The Alliance Revolution The New Shape Of Business Rivalry

Kenneth Hall, Myrtle Chuck-A-Sang

The Alliance Revolution The New Shape Of Business Rivalry:

The Alliance Revolution Benjamin Gomes-Casseres, 1996 More than we ever anticipated alliances among firms are changing the way business is conducted particularly in the global high technology sector The reasons are clear companies must increasingly pool their capabilities to succeed in ever more complex and rapidly changing businesses But the consequences for managers and for the economy have so far been underestimated In this new book Benjamin Gomes Casseres presents the first in depth account of the new world of business alliances and shows how collaboration has become part of the very fabric of modern competition Alliances he argues create new units of competition that do battle with one another and with traditional single firms The flexible capabilities of these multi firm constellations give them advantages over single firms in certain contexts offsetting the advantage of a single firm's unified control When managed effectively alliances can strengthen a firm's competitive advantage and narrow the gap between leading firms and second tier players This often results in intensified rivalry and the competition within an industry is transformed Alliances often spread swiftly through an industry as firms jockey for advantage Yet the very spread of alliances increases their costs and poses new limits on their use Gomes Casseres concludes that firms need to manage their constellations to enhance collaboration within their groups while raising what he calls barriers to collaboration for rivals These ideas are developed and illustrated through original case studies of alliances among U S Japanese and European firms in electronics and computers including Xerox IBM and Fujitsu as well as other small and large companies The book should be of interest to business academics managers and general readers concerned with contemporary capitalism *The Alliance Revolution* Benjamin Gomes-Casseres, 1997

Foundations of Coopetition Strategy Anna Minà, Giovanni Battista Dagnino, 2021-12-30 This book disentangles the foundations of coopetition i.e. concurrent competition and cooperation by exploring in depth the intellectual legacy of Eastern and Western perspectives In particular it detects the foundations of coopetition in three Chinese streams of thought Confucianism Taoism and Legalism and in five Western schools of thought David Hume Adam Smith Immanuel Kant Georg Wilhelm Frederick Hegel and Søren Kierkegaard In such a way it unveils four logics used to tackle the essence of coopetition respectively either or both and both or and either and The key objectives of the book are firstly to adopt a paradoxical lens to investigate the foundations of coopetition strategy Secondly to offer an interpretive framework that detects the different forms tactics and patterns of coopetition Thirdly to discuss the implications of the framework proposed for other paradoxical strategies and to distil a bouquet of managerial implications In such a way the volume combines existing foundational perspectives with a contemporary interpretation of the coopetition phenomenon thereby offering a valuable understanding of the current business and management world The guiding principles of the book enable readers to extricate the dichotomy between the phenomenon of coopetition and competitive strategy appraise the rationale for distinguishing between deliberate planned coopetition strategy and emergent unplanned but conscious coopetition strategy and understand how to deal with

coopetition tensions Remix Strategy Benjamin Gomes-Casseres, 2015 Alliances partnerships acquisitions mergers and joint ventures are no longer exceptions in most businesses they are part of the core strategy As companies look to external partners for acquiring even strategic resources and capabilities they need a practical road map for ensuring these relationships generate value What combinations of resources do we need How do we manage them over time What profits will we earn Will they justify our investments Benjamin Gomes Casseres shares insight from decades of consulting and academic research on how companies create new value by remixing resources with other companies Organized around three laws Remix Strategy explains how companies can gain the most from their business combinations First Law The value created by the combination should exceed the total that would be generated by the players acting alone How much more value can we create together in the market together What lies behind this joint value Second Law The combination must be designed and managed to realize the joint value in reality What partners and structures fit this goal best How do we manage those elements that are the sources of the joint value Third Law Each participant must earn sufficient profits to reward its investment How do we divide the joint value How might these shares change over time Other books explain how to structure deals or how to navigate complexities of organization and culture This book provides core principles and a practical framework for creating and capturing value no matter the path chosen **Small and Medium-Sized Enterprises in the**

Global Economy Zoltan J. Acs, Bernard Yin Yeung, 2010-08-10 Entrepreneurship and globalization are two much examined forces as we enter the new millennium yet very little has been published on the intersection of small and medium sized enterprises SMEs and the global economy To close the gap this volume delves into the intricate roles and consequences of such businesses on both global and domestic economies The first part of the volume provides an overview of the phenomenon of globalization arguing that entrepreneurial discovery and technological change lead to globalization which in turn leads to further opportunity for entrepreneurial discovery no less for SMEs than for multinational corporations In part two the essays examine the role of SMEs in the global economy and why they are thriving Part three reviews the roles of SMEs and innovators and examines their roles in direct foreign investment Part four explores the role of technological diversity and knowledge spillovers as a way to explain the superior innovative performance of SMEs Part five looks at the role of SMEs in technology transfer Finally part six examines the theoretical and policy implications of the international activities of SMEs suggesting that policies should aim to reduce the costs in international expansion for SMEs This volume will provide the foundation for further study in SMEs and globalization It will appeal to scholars and students in both international business and economics Zoltan J Acs is Professor of Economics and Finance University of Baltimore Bernard Yin Yeung is Professor of International Business University of Michigan **Handbook of Media Management and Economics** Alan
