hasn't marveled at the diversity and beauty of shells Or picked one up held it to our ear and then gazed in wonder at its shape and hue Many a lifelong shell collector has cut teeth and toes on the beaches of the Jersey Shore the Outer Banks or the coasts of Sanibel Island Some have even dived to the depths of the ocean But most of us are not familiar with the

biological origin of shells their role in explaining evolutionary history and the incredible variety of forms in which they come

Shells are the external skeletons of mollusks an ancient and diverse phylum of invertebrates that are in the earliest fossil

record of multicellular life over 500 million years ago There are over 100 000 kinds of recorded mollusks and some estimate

that there are over a million more that have yet to be discovered Some breathe air others live in fresh water but most live in

the ocean They range in size from a grain of sand to a beach ball and in weight from a few grams to several hundred pounds

And in this lavishly illustrated volume they finally get their full due The Book of Shells offers a visually stunning and

scientifically engaging guide to six hundred of the most intriguing mollusk shells each chosen to convey the range of shapes

and sizes that occur across a range of species Each shell is reproduced here at its actual size in full color and is accompanied

by an explanation of the shell's range distribution abundance habitat and operculum the piece that protects the mollusk when

it's in the shell Brief scientific and historical accounts of each shell and related species include fun filled facts and anecdotes

that broaden its portrait The Matchless Cone for instance or *Conus cedonulli* was one of the rarest shells collected during the

eighteenth century So much so in fact that a specimen in 1796 was sold for more than six times as much as a painting by

Vermeer at the same auction But since the advent of scuba diving this shell has become far more accessible to collectors

though not without certain risks Some species of *Conus* produce venom that has caused more than thirty known human

deaths The Zebra Nerite the Heart Cockle the Indian Babylon the Junonia the Atlantic Thorny Oyster shells from habitats

spanning the poles and the tropics from the highest mountains to the ocean's deepest recesses are all on display in this

definitive work **Seashells of the World** Robert Tucker Abbott,1985 *Sea Shells of the World* Robert Tucker

Abbott,1962 *Field Guide to Seashells of the World* Gert Lindner,1978 A Collector's Guide to Seashells of the World
