The Yeasts A Taxonomic Study is a three volume book that covers the taxonomic aspect of yeasts. The main goal of this book is to provide important information about the identification of yeasts. It also discusses the growth tests that can be used to identify different species of yeasts and it examines how the more important species of yeasts provide information for the selection of species needed for biotechnology. Volume 1 discusses the identification, classification and importance of yeasts in the field of biotechnology. Volume 2 focuses on the identification and classification of ascomycetous yeasts. Volume 3 deals with the identification and classification of basidiomycetous yeasts along with the genus *Prototheca*. High quality photomicrographs and line drawings. Detailed phylogenetic trees. *Evaluation of Quality of Fruits and Vegetables* Harold E. Pattee, 2014-11-14  
Acceptance or rejection of any edible commodity whether it is raw or processed is usually conditioned by sensory stimuli. The impact of these stimuli on the decision making process is broadly termed sensory evaluation. Advances in sensory evaluation research have been slow in the past because of the human factor, the necessity to use highly trained sensory panels to conduct this research. High technology in instrumentation and new understandings of sensory evaluations are now combining to make possible quantum jumps forward in sensory evaluation research. It is widely recognized that the sensory aspects of fruits and vegetables are affected by many factors among them environment, variety, cultural practices and handling practices. However, if one attempts to find a general reference or compilation of findings regarding this subject area, there seems to be few, if any available. A survey of the literature does suggest that in the past few years research into specific factors which influence the sensory aspects of fruits and vegetables has increased significantly. This increased interest in sensory research and the renewed national awareness of the value of research into pre and postharvest quality of fruits and vegetables prompted the Flavor Subdivision, Agricultural and Food Chemistry Division, American Chemical Society to sponsor a symposium entitled Sensory Evaluation of Fruits and Vegetables: Effect of Environment, Cultural Practices and Variety during the 1982 meeting in
