Brembeck, 1985 **Strategic Doctrines and Their Alternatives** Yoshikazu Sakamoto, 1987 This book will give the reader a perspective into the core theory and practice of data mining and knowledge discovery DM KD Its chapters combine many theoretical foundations for various DM KD methods and they present an array of examples many of which are drawn from real life applications Most of the theoretical developments discussed are accompanied by an extensive empirical analysis which should give the reader both a deep theoretical and practical insight into the subjects covered The intended audience for this book includes graduate students studying data mining who have some background in mathematical logic and discrete optimization as well as researchers and practitioners in the same area

BOOK JACKET *The Myth of International Order* Arjun Chowdhury, 2018 In February of 2011 Libyan citizens rebelled against Muammar Qaddafi and quickly unseated him The speed of the regime's collapse confounded many observers and the ensuing civil war showed Foreign Policy's index of failed states to be deeply flawed FP had in 2010 identified 110 states as being more likely than Libya to descend into chaos They were spectacularly wrong but this points to a larger error in conventional foreign policy wisdom failed or weak and unstable states are not anomalies but are instead in the majority More states resemble Libya than Sweden Why are most states weak and unstable Taking as his launching point Charles Tilly's famous dictum that war made the state and the state made war Arjun Chowdhury argues that the problem lies in our mistaken equation of democracy and economic power with stability But major wars are the true source of stability only the existential crisis that such wars produced could lead citizens to willingly sacrifice the resources that allowed the state to build the capacity it needed for survival Developing states in the postcolonial era never experienced the demands major interstate war placed on European states and hence citizens in those nations have been unwilling to sacrifice the resources that would build state capacity For example India and Mexico are established democracies with large economies Despite their indices of stability both countries are far from stable there is an active Maoist insurgency in almost a quarter of India's districts and Mexico is plagued by violence drug trafficking and high levels of corruption in local government Nor are either effective at collecting revenue As a consequence they do not have the tax base necessary to perform the most fundamental tasks of modern states controlling organized violence in a given territory and providing basic services to citizens By this standard the majority of states in the world about two thirds are weak states Chowdhury maintains that an accurate evaluation of international security requires a normative shift the language of weakness and failure belies the fact that strong states are exceptions Chowdhury believes that dismantling this norm is crucial as it encourages developing states to pursue state building via war which is an extremely costly approach in terms of human lives and capital Moreover in our era such an approach is destined to fail because the total wars of the past are highly unlikely to occur today Just as importantly the non state alternatives on offer are not viable alternatives For better or worse we will continue to live in a state dominated world

where most states are weak Counterintuitive and sweeping in its coverage The Myth of International Order demands that we fundamentally rethink foundational concepts of international politics like political stability and state failure Survival for All A. J. Aizenstat,1985 Examines current U S nuclear policy looks at the progress of arms control negotiations and suggests a new approach to nuclear disarmament **Britain and Defence 1945-2000** Stuart Croft,Peter Dorman,2014-06-06 This text provides a concise thematic introduction to the evolution of British defence policy since the end of the second world war

, 1963 **Alternative Approaches to British Defence Policy** John Baylis, 1983-12-01 **Better Safe Than Sorry**

Michael Krepon, 2009-01-02 In 2008 the iconic doomsday clock of the Bulletin of the Atomic Scientists was set at five minutes to midnight two minutes closer to Armageddon than in 1962 when John F Kennedy and Nikita Khrushchev went eyeball to eyeball over missiles in Cuba We still live in an echo chamber of fear after eight years in which the Bush administration and its harshest critics reinforced each other's worst fears about the Bomb And yet there have been no mushroom clouds or acts of nuclear terrorism since the Soviet Union dissolved let alone since 9 11 Our worst fears still could be realized at any time but Michael Krepon argues that the United States has never possessed more tools and capacity to reduce nuclear dangers than it does today from containment and deterrence to diplomacy military strength and arms control The bloated nuclear arsenals of the Cold War years have been greatly reduced nuclear weapon testing has almost ended and all but eight countries have pledged not to acquire the Bomb Major powers have less use for the Bomb than at any time in the past Thus despite wars crises and Murphy's Law the dark shadows cast by nuclear weapons can continue to recede Krepon believes that positive trends can continue even in the face of the twin threats of nuclear terrorism and proliferation that have been exacerbated by the Bush administration's pursuit of a war of choice in Iraq based on false assumptions Krepon advocates a back to basics approach to reducing nuclear dangers reversing the Bush administration's denigration of diplomacy deterrence containment and arms control As he sees it The United States has stumbled before but America has also made it through hard times and rebounded With wisdom persistence and luck another dark passage can be successfully navigated
