## **The Agricultural Economy Of Northeast Brazil:**

*The Agricultural Economy of Northeast Brazil* Gary P. Kutcher, Pasquale L. Scandizzo, 1981 The Northeast problem is one of massive economic and social disparity compounded by an apparent intractability This study focuses on the agricultural sector Formulation of agricultural policy has been difficult and disappointing to a large degree as a result of the diversity in farming systems and in production and marketing patterns Therefore the study identifies seven distinct physiographic zones It distinguishes different groups in the agricultural labor force according to tenurial arrangements that affect their access to land Discussion of agricultural production leads to the suggestion that the product mix which is inferior and locally consumed contributes to the region's stagnation Farm incomes are highly skewed depending partly on farm size and partly on location It appears that the large farm sector is not using resources efficiently Labor is perhaps the only factor for which markets delivery systems and mobility are sufficient to balance demand and supply A linear programming model provides a consistent quantitative framework within which to identify the factors constraining development and to simulate effects of policy interventions Land reform emerges as the most likely prerequisite for solving the Northeast problem

*The Changing Face of Northeast Brazil* Kempton Evans Webb, 1974 Home to the New York Yankees the Bronx Zoo and the Grand Concourse the Bronx was at one time a haven for upwardly mobile second generation immigrants eager to leave the crowded tenements of Manhattan in pursuit of the American dream Once hailed as a wonder borough of beautiful homes parks and universities the Bronx became during the 1960s and 1970s a national symbol of urban deterioration Thriving neighborhoods that had long been home to generations of families dissolved under waves of arson crime and housing abandonment turning blocks of apartment buildings into gutted graffiti covered shells and empty trash filled lots In this revealing history of the Bronx Evelyn Gonzalez describes how the once infamous New York City borough underwent one of the most successful and inspiring community revivals in American history From its earliest beginnings as a loose cluster of commuter villages to its current status as a densely populated home for New York's growing and increasingly more diverse African American and Hispanic populations this book shows how the Bronx interacted with and was affected by the rest of New York City as it grew from a small colony on the tip of Manhattan into a sprawling metropolis This is the story of the clattering of elevated subways and the cacophony of crowded neighborhoods the heady optimism of industrial progress and the despair of economic recession and the vibrancy of ethnic cultures and the resilience of local grassroots coalitions crucial to the borough's rejuvenation In recounting the varied and extreme transformations this remarkable community has undergone Evelyn Gonzalez argues that it was not racial discrimination rampant crime postwar liberalism or big government that was to blame for the urban crisis that assailed the Bronx during the late 1960s Rather the decline was inextricably connected to the same kinds of social initiatives economic transactions political decisions and simple human choices that had

once been central to the development and vitality of the borough Although the history of the Bronx is unquestionably a success story crime poverty and substandard housing still afflict the community today Yet the process of building and rebuilding carries on and the revitalization of neighborhoods and a resurgence of economic growth continue to offer hope for the future

**Agriculture in Liberalizing Economies** DINA L. UMALI, Charles Maguire, 1995 Discusses ways in which the role of the state in promoting agricultural growth and development may be redefined This report presents the proceedings of the 14th World Bank Agricultural Symposium held in January 1994 The papers explore ways in which the role of the state in promoting agricultural growth and development may be redefined They also capitalize on important lessons emerging from experiences around the world The report suggests that changing the role of government from market domination towards the provision of a regulatory framework that facilitates private sector activity is an ongoing process rather than a one time occurrence The papers also illustrate the wide variety of issues and the different approaches in the various countries that are redefining the role of government in agricultural development

*Politics of Drought and Development in Twentieth-Century Brazil* Eve E. Buckley, 2017-07-28 Eve E Buckley's study of twentieth century Brazil examines the nation's hard social realities through the history of science focusing on the use of technology and engineering as vexed instruments of reform and economic development. Nowhere was the tension between technocratic optimism and entrenched inequality more evident than in the drought-ridden Northeast sertão plagued by chronic poverty, recurrent famine and mass migrations. Buckley reveals how the physicians, engineers, agronomists and mid-level technocrats working for federal agencies to combat drought were pressured by politicians to seek out a technological magic bullet that would both end poverty and obviate the need for land redistribution to redress long-standing injustices. Scientists planned and oversaw huge projects including dam construction, irrigation for small farmers and public health initiatives. They were, Buckley shows, sincerely determined to solve the drought crisis and improve the lot of poor people in the sertão. Over time, however, they came to the frustrating realization that despite technology's tantalizing promise of an apolitical means to end poverty, political collisions among competing stakeholders were inevitable. Buckley's revelations about technocratic hubris, the unexpected consequences of environmental engineering and constraints on scientists as agents of social change resonate with today's hopes that science and technology can solve society's most pressing dilemmas, including climate change.

*Climate Change and Regional Socio-Economic Systems in the Global South* Mukunda Mishra, Andrews José de Lucena, Brij Maharaj, 2024-08-27 This volume showcases how the climate change phenomena CCP have been causing multifaceted threats to humankind through increasing numbers of extreme events affecting social, economic and human development worldwide. The Global South is especially showcased in this contributory volume where adverse effects of CCP and related disasters impact majority of the population which depends on land and natural resources for their livelihoods. This book asserts that climate change and extreme events are potential threats to sustainable human development and micro-spatial observations and analysis of impacts of CCP are vital for adopting resilience policies. This book not enquiring why CCP is happening embarks on a quest to showcase how best to respond to such phenomena through detailed and well-founded micro-spatial investigations on poor farmers, pastoralists, fishermen, folk, migrant labours, slum dwellers who are considered the most threatened by climate changes and weather shocks based on possible disruptions in the production process. Scholarly contributions in this volume analyze how local and regional versions of CCP actively challenge the economies and livelihoods, question the social securities and good governance and how such phenomena ultimately become a constraint in achieving sustainable development in the Global South. This volume accommodates many aspects of regional adaptation strategies in

vulnerable areas and groups in different parts of the Global South to ensure stability and peacefulness Academicians research scholars and readers inquisitive about the socio economic dimensions of climate change in the Global South will find the discussions across different chapters of this volume interesting      **Survey of the Brazilian Economy** Brazil.
