Romantic Vignettes Marcia Lynn McClure, 2010-08-30 An Anthology of Three Premiere Novellas by Marcia Lynn McClure

Novella 1 THE UNOBTAINABLE ONE THE CHILD WAS STRAWBERRY SWEET AND LOVING BUT THE MAN WAS FORBIDDEN FRUIT Annette Jordan had accepted the unavoidable reality that she must toil as a governess to provide for herself Annette Jordan had accepted the unavoidable reality that she must toil as a governess to provide for herself Thankfully her charge was a joy a vision of youthful beauty owning a spirit of delight But it was Annette s employer Lord Gareth Barrett who proved to be the trial for she soon found herself living in the all too cliché governess dream of having fallen desperately in love with the man who provided her wages The child loved her but could she endure watching hopelessly as the beautiful woman from a neighboring property won Lord Barrett s affections

Novella 2 THE GENERAL S AMBITIONS SHE HAD BEEN SELECTED TO MARRY AND BEAR THE PROGENY OF THE SON Seemingly over night Renee Millings found herself orphaned and married to the indescribably handsome but ever frowning Roque Montan His father The General was obsessively determined that his

lineage would continue posthaste with or without consent of his son's new bride. But when Roque reveals the existence of a sworn oath that will obstruct his father's ambition, will the villainous General conspire to insure the future of his coveted progeny to be borne by Renee himself? Will Renee find the only means of escape from the odious General to be that of his late wife's death? Or will the son find no tolerance for his father's diabolic plotting concerning the woman Roque legally terms his wife? Novella 3 INDEBTED DELIVERANCE SNOWBOUND AND ISOLATED SHE HAD NO ALTERNATIVE BUT TO ENDURE THE WINTER IN THE COMPANIONSHIP OF THE BRUTAL RACE TREVELIAN

Chalyce LaSalle had been grateful to the handsome recluse Race Trevelian when he had delivered her from certain tragedy one frigid winter day. He was addictively attractive, powerful, and intriguing, and there was something else about him: an air of secreted internal torture. Yet as the brutal character of her emancipator began to manifest, Chalyce commenced in wondering whether the fate she now faced would be any less insufferable than the one from which he had delivered her. Still, his very essence beckoned hers. She was drawn to him, and her soul whispered that his mind needed deliverance as desperately as she had needed rescue that cold winter's noon.

In the medieval country of Noediem, Francois Cassel is squire to the knight Lauchant, who with a company of the King's Guard sets off to rid the southern regions of a raiding band from neighbouring Ballenrue. Lauchant is injured in an encounter with the Ballenrue, but Francois Cassel strikes terror into the raiders, and they flee. King Rochfer of Noediem knights Francois for his deeds but sends him to study with the high priest Yulhara so that he might learn about the strange powers he has exhibited. Yulhara banishes Francois from Noediem for an alleged misdemeanor, and Francois wanders westward into Wuntegrun, only to find that country and the walled town of Kapul gripped with terror by bands of marauding wolves. Convinced the wolves are being organized by a greater power, Francois seeks out the wizard Dreah Gleig, the only one evil enough to concoct such a plan. As Francois fights to rid Kapul and Wuntegrun of an invasion of wolves and Northmen, he finds the Ballenrue raiders are also seeking to exact revenge upon him. On the battle field with wolves, Northmen, and Ballenrue, Francois comes face to face with Dreah Gleig, and the battle of their powers begins.

Discovering Computer Science: Interdisciplinary Problems, Principles, and Python Programming introduces computational problem solving as a vehicle of discovery in a wide variety of disciplines. With a principles-oriented introduction to computational thinking, the text provides a broader and deeper introduction to computer science than typical introductory programming books. Organized around interdisciplinary problem domains rather than programming language features, each chapter guides students through increasingly sophisticated algorithmic and programming techniques. The author uses a spiral approach to introduce Python language features in increasingly complex contexts as the book progresses. The text places programming in the context of

fundamental computer science principles such as abstraction efficiency and algorithmic techniques and offers overviews of fundamental topics that are traditionally put off until later courses The book includes thirty well developed independent projects that encourage students to explore questions across disciplinary boundaries Each is motivated by a problem that students can investigate by developing algorithms and implementing them as Python programs The book s accompanying website <http://discoverCS.denison.edu> includes sample code and data files pointers for further exploration errata and links to Python language references Containing over 600 homework exercises and over 300 integrated reflection questions this textbook is appropriate for a first computer science course for computer science majors an introductory scientific computing course or at a slower pace any introductory computer science course
