McDorman, 1999-06-01 The renowned historical linguist Hans Henrich Hock once commented that for reasons that are not well understood there sometimes appear curious gaps in the bilabial slot of languages series of obstruent phonemes Hock based his comment on the observation that if a language lacks a voiceless stop at one of the cardinal points of articulation the missing segment is almost always p Labial Instability in Sound Change Explains the loss of p explains the driving force behind this phenomenon The theory advanced by the book accounts for why over time languages lose the p sound more often than any other voiceless stop sounds of a similar class The book describes the phenomenon of labial instability in articulatory and acoustic terms Labial Instability in Sound Change argues for a particular school of sound change John Ohala's phonetic theory while clarifying the complex relationships among speech perception acoustic and articulatory phonetics language typology and sound change

Consonantal Sound Change in American English Wiebke H. Ahlers, 2023-08-24 Research on sound change often focuses on vowels yet consonantal sound change also offers fascinating insights into language development and variation This pioneering book provides a detailed investigation of consonantal sound change in English by analyzing a large corpus of specifically designed field recordings from Austin Texas It offers one of the most in depth analyses of str retraction to date drawing comparisons with studies of change in the distinguishing phonetic features of other varieties of English and with studies of str retraction in other Germanic languages It further deepens our understanding of sound change by including qualitative data to position the sound change in the social reality of Austin showing that specific sound changes are universally driven by age gender and ethnicity The results provide a testing ground for models of sociolinguistic and sound change and highlight the importance of the social fabric of language in modeling language change

Igartua, Brian D. Joseph, Kirsten Jeppesen Kragh, Lene Schøsler, 2019-06-15 This volume centers on three important theoretical concepts for the study of language change and the ways in which language structure emerges and turns into new structure reanalysis actualization and indexicality Reanalysis is a part of ongoing everyday language use a process through which language is reproduced and changed Actualization refers to the processes through which a reanalyzed structure spreads throughout single communities and society Indexicality covers the way in which parts of a linguistic system can point to other parts of the system both syntagmatically and paradigmatically The inclusion of indexicality leads to fine grained analysis in morphology word order and constructional syntax Language change for the worse Dankmar W. Enke, Larry M. Hyman, Johanna Nichols, Guido Seiler, Thilo Weber, Andreas Hölzl, 2024-09-05 Many theories hold that language change at least on a local level is driven by a need for improvement The present volume explores to what extent this assumption holds true and whether there is a particular type of language change that we dub language change for the worse i.e. change with a worsening effect that cannot be explained away as a side effect of improvement in some other area of the linguistic system The chapters of the volume written by leading junior and senior scholars combine expertise in diachronic and historical linguistics typology and formal modelling They focus on different aspects of grammar phonology morphosyntax semantics in a variety of language families Germanic Romance Austronesian Bantu J Kaingang Wu Chinese Greek Albanian Altaic Indo Aryan and languages of the Caucasus The volume contributes to ongoing theoretical debates and discussions between linguists with different theoretical orientations

Language Change Goparaju Sambasiva Rao, 1994 **In Hot Pursuit of Language in Prehistory** John D. Bengtson, 2008 Compiled in honor and celebration of veteran anthropologist Harold C Fleming this book contains 23 articles by anthropologists in the general sense from the four main disciplines of prehistory archaeology biogenetics paleoanthropology and genetic historical linguistics Because of Professor Fleming's major focus on language he founded the Association for the Study of Language in Prehistory and the journal Mother Tongue the content of the book is heavily tilted toward the study of human language its origins historical development and taxonomy Because of Fleming's extensive field experience in Africa some of the articles deal with African topics This volume is intended to exemplify the principle in the words of Fleming himself that each of the four disciplines is enriched when it combines with any one of the other four The authors are representative of the cutting edge of their respective fields and this book is unusual in including contributions from a wide range of anthropological fields rather than concentrating in any one of them

Ferdinand de Saussure Jonathan D. Culler, 1986 Moshe Shokeid is Professor of Anthropology at Tel Aviv University Literary Studies Language Arts and Biography Moshe Shokeid is Professor of Anthropology at Tel Aviv University Literary Studies Language Arts and Biography Moshe Shokeid is Professor of Anthropology at Tel Aviv University Literary Studies Language Arts and Biography **Historical Linguistics** Charles Jones, 2014-02-04 The contributors to this volume cover the international range of scholarship in the field of Historical Linguistics as well as some of its major themes The work and

ideas they discuss are relevant not only to other aspects of Historical Linguistics but also to more general developments in linguistic theory. Along with Professor Jones' Introduction, their comments provide a major overview of Historical Linguistics that will be the reference point for its development for many years to come and form an important contribution to general theories of linguistic behaviour.
