The Middle East (Routledge Revivals) W. B. Fisher, 2013-09-13 In this comprehensive study first published in 1950 Professor Fisher examines all the principal elements physical and human that influence environment development and ways of life in the Middle East An analysis of the physical basis of the region is followed by detailed treatment of the complex human and social aspects a concluding section brings together on a regional basis the elements discussed in the first two parts With first hand experience within the Middle East Fisher presents a detailed and fascinating study based on surveys and investigations he personally carried out Including wide ranging geographical historical sociological and political perspectives this title provides essential background to anyone with an interest in Middle Eastern affairs

Change and Development in the Middle East (Routledge Revivals) Clarke John, Bowen-Jones Howard, 2013-10-14 The Middle East is a region of great traditional diversity which has been characterized by immense political social and economic changes still developing over thirty years after the title's original publication A group of oil rich countries have achieved great political significance and

some of the highest per capita incomes in the world Much modern development has been spatially polarized accentuating the concentrations of rapidly growing populations and posing severe problems for planners Cultivation and pastoralism the main traditional activities have often suffered from neglect and insufficient investment and both require re evaluation These are the issues addressed by this volume first published in 1981 which contains a series of overviews and case studies written by present or former members of staff and research students of the Department of Geography in the University of Durham in honour of W B Fisher

Change and Development in the Middle East provides an interesting and relevant geographical and demographic analysis of this diverse and volatile region *Economic and Political Change in the Middle East (RLE Economy of Middle East)* Elias Tuma, 2014-10-30 In the early 1960s the Middle East suffered from political instability inefficiency of government widespread poverty and inequality low productivity and a mounting population pressure on the region's resources With the exception of some of the oil exporting countries the entire region still suffers from these same burdens There have been many studies in the economic development and industrialization of the region in recent years This study is different motivated by scepticism and a sense of intellectual frustration and apprehension because of the apparent inadequacy of socioeconomic and political development in the Middle East First published in 1987

The Geography of the Middle East Stephen Hemsley Longrigg, 2009-01-01 Much of the Middle East is in a continuing state of visible often revolutionary change in almost every field social cultural economic political Although time will have greatly modified the conditions here presented the author emphasizes those aspects which being the least ephemeral were likely to remain valid for some years and indicates the areas in which the most change can be expected Therefore in evaluating any change that has occurred the reader will at least be informed of the conditions out of which or because of which such an event occurred In some cases Longrigg passes over important aspects of the Middle Eastern region and its component countries almost or entirely in silence among such aspects being those of military resources prominent personalities constitutional or legal issues budgets and balances of trade And even on matters upon which he has said something fairly specific topography races and languages religions climates natural resources and agronomy industry communications there may be too little detailed information to satisfy a reader desirous of a full picture of a given aspect of things in this or that territory For most of such detail and not less for an appreciation which may be widely different from the author's the student can very easily look elsewhere the literature of these countries is abundant and accessible Longrigg's attempt has been to offer an objective but informed account of the different nationalities and social forces found in Middle Eastern environments urban and rural in terms of the particular circumstances problems and hopes of the dozen separate and more or less divided states of the region The non specialist reader may from all this learn something true and perhaps suggestive while the expert may find not too much to offend him

The Impact of Oil Revenues on Arab Gulf Development M.S. El Azhary, 2023-05-09 As the price of oil fell in the eighties the pressures on the Arab Gulf States to speed up the diversification of their economies into non oil

sectors increased This book first published in 1984 examines this problem and many other issues connected with the impact of oil revenues on development in the Gulf States It considers changing oil production policies and developments in other sectors of the economy including agriculture industry and banking It explores population problems moves towards Gulf economic coordination and the impact of oil on society culture and education This book provides an assessment of just how much the region depends on oil for its economic prosperity and development and some indication of the enormous problems that would face the region should the demand for oil decrease still further *Paths to the Middle East* Thomas

Naff,2012-02-01 The field of Middle East studies is undergoing a generational change in academia government and the corporate community The men and women who trained the present generation of scholars and who shaped government and corporate policies toward the Middle East after World War II have begun to retire and unfortunately some have recently died To preserve their insights into the past and their visions of the future Thomas Naff asked a number of major Islamic and Middle East scholars to provide their perspectives and views in a short personal summation of their careers This book is a compilation of their responses It provides a unique evaluation of the last 30 or 40 years by ten of the most distinguished pioneers representing key branches of the field Pierre Cachia Albert Hourani J C Hurewitz Halil Inalcik Charles Issawi Ernest McCarus George Makdisi Don Peretz Dankwart A Rustow and Farhat J Ziadeh have provided their perspectives on the past and present their visions of future paths to be explored and their wisdom drawn from decades of experience and scholarship Whatever didacticism is offered in this book is not formal Lessons insights wisdom and inspiration are almost invisibly woven into the fabric of fascinating biographical narrative told with wit style self effacement and candor Administration and

Development in the Arab World Jamil Jreisat,Zaki R. Ghosheh,2016-03-22 This book first published in 1986 examines the literature on administration human resources and development in the Arab world It emphasizes contemporary societies and their internal dynamics the least known and most critical aspects of Arabic studies **Middle East Patterns** Colbert C.

Held,2018-05-04 This book covers the Middle East from a topical or systematic perspective focusing on the states of the Gulf and southern Arabian Peninsula It includes the dramatic developments in the Arab world across North Africa and in the heart of the Middle East since late 2010 termed as the Arab Spring Labor and Rainfed Agriculture in West Asia and North

Africa Dennis Tully,2012-12-06 The basic objective of agricultural research at ICARDA is to enhance producer and consumer welfare through increasing the productivity stability and profitability of agriculture Improved practices must be technically economically and socially suitable to farmer conditions The rainfed areas of West Asia and North Africa have highly variable environmental conditions as well as complex social and economic structures In recent years the region has been experiencing major changes in the relative availabilities and costs of the classical factors of production land labor and capital These changes have important implications for the design of new agricultural technology On the one hand the availability of labor may be an important factor determining the acceptability of new technology On the other it is important to consider the

impact that technology can have on rural employment To develop a better awareness of these issues and their relevance to technology development ICARD A initiated a project on Agricultural Labor and Tech nological Change The first stage of the project is published here it is a review of available literature on selected issues of regional importance com bined with more detailed analyses of the situations of eight countries with important rainfed agricultural sectors ICARDA greatly appreciates the financial assistance of the Ford Foun dation which allowed us to support the execution of the study and publi cation of its findings We also appreciate the great efforts of the authors in the face of often limited data and facilities *Instability and Conflict in the Middle East* N. Abi-Aad,M. Grenon,1997-04-11 The present book is about instability and conflict in the Middle East at a time when many still believe that peace between the Arabs and Israel will bring an end to all problems in the region Maybe that is due to the fact that the Arab Israeli conflict has dominated much of the discussions about the area over the past fifty years Insufficient attention has therefore been devoted to other important issues that may not be quite as eye catching or newsworthy This is exactly what the book is aiming to offer *Foreign Agriculture* ,1955 The Middle East in the 1990's United States.
