Snow, 1989      *State Information Book*, 1987      *Marine Technology Society Journal* Marine Technology Society, 1984      **Directory of Veterans Organizations**, 1984      *Serials Catalog* Iowa State University. Library, 1990      *China's Rising Sea Power* Peter Howarth, 2006-04-18 This is a fascinating insight into China's strategic abilities and ambitions probing the real depths of its plans for the twenty first century China's Rising Sea Power explores similarities between China's strategic outlook today and that of earlier continental powers whose submarine fleets challenged dominant maritime powers for regional hegemony Germany in two World Wars and the Soviet Union during the Cold War Using insights from classical naval strategic theory Peter Howarth examines Beijing's strategic logic in making tactical submarines the keystone of China's naval force structure He also investigates the influence of Soviet naval strategy and ancient Chinese military thought on the PLA Navy's strategic culture contending that China's increasingly capable submarine fleet could play a key role in Beijing's use of force to resolve the Taiwan issue This book will be of great interest to all students and scholars of security and strategic studies Asian politics geopolitics and military naval strategy      **Cataloged Serial Holdings** National Defense University. Library, 1986      **Technological Change and the Future of Warfare** Michael E. O'Hanlon, 2011-04-01 In light of the spectacular performance of American high technology weapons in the 1991 Persian Gulf War as well as the

phenomenal pace of innovation in the modern computer industry many defense analysts have posited that we are on the threshold of a revolution in military affairs RMA The issue has more than semantic importance Many RMA proponents have begun to argue for major changes in Pentagon budgetary priorities and even in American foreign policy more generally to free up resources to pursue a transformed U S military and to make sure that other countries do not take advantage of the purported RMA before we do This book takes a more measured perspective Beginning with a survey of various types of defense technologies it argues that while important developments are indeed under way most impressively in electronics and computer systems the overall thrust of contemporary military innovation is probably not of a revolutionary magnitude Some reorientation of U S defense dollars is appropriate largely to improve homeland defense and to take advantage of the promise of modern electronics systems and precision guided munitions But radical shifts in U S security policy and Pentagon budget priorities appear unwarranted especially if those shifts would come at the expense of American military engagement in overseas defense missions from Korea to Iraq to Bosnia
