Psychiatry Board Review Dr. Rajesh Tampi, Dr. Kristina Zdanys, Dr. Mark Oldham, 2017-03-29

The field of psychiatry is evolving rapidly specifically in the areas of classification of many psychiatric disorders, psychopharmacology and psychotherapeutics. The new Diagnostic and Statistical Manual of Mental Disorders DSM-5 which was introduced in 2013 forms the basis of the new classification system in psychiatry. The American Board of Psychiatry and Neurology is also in the process of phasing in DSM-5 criteria to the board examination such that by 2017 the examination material will exclusively reflect the new manual. As psychiatric trainees and psychiatrists prepare for their certification and recertification examinations using the new classification system a new board review textbook is imperative to address these changes in order to prepare them for the certification examinations as well as for their clinical practice. To help with this process we have compiled a list of 1000 questions and answers in psychiatry and neurology using the most current information available in the field and using the DSM-5 classification system. This book has been specifically written for the busy professional who

does not have the time to access numerous resources necessary to prepare for professional examinations

Wu Wei, Negativity, and Depression Siroj Sorajjakool, 2014-06-11 Discover a pastoral approach to depression that combines Eastern wisdom and Western science Wu Wei Negativity and Depression reveals a way to break the cycle of depression not by denying it or fighting it but by the ancient principle of wu wei non trying The bleak cycle of depression starts when people experience negativity They turn inward to try to find self esteem but the negativity strips all the power of self affirmation from them The gap between is and ought how they see themselves and how they want to be is too great to bridge The cycle known as self regulatory perseveration means that depressed persons are caught in a desperate fruitless search for affirmation Instead of self esteem they find self criticism and further negative thoughts Yet they keep looking and looking and looking The more they look for self worth inside the less they find and the harder they try the cycle continues When trying simply doesn t work wu wei the principle of letting go may help break that cycle When trying simply doesn t work wu wei not trying may help Wu wei is the principle of letting go By giving up on the self imposed and unattainable oughts and shoulds the depressed person stops focusing on self Wu wei breaks the cycle of negativity allowing the depressed person to begin to heal Wu Wei Negativity and Depression offers a comprehensive discussion of depression including epidemiology of depression etiology and biological causes psychosocial theories standard treatments of the past and present pastoral care of depressed persons This important book constructs a possible approach to depressed souls weary of fighting and trying to fix themselves Wu Wei Negativity and Depression can bring new hope to those who most need it
