

The book cover features a detailed, artistic illustration of a neuron. The cell body is a bright, glowing yellow-green, with several long, branching dendrites and axons extending outwards. The branches are colored in shades of green and blue, with some areas appearing to have a textured, almost crystalline surface. The background is a deep, dark blue. The title 'SYNAPTIC SELF' is prominently displayed in the center, enclosed in a white rectangular border. Above the title, the author's name 'Joseph LeDoux' is written in white, followed by 'author of The Emotional Brain' in a smaller font. Below the title, the subtitle 'How Our Brains Become Who We Are' is written in a smaller, italicized font. A yellow ruler is visible on the right side of the book, showing measurements in inches and centimeters.

## **Synaptic Self How Our Brains Become Who We Are:**

*Synaptic Self* Joseph LeDoux, 2003-01-28 In 1996 Joseph LeDoux's *The Emotional Brain* presented a revelatory examination of the biological bases of our emotions and memories. Now the world renowned expert on the brain has produced with a groundbreaking work that tells a more profound story how the little spaces between the neurons, the brain's synapses, are the channels through which we think, act, imagine, feel, and remember. Synapses encode the essence of personality, enabling each of us to function as a distinctive integrated individual from moment to moment. Exploring the functioning of memory, the synaptic basis of mental illness and drug addiction, and the mechanism of self awareness, *Synaptic Self* is a provocative and mind expanding work that is destined to become a classic.

*Synaptic Self* Joseph E. LeDoux, 2002 Joseph LeDoux believes that the synapses, the little spaces between the neurons in our brains, are the key to everything the brain does. They are the channels of communication by which we think, act, imagine, feel, and remember. But synapses do more. They also allow interactions between mental processes, allowing us to remember the important stuff in life better than the trivial. What's more, synapses encode the essence of the individual, allowing us to be the same person from moment to moment, week to week, and year to year. In short, the self is synaptic.

*Synaptic Self* Joseph LeDoux, 2003-01-28 Following up his 1996 *The Emotional Brain*, the world renowned brain expert presents a groundbreaking work that tells a more profound story how the little spaces between the neurons, the brain's synapses, are the channels through which we think, feel, imagine, act, and remember.

*Born to Choose* John H. Falk, 2017-09-05 *Born to Choose* is John H. Falk's compelling account of why and how we make the endless set of choices we do every second of every day of our lives. Synthesizing research from across the biological and social sciences, Falk argues that human choice making is an evolutionarily ancient and complex process. He suggests that all our choices are influenced by very basic and early evolving needs, and that ultimately each choice is designed to support survival in the guise of perceived well being. This engaging book breaks new intellectual ground and enhances our understanding, not just of human choice making, but human behavior overall.

**Architectural Theories of the Environment** Ariane Lourie Harrison, 2013 These essays by architects, theorists, and sustainable designers together provide a framework to help you develop your own guidelines to approaching your work. Introductions define key terms, and nine case studies demonstrate the concepts.

*Illness and Literature in the Low Countries* Jaap Grave, Rick Honings, Bettina Noak, 2015-12-09 From as early as classical antiquity, there has been an interplay between literature and medicine. The first book of Homer's *Iliad* recounts the plague that swept the camp of the Achaeans. While this instance concerns a full length book, it is the aphorism that is of greater importance as a literary technique for the dissemination of medical knowledge from the *Corpus Hippocraticum* of antiquity until the *Aphorismi de cognoscendis et curandis morbis* 1715 by Herman Boerhaave. In addition, the subject of illness and its impact on mankind was explored by great numbers of poetic scholars and scholarly poets. This collection offers fourteen articles which all highlight the relation between disease and

literature It entails a first ever overview of Dutch language research in this field whereby the literary and cultural functions of medical knowledge and the poetics of medical and literary writing are in the focus Patience with God: Faith for People Who Don't Like Religion (or Atheism) Frank Schaeffer,2010-04 Frank Schaeffer has a problem with Dawkins Hitchens Harris Dennett and the rest of the New Atheists the self anointed Brights He also has a problem with the Rick Warrens and Tim LaHayes of the world The problem is that he doesn't see much of a difference between the two camps As Schaeffer puts it they often share the same fallacy truth claims that reek of false certainties I believe that there is an alternative that actually matches the way life is lived rather than how we usually talk about belief Sparing no one and nothing including himself and his fiery evangelical past and invoking subtleties too easily ignored by the pontificators Schaeffer adds much needed nuance to the conversation My writing has smoked out so many individuals who seem to be thinking about the same questions I hope that this book will provide a meeting place for us the scattered refugees of what I'll call The Church of Hopeful Uncertainty

The Much-at-Once Bruce W. Wilshire,2016-02-01 In this capstone work the late Bruce Wilshire seeks to rediscover the fullness of life in the world by way of a more complete activation of the body's potentials Appealing to our powers of hearing and feeling with a special emphasis on music he engages a rich array of composers writers and thinkers ranging from Beethoven and Mahler to Emerson and William James Wilshire builds on James's concept of the much at once to name the superabundance of the world that surrounds nourishes holds and stimulates us that pummels and provokes us that responds to our deepest need to feel ecstatically real *The Fiction of Our Lives* Sandra M. Levy-Achtemeier,2016-11-10 We are the author of our own lives We create re create and co create our stories over the lifetime we have been given in order to make something of ourselves in the process Blending new findings from brain science and psychology with spiritual and theological insights Sandra Levy Achtemeier has written a readable work translating complex scientific and spiritual categories into practical terms that can inform our everyday selves From our evolutionary roots that equip us to sing meaning into our living to the cultural menus we now draw from to script new meaning into our days she has given us an incredible wealth of wisdom to inform the rest of our life journeys Underneath it all Levy Achtemeier makes the case that God's Spirit and call are at the center of our story from our brain synapses to the historical circumstances that impinge on our lives *Plan to Live Forever* Jonathon C. Rushdy, 2018-05-01 *After Injury* explores the practices of forgiveness resentment and apology in three key moments when they were undergoing a dramatic change The three moments are early Christian history for forgiveness the shift from British eighteenth century to Continental nineteenth century philosophers for resentment and the moment in the 1950s postwar world in which British ordinary language philosophers and American sociologists of everyday life theorized what it means to express or perform an apology The debates that arose in those key moments have largely defined our contemporary study of these practices Thinking Outside the Brain Box Arie Bos, 2017-08-17 Is it our brain that produces consciousness Many

people including most scientists hold such a belief founded on a conception of the world that is purely materialistic This worldview sees the brain as some kind of biological computer However modern research shows that our experiences especially in childhood and youth shape the circuits of our brain and even stimulate the brain to grow So to an extent we shape our own brain just through being alive And it is by means of our brain that we develop as a person and form our self with all its associated significance and values In this revealing study of brain body and consciousness Arie Bos examines the limitations of the materialist view to explain our human experience He points to examples where consciousness is not supported by the physical brain or where consciousness appears to survive beyond death Exploring the ideas of free will and responsibility he rejects the view that only physical matter determines our thoughts and actions In doing so he opens a door to a wider spiritual reality **What's So Wrong with Being Absolutely Right** Judy J. Johnson, 2009-12-02 After explaining the dangerous nature of dogmatic belief psychologist Johnson teaches strategies for dealing with dogmatic people and provides suggestions for minimizing the harmful effects of dogmatism in educational political and social institutions
