**Technical Note - National Advisory Committee for Aeronautics** United States. National Advisory Committee for Aeronautics, 1949 **Technical Note**, 1949 Popular Astronomy, 1922 *Life in the Fast Lane: Unless your fast lane is Slow shari figroid*, *Proceedings of the Royal Society of London* Royal Society (Great Britain), 1917 Publishes research papers in the mathematical and physical sciences Continued by *Proceedings Mathematical and physical sciences* and *Proceedings Mathematical physical and engineering sciences* **Nanoparticles** Celso De Mello Donega, 2024-12-10 This textbook builds upon the solid foundation established by the first edition addressing the persistent scarcity of comprehensive yet accessible textbooks in the field While preserving the original structure and essence this revised edition updates the content to reflect a decade of advancements in Nanoscience Designed for advanced undergraduate and beginning graduate students in Chemistry Physics and Materials Science the book focuses on the fundamental principles illustrated through the study of nanoparticles It encompasses three interconnected parts the physicochemical principles of Nanoscience the chemistry and synthesis of nanoparticles and techniques for studying these materials The new edition benefits from years of classroom experience enhancing clarity based on student feedback and remains a didactical tool that emphasizes essential concepts without sacrificing depth Despite necessary exclusions to maintain conciseness such as detailed discussions on superlattices and nanomagnetism the book provides a comprehensive introduction to the field leaving room for readers to explore rapidly evolving applications through the cited literature *Introduction to Gas Lasers: Population Inversion Mechanisms* Colin S. Willett, 2014-05-17 *Introduction to Gas Lasers Population Inversion Mechanisms* focuses on important processes in gas discharge lasers and basic atomic collision processes that operate in a gas laser Organized into six chapters this book first discusses the historical development and basic principles of gas lasers Subsequent chapters describe the selective excitation processes in gas discharges and the specific neutral ionized and molecular laser systems This book will be a valuable reference on the behavior of gas discharge lasers to anyone already in the field **Popular Astronomy** William Wallace Payne, Charlotte R. Willard, Herbert Couper Wilson, Ralph Elmer Wilson, Curvin Henry Gingrich, 1922

Proceedings of the 7th International Conference on Advanced Technology & Particle Physics Maura Barone, 2002 This book features up to date technology applications to radiation detection It synthesises several techniques of and approaches to radiation detection covering a wide range of applications and addressing a large audience of experts and students Many of the talks are in fact reviews of particular topics often not covered in standard books and other conferences for instance the medical physics section To present these medical physics talks is crucial since a large fraction of the community in medical physics are from the particle physics community The same feature is true for astroparticle and space physics which are relatively new fields This book is unique in its scope Except for IEEE there is no other conference in the world that presents such a wide coverage of advanced technology applied to particle physics However unlike IEEE more room is made in the

book for reviews and general talks      *The Physics of Gamma-Ray Bursts* Bing Zhang, 2019 A complete text on the physics of gamma ray bursts the most brilliant explosions since the Big Bang      **Plasma Processing of Polymers** Ricardo d'Agostino, Pietro Favia, Francesco Fracassi, 1997-11-30 Proceedings of the NATO Advanced Study Institute on Plasma Treatments and Deposition of Polymers Acquafredda di Maratea Italy May 19 June 2 1996      Active Nitrogen A. Nelson Wright, Carl A. Winkler, 2013-10-22 Physical Chemistry A Series of Monographs Active Nitrogen presents the methods by which active nitrogen may be produced This book is composed of five chapters that evaluate the energy content molecular spectrum and the emission of active nitrogen Some of the topics covered in the book are the summary of light emitting systems of active nitrogen analysis of Long Lived Lewis Rayleigh Afterglow theory and Ionic theory of Mitra reactions followed by induced light emission and characteristics of homogeneous recombination Other chapters deal with the analysis of metastable molecule theories and the mechanisms for reactions of active nitrogen involving direct N 4S attack The discussion then shifts to the rate constants for reactions induced by direct N 4S attack The evaluation of the Short Lived Energetic Afterglow theory is presented The final chapter is devoted to the examination of emission from molecular species with electronic energy levels below 9.76 eV The book can provide useful information to physicists students and researchers

Philosophical Magazine , 1924      The Physical Properties of Active Nitrogen in Low-density Flow James M. Benson, 1951 An investigation of the physical properties of active nitrogen in low density flow indicates that active nitrogen may be used for flow visualization without introducing excessive disturbances in the stream Quantitative measurements of density in the flow may be obtained from certain restricted regions of the spectrum of the afterglow The results are shown to disagree with Mitra's theory of the afterglow The results appear to require that active nitrogen contain metastable molecules Methods are described for the use of active nitrogen in shock tubes      Method for Calculating Lift Distributions for Unswept Wings with Flaps Or Ailerons by Use of Nonlinear Section Lift Data James C. Sivells, Gertrude C. Westrick, 1951 A method is presented for calculating lift distributions for unswept wings with flaps or ailerons using nonlinear section lift data This method is based upon lifting line theory and is an extension to the method described by NACA Report 865 Simplified computing forms containing detailed examples are given for both symmetrical and asymmetrical lift distributions A few comparisons of experimental and calculated characteristics are also presented      *The London, Edinburgh and Dublin Philosophical Magazine and Journal of Science* , 1913      **Cosmic Explosions** Edo Berger, 2004 The diversity of stellar death is revealed in the energy velocity and geometry of the explosion debris ejecta Using multi wavelength observations of gamma ray burst GRB afterglows I show that GRBs arising from the death of massive stars are marked by relativistic collimated ejecta jets with a wide range of opening angles These results suggest that various cosmic explosions are powered by a common energy

source an engine possibly an accreting stellar mass black hole with their diverse appearances determined solely by the variable high velocity output On the other hand using radio observations I show that local type Ibc core collapse supernovae generally lack relativistic ejecta and are therefore not powered by engines Instead the highest velocity debris in these sources typically with a velocity lower than 100 000 km sec are produced in the effectively spherical ejection of the stellar envelope The relative rates of engine and collapse powered explosions suggest that the former account for only a small fraction of the stellar death rate Using the first radio and submillimeter observations of GRB hosts I show that some are extreme starburst galaxies with the bursts directly associated with the regions of most intense star formation I suggest by comparison to other well studied samples that GRBs preferentially occur in sub luminous low mass galaxies undergoing the early stages of a starburst process If confirmed with future observations this trend will place GRBs in the forefront of star formation and galaxy evolution studies *Science Abstracts* ,1921 *Proceedings of the National Academy of Sciences of the United States of America* National Academy of Sciences (U.S.),1924 The Proceedings of the National Academy of Sciences PNAS publishes research reports commentaries reviews colloquium papers and actions of the Academy PNAS is a multidisciplinary journal that covers the biological physical and social sciences
