## **The Active Diver Get The Most From Your Certification:**

**Geothermal Heat Flux at the COST B-2 and B-3 Wells, U. S. Atlantic Continental Margin** B. Della Vedova, 1987

Heat flow estimates at two sites on the U S Atlantic continental margin are presented An estimate of the heat flowing from the basement also has been obtained About 4 8 km of sediments penetrated at the COST B 2 and 4 0 km at the COST B 3 were deposited since the Upper Jurassic Well logs were used to evaluate thermal gradients and sedimentation rates whereas thermal conductivities and radiogenic heat productions were measured on drill cuttings samples A procedure to estimate in situ thermal conductivity from drill cuttings and well logs is described A substantial set of samples in the form of drill cuttings were sorted in four major lithologies sandstones siltstones shales and limestones Laboratory measurements of density porosity thermal conductivity quartz % potassium % uranium ppm and thorium ppm were performed on 128 reorganized and pulverized samples A significant correlation of the matrix thermal conductivity to quartz and potassium content was found In situ porosity and volume fraction of each lithology determined mainly from well logs were used to calculate in situ mean thermal conductivity Finally the mean in situ vertical component of the thermal conductivity as required for heat flow values has been estimated from a correction factor for the anisotropy of each lithology The in situ temperature and anisotropy effects substantially decrease estimates of thermal conductivity at depth Below the uppermost 1 km in both wells the best estimate of the thermal gradient is 26 3 C km<sup>-1</sup> at COST B 2 and 26 1 C km<sup>-1</sup> at COST B 3 whereas in situ mean thermal conductivities range between about 1 8 and 1 9 W m<sup>-1</sup> K<sup>-1</sup> 4 3 4 5 T C U The average heat flow is estimated as about 45 mW m<sup>-2</sup> 1 07 H F U at COST B 2 and 44 mW m<sup>-2</sup> 1 06 H F U at COST B 3 with an uncertainty of about 20 25% The mean radiogenic production in sediments at the two sites has been estimated as 1 83 COST B 2 and 1 44 COST B 3 10 6 W m<sup>-3</sup> With a 12 14 km thick sedimentary sequence a radioactive contribution of 20 25 mW m<sup>-2</sup> can be expected The effects of sediment deposition compaction pore water advection and radiogenic heat production have been combined in a numerical model Hutchison 1985 to estimate the undisturbed basement heat flux Although the sedimentation depresses the basement heat flux by 15 20% this effect is more than compensated by radioactive heat production in the sediments so that the surface flux is estimated to be higher than that from the basement The latter is calculated at about 33 39 mW m<sup>-2</sup> 0 8 0 9 H F U a relatively low value The overall uncertainty is about 20 25% and other estimates on continental margins with thick sediments e g Reiter and Jessop 1985 probably have at least a similar uncertainty

The Certified Diver's Handbook Clay Coleman, 2004-05-17 The real world guide for divers who want to enjoy their sport to the fullest More than half of the 1 5 million people who achieve scuba certification each year are stymied in their pursuit of the sport because they lack time and money to enjoy the exotic diving experiences they've read about and don't want to be confined to group dives The Certified Diver's Handbook is the only guide to help them create their own diving adventures on any budget on any schedule in waters local or distant and without the restrictions of group demands Thirty year diving veteran and photojournalist Clay Coleman

provides the insider s tips and how to advice divers need to equip plan and execute their own diving expeditions Divers will learn how to Buy or rent the best SCUBA equipment at the best prices Plan dives to maximize enjoyment and safety Find great diving sites close to home Master underwater rescue procedures and shore and night diving techniques Explore wrecks reefs and underwater caves      *Bibliography on Diving and Diving Safety for a Scientific Diving Program* Margaret A.

Rioux,1987 Diving scientific diving and diver safety are specialized subject areas not generally well represented in even the largest of academic libraries largely because of difficulties in locating appropriate items to include in the collection However in order to adequately fulfill his her responsibilities the Diving Safety Officer of a scientific diving program needs easy access to a broad range of books reports and journals covering all aspects of diving This bibliography outlines a comprehensive collection appropriate to the needs of a scientific diving program in a research or academic institution Items are grouped in broad subject areas corresponding to various aspects of the diving program Both title and author indexes are also included

Scuba Compendium Simon Pridmore, 2021-08-23 Only available in e book form this is the presentation in one volume of four books in Simon Pridmore's Scuba series Scuba Fundamental Scuba Confidential Scuba Exceptional and Scuba Professional In musical terms Scuba Compendium is a re-mastering and repackaging of the original albums rather than a greatest hits or a Best of compilation The books were written and published over a period of eight years and each book was designed for divers at a particular point in their diving life Listed in the order they were written the audience for Scuba Confidential was the general population of divers Scuba Professional was for those thinking of making a career out of the sport Scuba Fundamental was for non divers and beginners and Scuba Exceptional was for more experienced divers The idea was not to create a series It just turned out that way A number of topics merited inclusion for multiple groups of readers rebreathers and surface safety for example which meant that there was some unavoidable overlap between the individual books In Scuba Compendium the text and chapters have been cleaned up and streamlined to remove any unnecessary repetition and improve continuity Apart from this nothing is missing from the four original books and the only new material is an introductory chapter on the philosophy behind the Scuba series So if you already own all the books in the Scuba series from a content point of view you have no need to buy this one However from a reference point of view some readers may find

it an advantage to have these four books in one volume where every word or phrase in the series is easily searchable on an e reader They are arranged here in the order in which they make sense as a series following the path from beginner to diver to experienced diver to expert Scuba Compendium covers the full gamut of the sport diving experience and is a resource that will accompany a scuba diver throughout their career in the sport wherever it takes them to be dipped back into from time to time whenever necessary If you only own one or two books in the series then you may find Scuba Compendium well worthwhile for another reason too For instance if you are not a beginner you may think you don t need to read Scuba Fundamental but many experienced divers have found it useful and entertaining Also Scuba Professional introduces a number of topics such as real risk awareness and constructive paranoia which are just as relevant for amateur divers as they are for professionals Although the title makes it sound as if Scuba Professional is only for instructors this is certainly not the case And of course if you have not yet bought any of these four Scuba series books then this is a great option to buy all of them together with just one click Scuba Fundamental is a great book Simon Pridmore is to be congratulated for this insightful interesting and honest introduction to scuba diving He tells it as it is John Lippmann Divers Alert Network If PADI s Open Water manual is the Bible of scuba diving consider this the New Testament David Espinosa Editor in Chief Sport Diver magazines I so wish Scuba Exceptional had existed when I was in the early days of my diving life nearly 30 years ago Phil Short explorer and pioneer There is quite simply nothing like Scuba Professional It is the ultimate backstage pass into the business of scuba Jill Heinerth explorer and filmmaker
