety of interactions is due to four main interrelated factors: the wide range of fishing gear and practices, very intensive fishing, a high diversity of exploited habitats ranging from shallow water to the deep sea and oceanic domain and high biological diversity.

Fisheries Buybacks Rita Curtis, Dale Squires, 2008-02-15 Fisheries buybacks are an important strategy being implemented globally in the efforts to produce a more sustainable and profitable fisheries industry. Fisheries Buybacks provides the reader with an overview of buybacks and the issues surrounding them as well as a synthesis of the literature on this subject of growing importance. Alongside this material are eleven case studies from around the world that look at real life applications of buybacks and its successes and failures. Edited by two leading fisheries economists with chapters contributed by international experts in the field, Fisheries Buybacks will be a valuable resource for fisheries managers, economists, researchers and policy makers for years to come.

The Law of the Sea in the Asian Pacific Region James Crawford, Donald R. Rothwell, 2021-09-27 The volume surveys and discusses the range of current issues arising in the law of the sea from an Asian Pacific perspective. There have been major developments in the law of the sea in the region; many current controversies, e.g. over archipelagic sealand passage, drift net fishing and environmental management, have their origins or important exemplars in the region. The contributors include international lawyers, political scientists and government officials with expertise in the region. Particular aspects of the book which are of interest are: a) its discussion of the perspectives of particular countries in the region: East Asia, Australia, the Pacific Islands; b) its focus on issues of the marine environment and fisheries including drift net fishing; c) discussion of specific developments which are of general interest: the Torres Strait Treaty and its implementation, maritime confidence building measures, dispute resolution; and d) an overview of issues relating to high seas freedoms including in particular transit through straits and archipelagoes. There is a concluding

essay by the editors summarizing the various trends **Blue Justice** Svein Jentoft, Ratana Chuenpagdee, Alicia Bugeja Said, Moenieba Isaacs, 2022-03-07 For small scale fisheries around the world the Blue Growth and Blue Economy initiatives may provide sustainable development but only insofar as they align with the global consensus enshrined in the Voluntary Guidelines for Securing Sustainable Small Scale Fisheries in the context of Food Security and Poverty Eradication If states do nothing to fulfill the promises they made when they endorsed these guidelines in 2014 the Blue Economy will come at a loss for small scale fisheries and further their marginalization in the ocean economy Under the umbrella of Blue Justice this book demonstrates that these risks are real and must be considered as states implement their sustainable ocean development plans These are human rights issues which are embedded into governance principles and institutions and which make a difference for small scale fisheries people in their daily lives In stressing the importance of policies and institutions that build on the experiences of small scale fisheries people in the contexts in which they operate this book draws on case studies of small scale fisheries from countries on all continents to clarify what Blue Justice entails for small scale fisheries and make suggestions for real change Through the Blue Justice paradigm this book flags the relevance of recognizing the potential impact that different factors including the Blue Economy approach could bring to fishing communities their livelihoods cultural traditions and other potential multidimensional conflicts Vulnerability in fishing communities can increase and inequalities can be reinforced at different levels if individuals and community capabilities are not strengthened A first of its kind not to be missed this book is informative purposeful and pertinent in an era of change Silvia Salas CINVESTAV Marine Resources Department Mrida Mexico The studies reveal that Blue Justice is a governability issue which requires establishing right institutions that are transdisciplinary integrated participatory and holistic It is implicit from these writings that the SSF Guidelines and Blue Growth initiatives do not form two different discourses and that the implementation of the former would resolve many of the justice issues caused by the latter in favor of small scale fisheries and their communities Oscar Amarasinghe Professor Chancellor Ocean University of Sri Lanka and President Sri Lanka Forum for Small Scale Fisheries SLFSSF
