*Standing for Reason* John Sexton,2019-04-16 A powerful case for the importance of universities as an antidote to the secular dogmatism that increasingly infects political discourse John Sexton argues that over six decades a secular dogmatism impenetrable by dialogue or reason has come to dominate political discourse in America Political positions elevated to the status of doctrinal truths now simply are revealed Our leaders and our citizens suffer from an allergy to nuance and complexity and the enterprise of thought is in danger Sexton sees our universities the engines of knowledge and stewards of thought as the antidote and he describes the policies university leaders must embrace if their institutions are to serve this role Acknowledging the reality of our increasingly interconnected world and drawing on his experience as president of New York University when it opened campuses in Abu Dhabi and Shanghai Sexton advocates for global network universities as a core aspect of a new educational landscape and as the crucial foundation blocks of an interlocking world characterized by secular ecumenism **Romantic Reassessment** ,1973 **A History of Greek Philosophy: Volume 3, The Fifth**
