from around the world that have conducted empirical studies on intergroup relationships or have provided significant academic contributions in the area of symbols and collective memories represented in theoretical publications Taken together the contents of the volume provide a rich tapestry of intellectual analyses to the diverse selection of conflict settings from around the globe In addition to the nine case studies there is an introductory chapter which grounds the discussion in current peace psychology literature as well as provides future directions This volume is a valuable resource to many as the focus on symbols can span many disciplines such as political science anthropology sociology psychology and art Furthermore it is of significant interest to all scholars and peace activists studying these various countries and their conflicts
