gifts When the Safavid dynasty founded in 1501 built a state that championed Iranian identity and Twelver Shi ism it prompted the more established Ottoman Empire to align itself definitively with Sunni legalism The political religious and military conflicts that arose have since been widely studied but little attention has been paid to their diplomatic relationship Sinem Arcak Casale here sets out to explore these two major Muslim empires through a surprising lens gifts Countless treasures such as intricate carpets gilded silver cups and ivory tusk knives flowed from the Safavid to the Ottoman Empire throughout the sixteenth century While only a handful now survive records of these gifts exist in court chronicles treasury records poems epistolary documents ambassadorial reports and travel narratives Tracing this elaborate archive Casale treats gifts as representative of the complicated Ottoman Safavid coexistence demonstrating how their rivalry was shaped as much by culture and aesthetics as it was by religious or military conflict Gifts in the Age of Empire explores how gifts were no mere accessories to diplomacy but functioned as a mechanism of competitive interaction between these early modern Muslim Islamic Visual Culture, 1100-1800 Oleg Grabar, 2024-08-01 Islamic Visual Culture 1100 1800 is the second in a set of four volumes of studies on Islamic art by Oleg Grabar Between them they bring together more than eighty articles studies and essays work spanning half a century by a master of the field Each volume takes a particular section of the topic the three other volumes being entitled Early Islamic Art 650 1100 Islamic Art and Beyond and Jerusalem Reflecting the many incidents of a long academic life they illustrate one scholar's attempt at making order and sense of 1400 years of artistic growth They deal with architecture painting objects iconography theories of art aesthetics and ornament and they seek to integrate our knowledge of Islamic art with Islamic culture and history as well as with the global concerns of the History of Art In addition to the articles selected each volume contains an introduction which describes often in highly personal ways the context in which Grabar's scholarship developed and the people who directed and mentored his efforts. The focus of the present volume is on the key centuries the eleventh through fourteenth during which the main directions of traditional Islamic art were created and developed and for which classical approaches of the History of Art were adopted Manuscript illustrations and the arts of objects dominate the selection of articles but there are also forays into later times like Mughal India and into definitions of area and period styles as with the Mamluks in Egypt and the Ottomans or into parallels between Islamic and Christian medieval arts "The Turk and Islam in the Western Eye, 1450?750" James G. Harper, 2017-07-05 Unprecedented in its range extending from Venice to the New World and from the Holy Roman Empire to the Ottoman Empire this collection probes the place that the Ottoman Turks occupied in the Western imaginaire and the ways in which this occupation expressed itself in the visual arts Individual essays in this volume examine specific images or groups of images problematizing the truths they present and analyzing the contexts that shape the presentation of Ottoman or Islamic subject matter in European art The contributors trace the transmission of early modern images and representations across national boundaries and across centuries to show how through processes of translation that often involved multiple stages the figure

of the Turk and by extension that of the Muslim underwent a multiplicity of interpretations that reflect and reveal Western needs anxieties and agendas The essays reveal how anachronisms and inaccuracies mingled with careful detail to produce a Turk a figure which became a presence to reckon with in painting sculpture tapestry and printmaking Historical Dictionary of the Ottoman Empire Selcuk Aksin Somel, 2011-12-29 The Ottoman Empire like its eventual rival the Habsburg Empire was a dynastic kingdom whose rule encompassed most of the Middle East most of North Africa and parts of Europe at its peak in the mid 17th century Osman I founded the Ottoman Empire in the early 14th century and subsequent rulers or Sultans rapidly expanded the boundaries of the territory In the 15th and 16th centuries the Ottomans conquered Constantinople putting an end to the powerful Byzantine Empire and expanded north into Europe becoming a major player in European politics At the beginning of the 20th century the power of the Ottoman Empire had been declining for several hundred years and the Empire officially dissolved at the end of the First World War In this revised and updated second edition of the Historical Dictionary of the Ottoman Empire author Selcuk Aksin Somel introduces both the general reader and the researcher to the history of this dynasty The comprehensive dictionary includes detailed alphabetical entries on key figures ideas places and themes related to Ottoman history and culture An expanded introduction provides a basic overview to the history of the Empire and a guide to further sources and suggested readings can be found in the extensive bibliography that follows the entries A basic chronology and various maps and illustrations are also included in the dictionary This book is an excellent access point for students researchers and anyone wanting to know more about the Ottoman Empire
