The Mobilized American West, 1940-2000 John M. Findlay, 2023-07 In the years between 1940 and 2000 the American Far West went from being a relative backwater of the United States to a considerably more developed modern and prosperous region one capable of influencing not just the nation but the world By the dawn of the twenty first century the population of the West had multiplied more than four times since 1940 and western states had transitioned from rural to urban becoming the most urbanized section of the country

Massive investment both private and public in the western economy had produced regional prosperity and the tourism industry had undergone massive expansion altering the ways Americans identified with the West In *The Mobilized American West* 1940 2000 John M Findlay presents a historical overview of the American West in its decades of modern development During the years of U S mobilization for World War II and the Cold War the West remained a significant distinct region even as its development accelerated rapidly and in many ways it became better integrated into the rest of the country By examining events and trends that occurred in the West Findlay argues that a distinctive region wide political culture developed in the western states from a commitment to direct democracy the role played by the federal government in owning and managing such a large amount of land and the way different groups of westerners identified with and defined the region While illustrating western distinctiveness Findlay also aims to show how in its sustaining mobilization for war the region became tethered to the entire nation more than ever before but on its own terms Findlay presents an innovative approach to viewing the American West as a region distinctive of the United States one that occasionally stood ahead of at odds with and even in defiance of the nation

Literature and the Environment George Hart, Scott Slovic, 2004-07-30 The phrase literature and environment only achieved popularity in recent decades yet writers dating back to the explorers of the 1500s and later such 19th century Romanticists as Thoreau have long been addressing environmental issues through literary expression This volume introduces students and educators to the field by tracing the evolution of environmental writing in the United States Chapters written by distinguished scholars offer new perspectives on important environmental issues guiding readers through 11 carefully selected literary works Each chapter provides brief biographical information on the author discussions of the work s structural thematic and stylistic components and insights into the historical context that relates the work to relevant environmental issues Each chapter concludes with information on works cited The analyzed works cover a wide spectrum of literature and span nearly 100 years Included are early writings such as Mary Austin s 1903 *The Land of Little Rain* and famous groundbreaking works such as Rachel Carson s *Silent Spring* 1962 and Gary Snyder s *Turtle Island* 1974 Also included are frequently assigned works of special interest to students such as *The Monkey Wrench Gang* 1975 *The Earthsea Trilogy* 1977 and *Ceremony* 1977 A list of selected further suggested readings completes the volume Students of literature as well as educators looking for new ways to present social issues will find many ideas and much inspiration in this volume

An American Provence Thomas P. Huber, 2011-12-15 I have talked about luscious wines and succulent fruit and exquisite dinners But there may be no more evocative experience of the two valleys than the smell of new mown hay in the fields at dusk If a person were to close their eyes they could not tell if they were in Provence or the North Fork Valley That sweet earthy odor is part of the beauty of these places From *An American Provence* In this poetic personal narrative Thomas P Huber reflects on two seemingly unrelated places the North Fork Valley in western Colorado and the Coulon River Valley in Provence France and finds a shared landscape and sense of place What began as a simple comparison of two like places in distant locations turned into a more complex interesting and personal task Much is similar the light the valleys the climate the agriculture And much is less so the history the geology the physical makeup of villages Using a geographer's eye and passion for the land and people Huber examines the regions similarities and differences to explore the common emotional impact of each region Part intimate travelogue and part case study of geography in the real world *An American Provence* illuminates the importance sense of place plays in who we are *The Sound of Water, The Sound of Wind* Bopjong, 2010 The Sound of Water The Sound of Wind is a compellation of essays from five of Zen Master Bopjongs earlier publications This anthology teaches universal themes in Zen and Buddhist tradition and appeals to a broad audience These simple and expressive essays are filled with deep messages concerning total awareness of the self and the spirit of nature among others
