Hamilton, Deborah Schiffrin, 2015-03-30 The second edition of the highly successful Handbook of Discourse Analysis has been expanded and thoroughly updated to reflect the very latest research to have developed since the original publication including new theoretical paradigms and discourse analytic models in an authoritative two volume set Twenty new chapters highlight emerging trends and the latest areas of research Contributions reflect the range depth and richness of current research in the field Chapters are written by internationally recognized leaders in their respective fields constituting a Who's Who of Discourse Analysis A vital resource for scholars and students in discourse studies as well as for researchers in related fields who seek authoritative overviews of discourse analytic issues theories and methods *Language and Literacy (RLE Linguistics C: Applied Linguistics)* Michael Stubbs, 2014-01-10 Despite a vast amount of study literacy is still a very confused topic which requires the integration of findings from different areas Reading and writing are psychological skills but they are also linguistic skills since people read and write meaningful language and social skills since written language serves particular functions in different societies In this book Michael Stubbs provides a basis for a sociolinguistic theory of literacy He believes that a systematic theory of literacy must be based on an understanding of a number of factors such as the relationship between written and spoken language including how English spelling works and how it is related to spoken English Also of paramount importance are the social educational and technological pressures on written language which are particularly powerful in the case of an international language like English the social and communicative functions which written language serves largely administrative and intellectual functions and the variability of spoken language and the relative uniformity of written language The book also discusses the arguments behind deprivation theory as an explanation of educational failure Reading failure is not well understood but the author stresses that a vital element is the attitude of teachers towards the child's language He emphasizes that it is important that teachers should understand as much as possible about the relationship between written language and the child's spoken language Such understanding he argues can only increase tolerance of regional social and ethnic diversity in language **Sociolinguistics / Soziolinguistik.
