scientific controversies over the nature and significance of sex differences While deliberating fairness for female students white and black women physical educators also pursued equity for themselves as their workplaces and nascent profession often marginalized female and minority personnel Questions of difference and equity divided the field throughout the twentieth century while some women teachers favored moderate views and incremental change others promoted justice for their students and themselves by exerting authority at their schools critiquing traditional concepts of difference and devising innovative curricula Connecting the history of science race and gender studies American social history and the history of sport this book sheds new light on physical education s application of scientific ideas the politics of gender race and sexuality in the domain of active bodies and the enduring complexities of difference and equity in American culture **This Nest of Vipers** Charles Howard McCormick,1989 This book chronicles Luella Raab Mundel s unsuccessful attempt to regain her job and restore her reputation after she was labeled a security risk and fired from Fairmont State College during the McCarthy era Red Scare of the 1950s **History of Higher Education Annual: 1997** Roger L. C. Kemeny, 1998-10-29 This book argues against the conventional idea that Protestantism effectively ceased to play an important role in American higher education around the end of the 19th century Employing Princeton as an example the study shows that Protestantism was not abandoned but rather modified to conform to the educational values and intellectual standards of the modern university Drawing upon a wealth of neglected primary sources Kemeny sheds new light on the role of religion in higher education by examining what was happening both inside and outside the classroom and by illustrating that religious and secular commitments were not neatly divisible but rather commingled
