The Aggressive Management Style:

The Aggressive Management Style Norman Kobert, 1982 Organizational Learning at NASA Julianne G. Mahler, 2009-03-27 Just after 9 00 a m on February 1 2003 the space shuttle Columbia broke apart and was lost over Texas This tragic event led as the Challenger accident had 17 years earlier to an intensive government investigation of the technological and organizational causes of the accident The investigation found chilling similarities between the two accidents leading the Columbia Accident Investigation Board to conclude that NASA failed to learn from its earlier tragedy Despite the frequency with which organizations are encouraged to adopt learning practices organizational learning especially in public organizations is not well understood and deserves to be studied in more detail This book fills that gap with a thorough examination of NASA s loss of the two shuttles After offering an account of the processes that constitute organizational learning Julianne G Mahler focuses on what NASA did to address problems revealed by Challenger and its uneven efforts to institutionalize its own findings She also suggests factors overlooked by both accident commissions and proposes broadly applicable hypotheses about learning in public organizations *Dynasties and Female Political Leaders in Asia* Claudia Derichs, Mark R. Thompson, 2013 This book is the first comprehensive academic effort to examine the phenomenon of top female political leaders in Asia It portrays prime ministers presidents and opposition leaders but it is not a conventional biographical volume Rather it analyzes female politicians by means of case studies that are based on a common theoretical framework The case studies were conducted over three years of field research which included interviews with the female leaders themselves and members of their inner circle Each chapter explores the similarities but also points to the distinctiveness of each female leader arising from political and social systems cultural and religious conditions and economic parameters Series Political Science Perspectives Politikwissenschaftliche Perspektiven Vol 16 **Workplace Violence** Vaughan Bowie, Bonnie S. Fisher, 2012-12-06 Reaching beyond the current emphasis on equipping primary responders such as police paramedics to react to violent incidence in the workplace this book also addresses the experiences of secondary responders including managers human resources staff unions humanitarian aid workers and their training and support needs **Taming the Abrasive Manager** Laura Crawshaw, 2021-05-13 Taming the Abrasive Manager is an ideal resource for managers human resource professionals coaches and anyone who works for or with an abrasive boss Executive coach Dr Laura Crawshaw known as the Boss Whisperer for her work in this field shares her discoveries on how to tame the deep fears that drive abrasive managers to attack their coworkers In her straight shooting style Crawshaw offers invaluable insights gained from her encounters with abrasive bosses in corporate jungles who aggressively defend against threats to their dominance in the high risk business of survival These insights combined with lessons learned from employees and organizations who have successfully reined in their unmanageable bosses provide realistic solutions that will improve the workplace for everyone The Origins of the Gods James S. Hans, 1991-09-03 Based on Nietzsche s critique of religion and

culture and engaging the contemporary offshoots of that critique this book assesses the myths of origins that have been used to articulate the fundamental attitude toward the relationship between shame and beauty In reconsidering some of the myths upon which the West is based from Hesiod and Greek mythology to Plato and the Bible Hans pursues the ways in which we have habitually separated shame and beauty in order to create the grounds that would provide us with the authority for our lives we think we need By juxtaposing Socrates repression of violence in *The Republic* and Nietzsche's conception of the overman the author revises the network of relations that are associated with the religious the aesthetic and the political asserting that the religious derives from the aesthetic rather than the other way around and establishing a necessary connection between the political and the aesthetic Hans aims to raise yet again the questions embodied in Nietzsche's attempt to prompt humans to face the true status of their actions in the world are we finally able to address our shame without immediately projecting it onto another or repressing it If so what changes might we see in the psychological social and political worlds we would create out of such an acknowledgment What value is to be found in accepting the uneasy relationship between shame and beauty upon which our lives rest While *The Origins of the Gods* provides no definitive answers to such questions simply because none are possible it makes use of such queries in order to reassert the great importance of Nietzsche's affirmation of the value of the world as it is It argues that this affirmation has something crucial to offer if we are willing to forgo an authorized existence and confront the beauty and shame from which our lives are inevitably constituted

The Rules of Success Karsten Drath, 2018-08-06 This book is about the rules of long term professional success The international study on which this book is based suggests that success is above all one thing the quest for a combination of happiness and satisfaction coupled with economic independence However the data also suggest that the definition of success varies significantly from person to person And furthermore it seems like success is not an objective quality but at least partly it results from a process of comparison with a peer group which means in turn that the selection of your peer group is crucial for your perceived level of success in life The author argues that in fact certain success factors do exist and that they are fewer in number than one might think But above all if we look thoroughly at the lives of truly successful people it soon becomes apparent that success primarily has to do with overcoming setbacks failure and crisis This ability to effectively process adversity is also known as resilience Because of its criticality for success this concept is discussed in greater depth using the FiRE model Factors improving Resilience Effectiveness as a structure This concept has been developed by the author through many years of research It differs from existing models due to its holistic approach including analysing different disciplines of science such as biology medicine brain research epigenetics sociology psycho neuro immunology etc
