understanding transformative technologies shaping the environmentally conscious textile industry **Physico-chemical Aspects of Textile Coloration** Stephen M. Burkinshaw, 2016-02-08 The production of textile materials comprises a very large and complex global industry that utilises a diverse range of fibre types and creates a variety of textile products As the great majority of such products are coloured predominantly using aqueous dyeing processes the coloration of textiles is a large scale global business in which complex procedures are used to apply different types of dye to the various types of textile material The development of such dyeing processes is the result of substantial research activity undertaken over many decades into the physico chemical aspects of dye adsorption and the establishment of dyeing theory which seeks to describe the mechanism by which dyes interact with textile fibres Physico Chemical Aspects of Textile Coloration provides a comprehensive treatment of the physical chemistry involved in the dyeing of the major types of natural man made and synthetic fibres with the principal types of dye The book covers fundamental aspects of the physical and chemical structure of both fibres and dyes together with the structure and properties of water in relation to dyeing dyeing as an area of study as well as the terminology employed in dyeing technology and science contemporary views of intermolecular forces and the nature of the interactions that can occur between dyes and fibres at a molecular level fundamental principles involved in dyeing theory as represented by the thermodynamics and kinetics of dye sorption detailed accounts of the mechanism of dyeing that applies to cotton and other cellulosic fibres polyester polyamide wool polyacrylonitrile and silk fibres non aqueous dyeing as represented by the use of air organic solvents and supercritical CO₂ fluid as alternatives to water as application medium The up to date text is supported by a large number of tables figures and illustrations as well as footnotes and widespread use of references to published work The book is essential reading for students teachers researchers and professionals involved in textile coloration **Nanofinishing of Textile Materials** Majid Montazer, Tina Harifi, 2018-06-20 Nanofinishing of Textile Materials provides thorough coverage of existing current and future developments in the field Sections cover a wide range of nanofinishing mechanisms for improving the fundamental properties of textiles such as bleaching scouring softening and surface activation Other sections discuss high performance properties and conventional attributes such as waterproofing fire retardancy and novel applications including conductivity and magnetism With two highly regarded and experienced authors bringing together the latest information on nanofinishing technology this book is essential reading for scientific researchers engineers and R D professionals working on the development of finishes for improving the properties of textiles Explains nanofinishing mechanisms and processes with a view to their use in developing high performance apparel and technical textiles Focuses on how nanofinishing can be used to confer important characteristics such as self cleaning hydrophobic hydrophilic magnetic and conductive attributes Explores novel techniques and methods for readers who require cutting edge knowledge of developments in nanofinishing **Eco-Friendly Textile Processes** Atul H. Bari, Hemantkumar N. Akolkar, Navnath T. Hatvate, A. K. Haghi, 2025-10-28 The textile industry is a major

environmental polluter Despite some progress in textile treatment processes and in energy saving progress is slow and CO₂ emissions continue to rise In order to better manage the environmental impact of textile treatment processes it is necessary to understand their principles to be able to improve or replace them with a more environmentally friendly process This book begins by introducing sustainable practices in the textile industry that are less polluting followed by eco friendly finishing treatments Next the principle of heat and mass transport in fabrics and the practical applications of these theories are explained Finally emerging environmentally friendly technologies are discussed Emerging Technologies for Textile Coloration Mohd Yusuf, Mohammad Shahid, 2022-03-08 This book features perspectives on advances in textile coloration technologies It provides a comprehensive and holistic overview supporting rapid and efficient entry of new researchers into emerging subjects within textile engineering and technology FEATURES Introduces current reliable coloration technologies Explains emerging coloration technologies from a multidisciplinary point of view Discusses future R D opportunities Offers systematic research oriented outlines and observations and well defined illustrative models and schemes Written for academicians scientists researchers and advanced students of textile science and technology Emerging Technologies for Textile Coloration aims to provide depth of understanding of both state of the art and emergent topics and to spur further research leading to new opportunities and applications
