## Smart Regulation:

**Rules, Rules, Rules, Rules** G. Bruce Doern, Robert Johnson, 2006-01-01 Rules Rules Rules Rules considers various sectors where rule making spans all or most of the four levels of jurisdiction international federal provincial and city or local in areas such as food safety investment and trade forestry drinking water oil and gas and emergency management

**Understanding Regulation** Robert Baldwin, Martin Cave, Martin Lodge, 2011-10-28 Regulation is a key concern of industries consumers citizens and governments alike Building on the success of the first edition Understanding Regulation Second Edition provides the reader with an introduction to key debates and discussions in the field of regulation from a number of disciplinary perspectives looking towards law economics business political science sociology and social administration The book has been extensively revised and updated to take into account the significant developments and events of the past decade Containing several new chapters it has been completely restructured into seven parts covering the fundamental issues regarding regulation different types of regulatory strategies rules and enforcement quality and evaluation regulation at different levels of government network issues and concluding thoughts Drawing on cross sectoral and cross national examples this book reviews the central questions of regulation and reflects upon those contentious issues that affect the design and operation of regulatory institutions Amongst other topics it discusses better regulation enforcement self regulation risk regulation cost benefit analysis and more utility regulation oriented topics such as price setting It will be an essential resource for academics researchers and graduates across the social sciences studying regulation *Ill-health Canada* Michael McBane, Canadian Centre for Policy Alternatives, 2005 New Directions in the Effective Enforcement of EU Law and Policy Sara Drake, Melanie Smith, 2016-04-29 The EU is faced with the perpetual challenge of guaranteeing effective enforcement of its law and policies This book brings together leading EU scholars in law politics and regulation to explore the wealth of new legal and regulatory strategies practices and actors that are emerging to complement the classic avenues of central and decentralized enforcement The contributors evaluate the traditional dual vigilance framework of enforcement before examining network ed enforcement from theoretical empirical and legal perspectives They assess innovations in key EU policy fields such as the environment consumer protection competition freedom security and justice and economic governance This multi disciplinary book will be of use to students and academics in law political science regulation and public policy It will also interest policy makers in EU institutions national administrations and courts engaged in the implementation and enforcement of EU law and policy Smart Regulation Neil Gunningham, Peter Grabosky, Peter N. Grabosky, Darren Sinclair, 1998 Despite decades of policy experimentation the ultimate goal of efficient and effective environmental regulation has continued to elude policy makers and regulatory theorists The less than satisfactory performance of both government and market approaches to environmental protection has led to the introduction of a broader range of policy mechanisms such as education information based strategies economic instruments and self regulation Yet

these various policy instruments are usually treated as alternatives to one another rather than as complementary Drawing from studies in North America Europe and Australia the authors show how the design of complementary combinations of policy instruments tailored to particular environmental goals and circumstances will produce more effective and efficient policy outcomes They also confront the critical problem of how at a time of fiscal constraint and small government environmental policy might still be designed in ways that improve outcomes both for the environment and for business

*Innovation in Energy Law and Technology* Donald Zillman, Lee Godden, LeRoy Paddock, Martha Roggenkamp, 2018-03-16 There are few existential challenges more serious in the twenty first century than energy transition As current trends in energy production prove unsustainable for the environment energy security and economic development innovation becomes imperative Yet with technological challenges come legal challenges Zillman Godden Paddock and Roggenkamp assemble a team of experts in their field to debate how the law may have to adapt to changes in the area What regulatory approach should be used How do we deal with longer term investment horizons and so called stranded assets such as coal fired power stations And can a form of energy justice be achieved which encompasses human rights sustainable development goals and the eradication of energy poverty With a concept as unwieldy as energy innovation it is high time for a text tackling changes which are dynamic and diverse across different communities and which provides a thorough examination of the legal ramifications of the most recent technological changes This book which be of vital importance to lawyers policy makers economists and the general reader

Housing Great Britain. Law Commission, 2008 This report completes the Law Commission's programme of work on the reform and modernisation of housing law and practice Earlier reports were 1 Renting homes Law Com 297 Cm 6781 ISBN 9780101678124 and 2 Housing proportionate dispute resolution Law Com 309 Cm 7377 ISBN 9780101737722 The focus of this report is the private rented sector specifically the repair and maintenance of the property and harassment and unlawful eviction It builds on the consultation paper on this topic 2007 Consultation paper 181 ISBN 9780117037816 Part 1 sets out the background and part 2 considers the case for change Part 3 reviews the history of regulation The options for change outlined in the discussion paper are rehearsed in part 4 and part 5 sets out the conclusions drawn by the Commission from the responses to that paper which are detailed in appendix B Part 6 sets out the recommendations for reform The review offers the prospect of a new regulatory approach that will be of significant social benefit Implementation of the recommendations in Renting homes would contribute to the understanding of both landlords and occupiers of their mutual legal rights and responsibilities and encourage responsible renting Smart regulation is proposed involving much greater self regulation by the sector the establishment of housing standards monitors and codes of practice for housing management practice and letting agents The recommendations set out a series of affordable and proportionate measures that by enhancing self regulation will improve the management of the private rented sector

**Better Regulation** Stephen Weatherill, 2007-06-28 The discourse of Better Regulation is a hot topic intimately

associated with the drive for cost savings and a more efficient economy In the UK and in the EU rule makers have lately endeavoured to achieve a more satisfactory balance between the demands of proper protection from market failure and inequity on the one hand and commercial freedom and the potential for innovation on the other But who is the regulator listening to and what effect does this have on the regulatory pattern governing the integrating EU market What is best practice in the matter of regulatory assessment The essays in this collection explore these and other questions and will foster greater understanding of UK and EU regulation the accountability issues involved and problems of enforcement It is no coincidence that since efforts to construct a Constitution for Europe have stalled the attention of policy makers politicians and the business community has turned instead to the quest for Better Regulation or perhaps it might be said a Better European Union

**Legislation in Europe** Ulrich Karpen, Helen Xanthaki, 2017-02-23 This book provides a practical handbook for legislation Written by a team of experts practitioners and scholars it invites national institutions to apply its teachings in the context of their own drafting manuals and laws Analysis focuses on general principles and best practice within the context of the different systems of government in Europe Questions explored include subsidiarity legitimacy efficacy effectiveness efficiency proportionality monitoring and regulatory impact assessment Taking a practical approach which starts from evidence based rationality it represents essential reading for all practitioners in the field of legislative drafting

**Hybrid Public Policy Innovations** Mark Fabian, Robert Breunig, 2018-03-12 Political discourse in much of the world remains mired in simplistic ideological dichotomies of market fundamentalism for efficiency versus substantial socialism for equity Contemporary public policy design is far more sophisticated It blends market government and community tools to simultaneously achieve both equity and efficiency Unlike in the twentieth century this design is increasingly grounded in a deep evidence base derived by way of rigorous empirical techniques A new paradigm is emerging hybrid policies This volume provides a thorough introduction to this technical side of public policy analysis and development It demonstrates that it is possible to go beyond ideology and find there some powerful answers to our most pressing problems An international team of experts many of whom have experience with the design or implementation of hybrid policies helps cover the behavioural institutional and regulatory theories that inform the choice of policy objectives and lead the initial conception of solutions They explain the reasons why we need evidence based public policy and the state of the art empirical techniques involved in its development And they analyse a range of in depth case studies from industrial relations to health care to illustrate how hybrids can intermingle the strengths of governments markets and the community to combat the weaknesses of each and arrive at bipartisan outcomes Hybrid Public Policy Innovations is geared to scholars and practitioners of public policy administration and management who desire to understand the analytical reasons why policies are designed the way they are and the purpose of evidence gathering frameworks attached to policies at implementation

**The Risk-Based Approach to Data Protection** Raphaël Gellert, 2020-10-06 The concept of a risk based approach to

data protection came to the fore during the overhaul process of the EU's General Data Protection Regulation (GDPR). At its core, it consists of endowing the regulated organizations that process personal data with increased responsibility for complying with data protection mandates. Such increased compliance duties are performed through risk management tools. This book provides a comprehensive analysis of this legal and policy development, which considers a legal, historical, and theoretical perspective. By framing the risk-based approach as a sui generis implementation of a specific regulation model known as meta-regulation, this book provides a recollection of the policy developments that led to the adoption of the risk-based approach in light of regulation theory and debates. It also discusses a number of salient issues pertaining to the risk-based approach, such as its rationale, scope, and meaning, the role for regulators, and its potential and limits. The book also looks at the way it has been undertaken in major statutes, with a focus on key provisions such as data protection impact assessments or accountability. Finally, the book devotes considerable attention to the notion of risk. It explains key terms such as risk assessment and management. It discusses in depth the role of harms in data protection, the meaning of a data protection risk, and the difference between risks and harms. It also critically analyses prevalent data protection risk management methodologies and explains the most important caveats for managing data protection risks.

**The Law for Energy Prosumers** Daniela Aguilar Abaunza, 2022-08-29 This book argues that law has a vital role in shaping the electricity system to enable a more active role for consumers in liberalised electricity industries. To do that, this book offers a unique legal perspective of the Netherlands, New Zealand, and Colombia to help understand some of the current legal approaches to prosumers and therefore the legal challenges and opportunities facing them. Law and regulation have the role of creating a level playing field for emerging participants such as prosumers to participate and compete in the market together with traditional actors, bringing not only more competition but also representing a more sustainable, environmental, and democratic way to supply energy. Furthermore, law and regulation have the role of responding to innovation and creating space for technological advances to procure the changes in the industry without delay. This book examines some of the legal barriers for the rise of energy prosumers. The traditional role of the distributor when responding to increasing distributed generation in the network, prosumers unable to decide to whom they can sell their electricity, the price of the energy, or even whether to participate more actively in demand response programs. A further issue is the lack of clarity about whether small prosumers are entitled to consumer protection rights and legal challenges regarding configuration, access to the network, access to markets, and strict unbundling rules for community energy projects. This book provides a clear analytical and informed approach to understanding the regulatory framework around energy prosumers. It will appeal to policy makers, lawyers, individuals, business entrepreneurs, or communities wanting to engage in energy projects, as well as academics, researchers, and students.

*A Perilous Imbalance* Stephen Clarkson, Stepan Wood, 2009-12-21 As citizens of a middle power, Canadians know how it feels to be objects of global forces. But they are also agents of globalization who have helped build structures of transnational

governance that have highly uneven impacts on prosperity human security and the environment often for the worse This timely book argues that these imbalances need to be recognized and corrected A Perilous Imbalance situates Canada's experience of globalization in the context of three interlinked trends the emergence of a global supraconstitution the transformation of the nation state and the growth of governance beyond the nation state The authors advocate a revitalization of the Canadian state as a vehicle for pursuing human security ecological integrity and social emancipation and for creating spaces in which progressive alternative forms of law and governance can unfold This book shines an urgent light on the dangerous imbalances in contemporary forms of globalized governance that jeopardize not only Canadians but also citizens worldwide

**Regulatory Governance** Edward Donelan,2022-05-31 This book describes how governments formulate policies draft legislation and manage stocks of legislation and how approaches to these tasks are converging That convergence has developed over 30 years through the work by the OECD in its studies on regulatory reform and the work of other international organizations to improve regulatory management The Institutions of the European Union and its member states OECD member countries and a growing number of developing and transitional countries have developed a policy best described as Better Regulation That policy is characterized using regulatory impact assessment improving public consultation and reducing administrative burdens The policy has brought improvements in legislative drafting and managing stocks of legislation The book concludes with a description of the impact of information technology on governments and how the challenges posed by the Internet globalization and pandemics are being met by new approaches to regulating to ensure its benefits exceed its costs

**Subsidiarity and EU Multilevel Governance** Serafín Pazos-Vidal,2019-02-25 This book examines the theory and praxis of the legal concept of subsidiarity and the policy paradigm of multilevel governance providing an updated overview on how subnational and national authorities engage within the EU institutional framework Providing a theoretical assessment of real life case studies the book reflects on a number of key events from the negotiations of the European Convention to the process that led to the Brexit referendum and assesses the key agendas and institutional ethos of most actors involved in EU policymaking It particularly focusses on the EU engagement of so called non privileged actors such as subnational authorities from the UK Germany Austria Italy the Netherlands and Scandinavia as well as national and regional parliaments The author goes on to examine the sometimes selfish behaviour and individual agendas of the European Commission European Parliament Member States and even the European Court of Justice but also identifies many constructive ways of interaction that can decisively frame how EU decisions are made This comprehensive book will be a useful reference to students practitioners and academic researchers working in European politics policymaking public policy and EU law and integration
