The Age of Mammals Björn Kurtén, 1971      **The Beginning of the Age of Mammals** Kenneth D. Rose, 2006-10-31 In the tradition of G G Simpson's classic work Kenneth D Rose's *The Beginning of the Age of Mammals* analyzes the events that occurred directly before and after the mysterious K T boundary which so quickly thrust mammals from obscurity to planetary dominance Rose surveys the evolution of mammals beginning with their origin from cynodont therapsids in the Mesozoic contemporary with dinosaurs through the early Cenozoic with emphasis on the Paleocene and Eocene adaptive radiations of therian mammals Focusing on the fossil record he presents the anatomical evidence used to interpret behavior and phylogenetic relationships The life's work of one of the most knowledgeable researchers in the field this richly illustrated magisterial book combines sound scientific principles and meticulous research and belongs on the shelf of every paleontologist and mammalogist

**The Age of Mammals** Chris Manias, 2023-06-27 When people today hear paleontology they immediately think of dinosaurs But for much of the history of the discipline dramatic demonstrations of the history of life focused on the developmental history of mammals *The Age of Mammals* examines how nineteenth century scholars writers artists and public audiences understood the animals they regarded as being at the summit of life For them mammals were crucial for understanding the formation and possibly the future of the natural world Yet as Chris Manias reveals this combined with more troubling notions that seemingly promising creatures had been swept aside in the struggle for life or that modern biodiversity was impoverished compared to previous eras Why some prehistoric creatures such as the saber toothed cat and ground sloth had become extinct while others seemed to have been the ancestors of familiar animals like elephants and horses was a question loaded with cultural assumptions ambiguity and trepidation How humans related to deep developmental processes and whether the Age of Man was qualitatively different from the Age of Mammals led to reflections on humanity's place within the natural world With this book Manias considers the cultural resonance of mammal paleontology from an international perspective how reconstructions of the deep past of fossil mammals across the world conditioned new understandings of nature and the current environment

*After the Dinosaurs* Donald R. Prothero, 2018-11-01 A fascinating study of the thousands of new animal species that walked in the footsteps of the dinosaurs and the climate changes that brought them forth The fascinating group of animals called dinosaurs became extinct some 65 million years ago except for their feathered descendants In their place evolved an enormous variety of land creatures especially mammals which in their way were every bit as remarkable as their Mesozoic cousins The Age of Mammals the Cenozoic Era has never had its Jurassic Park but it was an amazing time in earth's history

populated by a wonderful assortment of bizarre animals The rapid evolution of thousands of species of mammals brought forth many incredible creatures including our own ancestors Their story is part of a larger story of new life emerging from the greenhouse conditions of the Mesozoic warming up dramatically about 55 million years ago and then cooling rapidly so that 33 million years ago the glacial ice returned The earth s vegetation went through equally dramatic changes from tropical jungles in Montana and forests at the poles Life in the sea underwent striking evolution reflecting global climate change including the emergence of such creatures as giant sharks seals sea lions dolphins and whales Engaging and insightful After the Dinosaurs is a book for everyone who has an abiding fascination with the remarkable life of the past     **Prehistoric World** Dougal Dixon,2006 Presents an introduction to the Cenozoic era providing a time line and details about the animals that lived during the Tertiary period     **Close of the Age of Mammals** Fairfield Osborn,1921     *The Hall of the Age of Man* Henry Fairfield Osborn,1923     The Age of Mammals in Europe, Asia and North America Henry Fairfield Osborn,1910     The Age of Mammals Thom Holmes,2009 Highlights fundamental principles of scientific inquiry and provides insight into marsupials and other types of extinct mammals     **The Orders of Mammals** William King Gregory,1910     *The Life of Animals* Ernest Ingersoll,1906     **The Beginning of the Age of Mammals** Kenneth David Rose,2006     **The Childhood of Animals** Sir Peter Chalmers Mitchell,1912     **Country Gentleman** ,1925     *The Age of Mammals* Thom Holmes,2009 Examines the evolution of mammals and birds during the Oligocene and Miocene epochs     *Outline and General Principles of the History of Life* William Diller Matthew,1928     **Southern Medical Journal** ,1915
