Blank-Edelman,2000 Some people plan to become administrators The rest of us are thrust into it we are webmasters hobbyists or just the default technical people on staff who are expected to keep things running After some stumbling around repeating the same steps over and over again and occasionally paying the price when we forget one we realize that we must automate these tasks or suffer endless frustration Thus enters Perl The Perl programming language is ideal for writing quick yet powerful scripts that automate many administrative tasks It s modular it s powerful and it s perfect for managing systems and services on many platforms Perl for System Administration is designed for all levels of administrators from hobbyists to card carrying SAGE members sysadmins on multi platform sites Written for several different platforms Unix Windows NT and Mac OS it s a guide to the pockets of administration where Perl
