Art of Darkness Anne Williams, 2009-02-15 *Art of Darkness* is an ambitious attempt to describe the principles governing Gothic literature Ranging across five centuries of fiction drama and verse including tales as diverse as Horace Walpole's *The Castle of Otranto* Shelley's *Frankenstein* Coleridge's *The Rime of the Ancient Mariner* and Freud's *The Mysteries of Enlightenment* Anne Williams proposes three new premises that Gothic is poetic not novelistic in nature that there are two parallel Gothic traditions Male and Female and that the Gothic and the Romantic represent a single literary tradition Building on the psychoanalytic and feminist theory of Julia Kristeva Williams argues that Gothic conventions such as the haunted castle and the family curse signify the fall of the patriarchal family Gothic is therefore poetic in Kristeva's sense because it reveals those others most often identified with the female Williams identifies distinct Male and Female Gothic traditions In the Male plot the protagonist faces a cruel violent and supernatural world without hope of salvation The Female plot by contrast asserts the power of the mind to comprehend a world which though mysterious is ultimately sensible By showing how Coleridge and Keats used both Male and Female Gothic Williams challenges accepted notions about gender and authorship among the Romantics Lucidly and gracefully written *Art of Darkness* alters our understanding of the Gothic tradition of Romanticism and of the relations between gender and genre in literary history

Meaning and Authenticity Cesar Grana, 2023-03-31 This outstanding collection of hitherto unpublished work written over the last fifteen years of the author's life reveals the development and maturation of his ideas about sociology and art and specifically about the relationship between them Grafia sees in the artistic traditions of Western society the sociological sources of our sense of cultural form as well as cultural and intellectual meaning He discusses theories of art and theories of artists as they have changed over time although the book is neither a history of art nor a criticism of specific artistic works Rather it is a defense of the sociology of art Grafia believes that the difficult and ambitious questions in the sociology of art are not merely questions of the proper role or status of the artist or the recognition of art as an ornament perhaps the supreme ornament of our culture He believes that what the sociologist must come to terms with is the view of art as the representation indeed the revelation of what is most telling and pervasive in culture itself This perspective assumes that the most serious claims made for art are in fact inseparable from the unique claims that are made about art Art can make visible what is implicit in our lives Art can put before us a statement of what we are but do not always recognize in ourselves Art is the mask and mimicry through which society gestures to us its ultimate and most poignant

meanings Grafia contends that this vision of art derives from Hegelian aesthetics and he believes that this grand view whether one takes an idealist a literary or a Marxist materialist position also implies a dramatically changed conception of society itself The essays cover a variety of subjects from Marx museums and modern literature to Durkheim Daniel Bell and bullfighting the last being the apotheosis of cultural expression rendered into artistic form Throughout Grafia considers questions of the social origins of our artistic and intellectual traditions the influence of these traditions on our ways of thinking about society and their pervasiveness as standards for social meaning

Civility and Its Discontents Christine T. Sistare, 2004 Contributors from philosophy and political science discuss the observation that civility civic virtue tolerance and socio cultural unity have declined while exploring the nature of civil society the conflict between individual liberty and the common good and the role of law and government policy in weaving the threads of the social fabric From publisher description

Symbolism 14 Rüdiger Ahrens, Klaus Stierstorfer, 2014-12-12 Symbolic representation is a crucial subject for and a potent heuristic instrument of diaspora studies This special focus inquires into the forms and functions of symbols of diaspora both in aesthetic practice and in critical discourse analyzing and theorizing symbols from Shakespeare to Bollywood as well as in critical writings of theorists of diaspora What kinds of symbols and symbolic practices contributors ask are germane to the representation both emic and etic of diasporics and diasporas How are specific symbols and symbolic practices analyzed across the academic fields contributing to diaspora studies Which symbols and symbolic practices inform the academic study of diasporas sometimes unconsciously or without being remarked on To study these phenomena is to engage in a dialogue that aims at refining the theoretical and methodological vocabulary and practice of truly transdisciplinary diaspora studies while attending to the imperative of specificity that inheres in this emerging field The volume collects a range of analyses from social anthropology history and ethnography to literary and film studies all combining readings of individual symbolic practices with meta theoretical reflections

The Deconstruction of Narcissism and the Function of the Object René

Roussillon, 2022-11-18 The Deconstruction of Narcissism and the Function of the Object addresses the topic of narcissistic suffering and presents an innovative take on its psychoanalytic treatment through the deconstruction of its solipsism. Presenting a new approach which builds on intuitions described by Freud and Winnicott, Ren Roussillon introduces the project of reconstructing what remains of narcissistic and solipsistic propositions in the theories of narcissism. Roussillon's work explores his views on narcissism, its multiple pathological manifestations, and its connection to the concept of the object. Spanning topics such as sexualization and desexualization in psychoanalysis, the symbolizing function of the object, transference, and associativity, this new approach to treatment provides more satisfactory therapeutic results than current practice, which seeks to analyze narcissistic impasses from an intrapsychic perspective alone. This book will be of interest to psychoanalytic and psychodynamic clinicians.
