The Alpha Trap Stuart J. Byrne, 1978 Fundamental Physics in Particle Traps Wolfgang Quint, Manuel Vogel, 2014-01-28 This volume provides detailed insight into the field of precision spectroscopy and fundamental physics with particles confined in traps It comprises experiments with electrons and positrons protons and antiprotons antimatter and highly charged ions together with corresponding theoretical background Such investigations represent stringent tests of quantum electrodynamics and the Standard model antiparticle and antimatter research test of fundamental symmetries constants and their possible variations with time and space They are key to various aspects within metrology such as mass measurements and time standards as well as promising to further developments in quantum information processing The reader obtains a valuable source of information suited for beginners and experts with an interest in fundamental studies using particle traps **ALPHA'S TRAP (THRILLER).** ZOE. Detection of Trapped Antihydrogen Richard Hydomako, 2012-12-14 In 2010 the ALPHA collaboration achieved a first for mankind the stable long term storage of atomic antimatter a project carried out at the Antiproton Decelerator facility at CERN A crucial element of this observation was a dedicated silicon vertexing detector used to identify and analyze antihydrogen annihilations This thesis reports the methods used to reconstruct the annihilation location Specifically the methods used to identify and extrapolate charged particle tracks and estimate the originating annihilation location are outlined Finally the experimental results demonstrating the first ever magnetic confinement of antihydrogen atoms are presented These results rely heavily on the silicon detector and as such the role of the annihilation vertex reconstruction is emphasized
