Sociology in Post-Normal Times Charles Thorpe, 2022-02-28 The Covid 19 pandemic and the disruptions of climate change are features of post normal times In Sociology in Post Normal Times Charles Thorpe contends that the modern project of creating normalcy within the nation state has broken down Integral to this is sociology which is the science of social reform Drawing from the work of seminal theorists such as Zygmunt Bauman and Anthony Giddens Thorpe contends that sociology's society is no longer viable because globalization has put an end to social reform thus the assumptions and goals of sociology must be left behind in order to create a new global humanity In the face of the pandemic and climate change Sociology in Post Normal Times demands no less than the birth of a global humanity beyond nation states as the precondition for human survival

The Making of Meaning Niklas Luhmann, Michael King, 2022 For the first time this publication makes available to Anglophone readers a sociology of knowledge and culture as developed by the sociologist and social theorist Niklas Luhmann Luhmann is typically described as writing only about systems and as such about a topic that sociologists relegate to the annals of history However this publication reveals that sociology has acted prematurely overlooking the rich and detailed sociology of knowledge and culture that on the one hand uses terms like meaning memory and communication and on the other is very capable of using such terms in the form of a historical analysis that unravels the making and transformation of key concepts and questions that shape the understanding of modern society like individuality and individualism culture and memory and social class This theoretical approach and the empirical material as well as the insights drawn from their combination yield rich and surprising results and show a very different image of Luhmann than that of system theorist As such this volume will be of

Philosophy Do? Steven Yates, 2021-07-12 Philosophy as an academic discipline has fallen on hard times Its practitioners might retort that never have there been so many books articles blogs etc But quantity is not quality and while philosophers are graduating with PhDs few are finding adequate employment and this is just the most visible problem The question What Should Philosophy Do is going begging and the social justice warriors have tried to transform it into one of their political platforms right along with the rest of the liberal arts or humanities In this book philosopher Steven Yates revisits the question anew and comes up with a fresh perspective He argues that philosophy is not a mere academic discipline that it has a job to do in civilization that transcends its academic niche He argues that philosophy should identify clarify and evaluate worldviews noting their contributions noticed as such or not to the conversations of civilization examining their capacity to solve problems their consistency and their overall adequacy in helping us live Yates concludes that we should revisit the Christian worldview and perhaps other worldviews as part of an intellectual move towards a philosophical pluralism that emphasizes the freedom and intrinsic value of persons and could provide an alternative to the technocratic world order towards which we are presently heading at breakneck pace *Thriving* Alan M.
