Texts and Textuality Philip G. Cohen,2018-12-20 These essays deal with the scholarly study of the genesis transmission and editorial reconstitution of texts by exploring the connections between textual instability and textual theory interpretation and pedagogy What makes this collection unique is that each essay brings a different theoretical orientation New Historicism Poststructuralism or Feminism to bear upon a different text such as Whitman s Leaves of Grass Faulkner s The Sound and the Fury or hypertext fiction to explore the dialectical relationship between texts and textuality The essays bring some of the textual theories that compete with each other today into contact with a broad range of primarily literary textual histories That texts are intrinsically unstable frequently consisting of a series of determinate historical versions has consequences for all students of literature because different versions of a literary work frequently help shape different readings independently of the interpretations brought to bear upon them Textual instability of the works is relevant to our understanding of how the meanings of texts are generated The contributors build on the numerous challenges to the Anglo American editorial tradition mounted during the past decade by scholars as diverse as Jerome McGann D F McKenzie Peter Shillingsburg D C Greetham Hershel Parker and Hans Walter Gabler The volume contributes to the paradigm shift in textual scholarship inaugurated by these scholars Index

Nancy Budwig,2013-04-15 Although there has been much empirical study within what has been referred to as functional

approaches to child language there has yet to be a major attempt to compare and contrast such proposals In addition much of the work carried out within child language from a functionalist perspective has not been specific with regard to the nature of the approach adopted In attempting to fill the gap the author of this book begins with a comparison of various functionalist approaches By concentrating on one domain agentivity and control Budwig develops a set of research questions based on an examination of findings stemming from linguistics psycholinguistics and developmental psychology and also provides an in depth discussion of related methodological issues In the second part of the book she traces the development of linguistic means to refer to oneself within a developmental functionalist perspective Individual case studies as well as group analyses of six children in the early phases of acquiring English grammar are provided In the last part Budwig examines the relationship between forms and functions in development with special attention to potential generalizations about the organization and reorganization of the children s linguistic systems

Text W. S. Hillis,Edward Burns,Peter Shillingsburg,1999-10-31 Another volume in the distinguished annual *Following the Textual Revolution* Tymon Adamczewski,2016-10-31 Analysis of literature and culture abounds in modern scholarship customarily written in the familiar language of literary theory Though the terminology today seems more or less straightforward this was not always the case The propositions for a new and active understanding of text put forward in the 1960s by theorists like Roland Barthes and Jacques Derrida profoundly influenced contemporary critical thought and were unnerving to many This book examines how a divergent school of literary and cultural studies created French Theory appropriated its ideas about text and textuality and altered the landscape of debate in mainstream academic discourse The author traces the standardization of a once rebellious poststructuralism and presents contemporary critical thinking that questions the assumptions of Theory
