Textiles Edition:

Interior Textiles T Rowe, 2009-09-25 This book provides an overview of the types of textiles used within the interior textile sector and key technological developments and safety issues affecting the industry. An understanding of these topics enables the designer or manufacturer to select the most appropriate fabrics for interior applications. The first group of chapters reviews types and selection of materials for interior textiles including natural and synthetic fibres as well as knitted, woven and nonwoven fabrics. Further chapters review surface design of interior textiles and the use of textiles in carpets and floor coverings. The second part of the book discusses developments in such areas as joining furniture fabrics, the use of sustainable and recycled textiles in interior applications, using interior textiles to minimise indoor environmental pollution, flame retardant materials and innovative textiles for seating. Interior textiles design and developments is an important text for manufacturers, designers and buyers of interior textiles as well as being a valuable resource for students and academics studying interior design and materials. Provides a comprehensive review of the type of textiles used within the interior textile sector. Considers environmental issues in interior textiles, assessing different types of sustainable and recycled textiles. Explores the important issues of surface design and flammability testing. Advances in Healthcare and Protective Textiles Shahid Ul Islam, Abhijit Majumdar, Bhupendra Singh Butola, 2023-02-09 Advances in Healthcare and Protective Textiles addresses technologies that have had a major impact in industry for decades but which are currently attracting unprecedented attention due to their applications in the fight against the Coronavirus epidemic. Recent advances in textile technology have opened new possibilities for textile researchers and scientists in antiviral textiles, flame retardant textiles, antimicrobial textiles, insect repellent textiles, breathable medical textiles, aroma protective textiles, high tech textiles, smart textiles, nano textiles and more. This book provides systematic and comprehensive coverage of cutting edge research and developments on material design, methodologies, characterizations, processes, properties and applications of medical, healthcare and protective textiles. In addition, sections pay special attention to advanced fabrication methodologies and materials used in apparel engineering. Provides a thorough review of recent advances in personal protective equipment (PPE) design and manufacture in response to the requirements of the fight against Coronavirus. Gives advice on improving sustainability through the use of reusable and recyclable medical textiles. Explores innovative materials like biopolymers and their applications in medical textiles. Medical and Healthcare Textiles Subhash C. Anand, J F Kennedy, M Mirzaftab, S. Rajendran, 2010-07-15 Medical textiles remain one of the most dynamic areas of research in textiles. Medical and healthcare textiles is the fourth in a series of conferences held at the University of Bolton. Like its predecessors, it has attracted papers from some of the leading international centres of expertise in the field. Contributors cover a range of topics including emerging textile-based biomaterials, hygienic textiles, the use of textiles in infection control and as barrier materials, bandaging and pressure garments for managing chronic infections such as ulcers, the role of textiles in the management of

burns and wounds textile based implantable devices such as tissue scaffolds and sutures and intelligent textiles Provides a comprehensive overview of medical textiles from the risk of infection control and barrier materials through to directives regulations and standards shaping the medical device industry Explores developments in healthcare and hygiene products including odor and pH control as well as protective and disposable fabrics Reviews development in the area of implantable materials featuring vascular grafts knee implants and scaffolds Medical Textiles from Natural Resources Md. Ibrahim H. Mondal, 2022-06-15 Medical Textiles from Natural Resources provides systematic and comprehensive coverage of the fundamentals production methods processing techniques characterization techniques properties and applications of medical textile materials from natural resources Medical textiles offer a variety of technical and functional properties valued in medical and healthcare sectors often relating to hygiene As medical textile products remain in close contact with the human body the fibre must have characteristics such as biological compatibility biological degradability permeability and nontoxicity Only materials from natural renewable sources have such characteristics This book provides the latest information on a wide range of medical applications from single suture and wound dressings to implants and tissue scaffolds It also offers a systematic review of the manufacture properties and applications of technical textiles for medical use Explains the latest technologies related to fibre extraction from natural sources chemical treatments weave constructions fabric finishes and coatings Describes innovative applications of nanomaterials in the treatment of textile fabric and the utilization of carbohydrate polymers in the preparation of nanoparticles deposited in nonwoven fabrics Helps product designers to find appropriate materials from natural resources with the characteristics of biodegradability renewability biocompatibility and nontoxicity **Advances in Electrically Conductive Textiles** Subhankar Maity, Pintu Pandit, Saptarshi Maiti, 2024-11-15 Nonmetallic electroconductive textiles unlike metals offer flexibility durability moldability and lightweight attributes A brilliant quality of these textiles is the capability to alter conductivity through various external stimuli e g strain torsion pH humidity to suit a specific application such as sensors heating garments EMI shielding energy harvesting devices and wearable electronics Based on these concepts **Advances in Electrically Conductive Textiles Materials Characterization and Applications** has been structured into three main sections Section I contains chapters discussing the various preparation methods of electroconductive textiles Section II contains chapters on their characteristics and features and Section III details the end use applications and sustainability of these textiles Explores strategies and methods in the development of electroconductive textile composites Investigates features of nonmetallic conductive textiles prepared from graphene conductive polymers MXene and carbon nanotubes Examines the application of electroconductive textiles for heat generation EMI shielding sensors antimicrobial filtration energy storage energy harvesting and smart textiles **Chemical Management in Textiles and Fashion** Subramanian Senthilkannan Muthu, 2020-09-29 Chemical Management in Textiles and Fashion helps readers understand current pressures on the textile industry surrounding the responsible management of
