Diamond Queens Maureen Mahon, 2020-10-09 African American women have played a pivotal part in rock and roll from laying its foundations and singing chart topping hits to influencing some of the genre's most iconic acts. Despite this, black women's importance to the music's history has been diminished by narratives of rock as a mostly white male enterprise. In *Black Diamond Queens*, Maureen Mahon draws on recordings, press coverage, archival materials and interviews to document the history of African American women in rock and roll between the 1950s and the 1980s. Mahon details the musical contributions and cultural impact of Big Mama Thornton, LaVern Baker, Betty Davis, Tina Turner, Merry Clayton, Labelle, the Shirelles and others, demonstrating how dominant views of gender, race, sexuality and genre affected their careers. By uncovering this hidden history of black women in rock and roll, Mahon reveals a powerful sonic legacy that continues to reverberate into the twenty-first century.

Sweet Land of Liberty Thomas J. Sugrue, 2009-10-13 *Sweet Land of Liberty* is Thomas J. Sugrue's epic account of the abiding quest for racial equality in states from Illinois to New York and of how the intense northern struggle differed from and was inspired by the fight down South. Sugrue's panoramic view sweeps from the 1920s to the present, more than eighty of the most decisive years in American history. He uncovers the forgotten stories of battles to open up lunch counters, beaches and movie theaters in the North; the untold history of struggles against Jim Crow schools in northern towns; the dramatic story of racial conflict in northern cities and suburbs; and the long and tangled histories of integration and black power. Filled with unforgettable characters and riveting incidents and making use of information and accounts both public and private, such as the writings of obscure African American journalists and the records of civil rights and black power groups, *Sweet Land of Liberty* creates an indelible history.

that David Huron proposes in *Sweet Anticipation* grew out of the author's experimental efforts to understand how music evokes emotions. These efforts evolved into a general theory of expectation that will prove informative to readers interested in cognitive science and evolutionary psychology as well as those interested in music. The book describes a set of psychological mechanisms and illustrates how these mechanisms work in the case of music. All examples of notated music can be heard on the Web. Huron proposes that emotions evoked by expectation involve five functionally distinct response systems: reaction responses which engage defensive reflexes; tension responses where uncertainty leads to stress; prediction responses which reward accurate prediction; imagination responses which facilitate deferred gratification; and appraisal responses which occur after conscious thought is engaged. For real world events, these five response systems typically produce a complex mixture of feelings. The book identifies some of the aesthetic possibilities afforded by expectation and shows how common musical devices such as syncopation, cadence, meter, tonality, and climax exploit the psychological opportunities. The theory also provides new insights into the physiological psychology of awe, laughter, and spine-tingling chills. Huron traces the psychology of expectations from the patterns of the physical cultural world through imperfectly learned heuristics used to predict that world to the phenomenal qualia we experienced as we apprehend the world. *Sweet's General Building & Renovation*, 2002

Optimising Sweet Taste in Foods W J Spillane, 2006-07-17. A sweet taste is often a critical component in a consumer's sensory evaluation of a food product. This important book summarises key research on what determines consumer perceptions of sweet taste: the range of sweet tasting compounds and the ways their use in foods can be optimised. The first part of the book reviews factors affecting sweet taste perception. It includes chapters on how taste cells respond to sweet taste compounds; genetic differences in sweet taste perception; the influence of taste, odour, and taste ingredient interactions; and ways of measuring consumer perceptions of sweet taste. Part two discusses the main types of sweet tasting compounds: sucrose, polyols, low-calorie, and reduced-calorie sweeteners. The final part of the book looks at ways of improving the use of sweet tasting compounds, including the range of strategies for developing new natural sweeteners, improving sweetener taste, optimising synergies in sweetener blends, and improving the use of bulk sweeteners. With its distinguished editor and international team of contributors, *Optimising sweet taste in foods* is a standard reference for the food industry in improving low-fat and other foods.
