forms for making things valuable valuing objects in terms of their properties is only one such form The form that plays a central role in the enrichment economy is what the authors call the collection form which values objects based on the gap they fill in a collection This valuation process relies on the creation of narratives which enrich commodities This wide ranging and highly original work makes a major contribution to our understanding of contemporary societies and of how capitalism is changing today It will be of great value to students and scholars in sociology political economy and cultural studies as well as to anyone interested in the social and economic transformations shaping our world
