## **The Advent Of A New Hope:**

**The Advent of a New Hope: I Will Lift Up My Eyes to the Hills...Psalm 121** Dr. Lilian I. Asomugha, *A New Hope* Stephen Lakkis, 2014-10-16 Theology and historiography often see the future as a realm open to new experiences and unexpected events Yet for classical physics the future was the result of the universe's predictable development Given enough information about current states we could use the laws of nature to uncover the universe's future Modern space time theory with its picture of an invariant four dimensional universe only makes this problem more acute Room for radically novel events for miracles and new hope seems to have disappeared It is this hope for something new that the German theologian Wolfhart Pannenberg seeks to preserve in his controversial work on time To defend God's supernatural freedoms and to escape natural determinism Pannenberg invokes a medieval understanding of the unsurpassable and absolute power of God using God's potentia absoluta to reverse time's flow and express absolute authority over creation's progress Time and all its contents are utterly subjected under the free will of a divine all determining reality But is this tenable for modern understandings of God and the universe Or does it lead to theological difficulties and promote an arms race between the laws of nature and the rule of God In this volume Stephen Lakkis offers an analysis and critique of Pannenberg's approach and suggests a different way forward
