Approach Pankaj Mehra, Benjamin W Wah, 1995-04-26 This book presents a system that learns new load indices and tunes the parameters of given migration policies The key component is a dynamic workload generator that allows off line measurement of task completion times under a wide variety of precisely controlled loading conditions The workload data collected are used for training comparator neural networks a novel architecture for learning to compare functions of time series and for generating a load index to be used by the load balancing strategy Finally the load index traces generated by the comparator networks are used in a population based learning system for tuning the parameters of a given load balancing policy Together the system constitutes an automated strategy learning system for performance driven improvement of existing load balancing software Electric Railway Journal ,1910 *The Street Railway Journal* ,1910 Emerging Trends in Electrical, Communications, and Information Technologies T. Hitendra Sarma, V.
