Textiles in Perspective Betty F. Smith, Ira Block, 1982 **Ancient Textile Production from an Interdisciplinary Perspective** Agata Ulanowska, Karina Grömer, Ina Vanden Berghe, Magdalena Öhrman, 2022-04-29 The diverse developments in textile research of the last decade along with the increased recognition of the importance of textile studies in adjacent fields now merit a dedicated full length publication entitled Ancient Textile Production from an Interdisciplinary Perspective Humanities and Natural Sciences Interwoven for our Understanding of Textiles With this volume the authors and the editors wish to illustrate to the current impact of textile archaeology on the scholarly perception of the past not limited to archaeology alone The volume presents new insights into the consumption meaning use and re use of textiles and dyes all of which are topics of growing importance in textile research As indicated by the title we demonstrate the continued importance of interdisciplinarity by showcasing several interwoven approaches to environmental and archaeological remains textual and iconographic sources archaeological experiments and ethnographic data from a large area covering Europe and the Mediterranean Near East Africa and Asia The chronological span is deliberately wide including materials dating from c 6th millennium BCE to c mid 14th century CE The volume is organised in four parts that aim to reflect the main areas of the textile research in 2020 After the two introductory chapters Part I About this Volume and Textile Research in 2020 follow two chapters referring to dyes and dyeing technology in which analytical and material based studies are linked to contextual sources Part II Interdisciplinarity of Colour Dye Analyses and Dyeing Technologies The six chapters of Part III Interdisciplinary Approaches to Textile Tools discuss textiles and textile production starting from the analyses of tools whether functional or as representative of technological developments or user identity Archaeological and cultural contexts as well as textile traditions are the main topics of the six chapters in Part IV Traditions and Contexts Fibres Fabrics Techniques Uses and Meanings The two final chapters in Part V Digital Tools refer to the use of digital tools in textile research presenting two different case studies **The Persian Textile Industry in Historical Perspective 1500-1925** Willem Floor, 1999-11-01 Cette étude présente une analyse socio économique de l'industrie textile en Perse de 1500 1925 De nombreux thèmes y sont traités caractéristiques générales de la production et son évolution présentation des vêtements féminins et masculins en Perse les sites de production les divers types et emplois la commercialisation et l'évolution du chle un glossaire des termes techniques concernant tissus et artisanats textiles **Antimicrobial Textiles from Natural Resources** Md. Ibrahim H. Mondal, 2021-03-20 The textile industry is focused in its search for alternative green fibres with the aim of providing high quality products which are fully recyclable and biodegradable Natural textile materials from renewable sources play an increasingly important role in the industry due to their unique properties and functionality over synthetic fibres as well as their sustainability Antimicrobial Textiles from Natural Resources is an in depth guide to the latest methods and applications of natural antimicrobial materials A broad range of applications are addressed from common to specialized

applications including many in the biomedical sector This world class collection of contributors write from a range of disciplinary backgrounds providing important insights from textile science and technology materials science chemical engineering and biomedical engineering Advice and proposed solutions are presented in a rigorous and practical way drawing on results and case studies obtained from academic and industrial laboratories worldwide Examines how natural fibres can be used in the place of less renewable or sustainable choices thus helping designers improve the sustainability of their products Provides unique coverage of the biofunctionality of biopolymers in textiles Explains how antimicrobial properties can reduce odour extend the life of textiles and provide numerous medical benefits **Textiles in Motion**

Audrey Gouy,2023-06-30 Dress is at the core of dance It adorns dancers defines various roles and forms symbolic expressions that for example either bind people together or opposes them It is a communicative tool that gives crucial information for understanding the dance as well as the culture and the sociological effects of a group of people As such dress transcends how it is seen visually to address what is being communicated Nonetheless studies in ancient dance have rarely taken clothing into consideration Therefore this publication gathers articles that give new perspectives and insights on ancient dances and their ancient textiles Comprehension of ancient dance benefits from investigations undertaken through the lens of dress And research on ancient dress is understood through its relation to body movement and performative rituals thus reinforcing the progressive integration of an anthropological and sociological dimension into historical analysis of ancient textiles For the first time the two way transfer of knowledge between dance studies and costume studies is connected via an innovative approach Among the issues that are specifically addressed are the movement design of dress for dance its sensory experience gender and identity reenactment and reception The chronological range of the publication is limited to the ancient world 3rd millennium BC to 5th century AD and the geographical definition is meant to be broad in order to promote a comparative approach and cross cultural dialogue as well as discourse between fields and disciplines *Future*
