

SYMBOLIC INTERACTIONISM

The symbolic interaction theory states that the meaning we ascribe to objects, processes, ideas, concepts, and systems are subjective.

EXAMPLE

As a simple example of symbolic interactionism, the word "dog" might evoke a fuzzy, heart-warming emotion in someone who has had mostly friendly experiences with dogs. But another person, who may have been bitten or attacked by dogs, may feel fear and revulsion. The meaning ascribed to the concept of "dog" is different depending on your context.

EXPLANATION

Symbol – Something that represents an object, emotion, process, etc, in the real world. E.g. the word "dog" is a symbol for a four-legged domesticated canine, and "cow" is a symbol for a four-legged bovine.

Interaction – How the meaning of a symbol is interpreted and modified through social interaction. The Hindu villager and the American Christian may lead them to invest the word "cow" with different meanings.
