The Ageless Self Sources Of Meaning In Late Life Life Course Studies:

The Ageless Self Sharon R. Kaufman, 1986 Among the many studies of aging and the aged there is comparatively little material in which the aged speak for themselves In this compelling study Sharon Kaufman encourages just such expression recording and presenting the voices of a number of old Americans Her informants tell their life stories and relate their most personal feelings about becoming old Each story is unique and yet presented together they inevitably weave a clear pattern one that clashes sharply with much current gerontological thought With this book Sharon Kaufman allows us to understand the experience of the aging by listening to the aged themselves Kaufman while maintaining objectivity is able to draw an intimate portrait of her subjects We come to know these people as individuals and we become involved with their lives Through their words we find that the aging process is not merely a period of sensory functional economic and social decline Old people continue to participate in society and more important continue to interpret their participation in the social world Through themes constructed from these stories we can see how the old not only cope with losses but how they create new meaning as they reformulate and build viable selves Creating identity Kaufman stresses is a lifelong process Sharon Kaufman's book will be of interest and value not only to students of gerontology and life span development and to professionals in the field of aging but to everyone who is concerned with the aging process itself As Sharon Kaufman says If we can find the sources of meaning held by the elderly and see how individuals put it all together we will go a long way toward appreciating the complexity of human aging and the ultimate reality of coming to terms with one's whole life

Event History Analysis in Life Course Research Karl Ulrich Mayer, Nancy Brandon Tuma, 1990 A compendium of studies drawn from an international conference this volume includes the newest and most substantive work on event history analysis Researchers at four institutions convened shared models of analysis and collected their findings for the first time The studies included represent work done in the following organizations The Max Planck Institute in West Germany The U S Social Science Research Council's Committee on Comparative Stratification The Special Research Unit of the Deutsche Forschungsgemeinschaft and MASO and informal German working group on mathematical sociology This book is one of twelve in the University of Wisconsin Press's Life Course Studies series arranged by the series editors David L Featherman and David I Kertzer

Troubling Inheritances Sara Cohen, Line Grenier, Ros Jennings, 2022-08-11 This book provides an interdisciplinary focus on music memory and ageing by examining how they intersect outside of a formal therapeutic context or framework and by offering a counter narrative to age as decline It contributes to the development of qualitative research methodologies by utilizing and reflecting on methods for studying music memory and ageing across diverse and interconnected contexts Using the notion of inheritance to trouble its core themes of music memory ageing and methodology it examines different ways in which the concept of inheritance is understood but also how it commonly refers to the practice of passing on and the connections this establishes across time and space It confronts the ageist discourses that associate

popular music predominantly with youth and that focus narrowly and almost exclusively on music's therapeutic function for older adults. By presenting research which examines various intersections of music and ageing outside of a therapeutic context or framework, the book brings a much needed intervention.

The Development of Generativity across Adulthood Feliciano Villar, Heather L. Lawford, Michael W. Pratt, 2024-07-15. This volume brings together experts in generativity and related fields to provide a compelling overview of contemporary research and theory on this topic. Generativity refers to a concern for or acting towards the benefit of future generations as a legacy of the self; it has implications for outcomes at the individual, relational and social and broader societal levels. Understanding the role and expressions of generativity at various stages of our lives is important to our sense of well being and purpose and it impacts our parenting, caregiving and social relationships as well as having implications for our activities and experiences in the workforce and in voluntary activities in our communities and the wider society. The chapters in this volume explore the meaning and impact of generativity across development and across life contexts and roles. They address generativity within a particular area or life domain or period of the lifespan and outline key methods and findings as well as theoretical issues and applied implications. The volume represents the first comprehensive exploration of generativity from early to late adulthood; it offers a broad international perspective and will inform research into generativity across multiple cultures.

Cultural Gerontology Lars Andersson, 2002-11-30. The concept of culture has gained considerable attention within the humanities and social sciences in general and this is certainly true in the field of gerontology. The new perspectives thus gained widen the scope of gerontology. In this study, chapter authors examine the growth of gerontology as a discipline, the phenomenon of ageism as a socio-cultural concept, identity politics in which older persons are perceived as belonging to a subculture and images of the older body in cultural perspective. The manner in which gerontology emerged as a discipline was embedded in culturally defined views of aging that had consequences for how it was seen to vary between cultures. One consequence was a perception of ageism as a cultural construction. Since the 1980s much of the politics of older people is a form of identity politics in which groups are mobilized to further their interests. Questions of cultural meanings ascribed to the gendered aging body is a central question for ageism, social identity and self image. These questions become especially relevant in confrontations with bodily decline and negotiations of intimacy in institutions for older people.

Voices and Visions of Aging Robert Kastenbaum, PhD, Thomas R. Cole, PhD, W. Andrew Achenbaum, PhD, Patricia L. Jakobi, PhD, 1992-11-15. A critical gerontology requires more than a simple elaboration of existing humanistic scholarship on aging. This exceptional new work introduces a basis for genuine dialogue across humanistic, scientific and professional disciplines. Among the topics addressed are industrial employment, retirement, life styles of older women and biological research. From philosophical reflections on the third age to critical perspectives on institutional adaptations to an aging society, this book presents a wide range of provocative thought.

Reconstructing Old Age Chris Phillipson, 1998-10-26 In this timely and authoritative overview on social gerontology and social theory Chris Phillipson outlines the changing contexts and experiences associated with later life as we move into a new century The book critically reviews the different theoretical explanations which attempt to explain these changes Phillipson shows how in late modernity changes to pensions employment and retirement and intergenerational relations are placing doubt on the meaning of growing old He suggests that later life is being reconstructed as a period of potential choice on the one hand but also of risk and danger on the other This book will be essential reading for students and academics in social gerontology as well as for students and academics in sociology social policy and related disciplines interested in the future of an ageing population and the future of social gerontology

Work, Leisure and Well-Being John T Haworth, 2006-04-19 Although it is now well established that unemployment is detrimental to health and well being most of

us assume that a well structured rewarding leisure activity would be preferable to paid work John Haworth challenges these assumptions and shows that the very constriction of work like having to perform a task we wouldn't otherwise choose are often the most rewarding in the end Work Leisure and Well Being reviews the current literature and complements it with the findings of the most recent research to provide a serious and fascinating study of the most important areas of adult life It raises as many questions as it answers for instance if paid work is better than a leisure activity what's the use of looking forward to retirement Work Leisure and Well Being will be of interest not only to psychologists but also to a wide range of professionals involved in social policy and the leisure industry Global Aging and Challenges to Families Vern

Bengtson, 2018-01-16 The recent explosion in population ageing across the globe represents one of the most remarkable demographic changes in human history Population ageing will profoundly affect families Who will care for the growing numbers of tomorrow's very old members of societies Will it be state governments The aged themselves Their families The purpose of this book is to examine consequences of global aging for families and intergenerational support and for nations as they plan for the future Global Aging and Its Challenge to Families Vern L. Bengtson, Ariela Lowenstein, The recent explosion in population aging across the globe represents one of the most remarkable demographic changes in human history There is much concern about population aging and its consequences for nations for governments and for individuals It has often been noted that population aging will inevitably affect the economic stability of most countries and the policies of most state governments What is less obvious but equally important is that population aging will profoundly affect families Who will care for the growing numbers of tomorrow's very old members of societies Will it be state governments The aged themselves Their families The purpose of this volume is to examine consequences of global aging for families and intergenerational support and for nations as they plan for the future Four remarkable social changes during the past fifty years are highlighted 1 Extension of the life course A generation has been added to the average span of life over the past century 2 Changes in the age structures of nations Most nations today have many more elders and many fewer children than fifty years ago 3 Changes in family structures and relationships Some of these differences are the result of trends in family structure notably higher divorce rates and the higher incidence of childbearing to single parents 4 Changes in governmental responsibilities In the last decade governmental responsibility appears to have slowed or reversed as states reduce welfare expenditures How will families respond to twenty first century problems associated with population aging Will families indeed be important in the twenty first century or will kinship and the obligations across generations become increasingly irrelevant replaced by personal communities This volume goes a considerable distance to answer these critical issues for the twenty first century Vern L Bengtson is an AARP University Chair in Gerontology and Professor of Sociology University of Southern California Ariela Lowenstein is associate professor and head Department of Aging Studies University of Haifa Israel **Aging and Development** Peter G. Coleman, Ann O'Hanlon, 2017-02-03 The psychology of aging usually focuses upon cognitive changes

with a particular focus on dementia and other forms of cognitive decline But getting older is about more than simply changes to the brain and related health issues Changes to our social and emotional lives are also hugely significant as we adapt across our lifespan The second edition of *Aging and Development* is the only textbook available that responds to the growing interest in social personal and emotional development in older age Ideally suited to complement texts on cognitive change the book provides a holistic developmental perspective on aging It highlights a range of issues including the development of personal meaning and spirituality improvements in emotional control uses of reminiscence and life review the importance of healthy attitudes to aging as well as the maintenance of close personal relationships It does not avoid the difficult issues of late life decline but illustrates how even in circumstances of physical and mental frailty a positive sense of self can be created and enhanced Fully updated to provide the most cutting edge overview on this burgeoning topic of interest *Aging and Development* includes a glossary and list of useful websites both on the study of gerontology and the psychology of aging It will be essential reading for all students of developmental psychology as well as anyone either training to work or already working with older people
