**Childbirth Across Cultures** Helaine Selin, 2009-12-01 This book will explore the childbirth process through globally diverse perspectives in order to offer a broader context with which to think about birth We will address multiple rituals and management models surrounding the labor and birth process from communities across the globe Labor and birth are biocultural events that are managed in countless ways We are particularly interested in the notion of power Who controls the pregnancy and the birth Is it the hospital the doctor or the in laws and in which cultures does the mother have the control These decisions regarding place of birth position who receives the baby and even how the mother may or may not behave during the actual delivery are all part of the different ways that birth is conducted One chapter of the book will be devoted to midwives and other birth attendants There will also be chapters on the Evolution of Birth on Women s Birth Narratives and on Child Spacing and Breastfeeding This book will bring together global research conducted by professional anthropologists midwives and doctors who work closely with the individuals from the cultures they are writing about offering a unique perspective direct from the cultural group

Down's Syndrome Screening and Reproductive Politics Gareth M. Thomas, 2017-03-16 Nominated for the Foundation of Sociology of Health and Illness Book Prize 2018 In the UK and beyond Down s syndrome screening has become a universal programme in prenatal care But why does screening persist particularly in light of research that highlights pregnant women s ambivalent and problematic experiences with it Drawing on an ethnography of Down s syndrome screening in two UK clinics Thomas explores how and why we are so invested in this practice and what effects this has on those involved Informed by theoretical approaches that privilege the mundane and

micro practices discourses materials and rituals of everyday life *Down's Syndrome Screening and Reproductive Politics* describes the banal world of the clinic and in particular the professionals contained within it who are responsible for delivering this programme In so doing it illustrates how Down's syndrome screening is downgraded and subsequently stabilised as a routine part of a pregnancy Further the book captures how this routinisation is deepened by a systematic but subtle framing of Down's syndrome as a negative pregnancy outcome By unpacking the complex relationships between professionals parents technology policy and clinical practice Thomas identifies how and why screening is successfully routinised and how it is embroiled in both new and familiar debates surrounding pregnancy ethics choice diagnosis care disability and parenthood The book will appeal to academics students and professionals interested in medical sociology medical anthropology science and technology studies STS bioethics genetics and or disability studies **The Oxford**

**Handbook of the Sociology of Disability** Robyn Lewis Brown,Michelle Maroto,David Pettinicchio,2023 The Oxford Handbook of the Sociology of Disability provides foundational chapters on where we have been where we are now and where we must go with research on and in the sociology of disability In doing so the Handbook chapters wrestle with important questions around inequality poverty exclusion political activism and empowerment cultural attitudes global policies and practices and much more **Reproduction, Health, and Medicine** Elizabeth Mitchell Armstrong,Susan Markens,Miranda

R. Waggoner,2019-11-22 At a moment when reproduction is increasingly politicized the volume explores the breadth of contemporary research on reproduction from the perspective of medical sociology illuminating the lived experience of reproduction and offering insights to inform sociology and health policy **The ^AOxford Handbook of Philosophy and Disability** Adam Cureton,David Wasserman,2020-06-12 This Handbook introduces philosophers as well as other scholars in the humanities and social sciences to one of the most dynamic new areas of philosophical inquiry Disability raises some of the deepest conceptual and normative issues about human embodiment and well being dignity respect justice and equality and personal and social identity But it also raises pressing practical questions for educational health reproductive and technology policy and confronts controversial questions about the scope and direction of the human and civil rights movements The Handbook addresses these issues and more with contributions from some of the most prominent philosophers in the field The clarity it brings to these discussions demonstrates fully the continued centrality and importance of philosophical inquiry

*Cesarean Section* Jacqueline H. Wolf,2018-05-15 Why have cesarean sections become so commonplace in the United States Between 1965 and 1987 the cesarean section rate in the United States rose precipitously from 4.5 percent to 25 percent of births By 2009 one in three births was by cesarean a far higher number than the 5-10% rate that the World Health Organization suggests is optimal While physicians largely avoided cesareans through the mid twentieth century by the early twenty first century cesarean section was the most commonly performed surgery in the country Although the procedure can be lifesaving how and why did it become so ubiquitous *Cesarean Section* is the first book to chronicle this history In exploring

the creation of the complex social cultural economic and medical factors leading to the surgery s increase Jacqueline H Wolf describes obstetricians reliance on assorted medical technologies that weakened the skills they had traditionally employed to foster vaginal birth She also reflects on an unsettling malpractice climate prompted in part by a raft of dubious diagnoses that helped to legitimize defensive medicine and a health care system that ensured cesarean birth would be more lucrative than vaginal birth In exaggerating the risks of vaginal birth doctors and patients alike came to view cesareans as normal and increasingly as essential Sweeping change in women s lives beginning in the 1970s cemented this markedly different approach to childbirth Wolf examines the public health effects of a high cesarean rate and explains how the language of reproductive choice has been used to discourage debate about cesareans and the risks associated with the surgery Drawing on data from nineteenth and early twentieth century obstetric logs to better represent the experience of cesarean surgery for women of all classes and races as well as interviews with obstetricians who have performed cesareans and women who have given birth by cesarean *Cesarean Section* is the definitive history of the use of this surgical procedure and its effects on women s and children s health in the United States

**The Tapestry of Culture** Maxine Weisgrau, Abraham Rosman, Paula G. Rubel, 2023-07-10 When we think about society and culture often we think of our own culture the culture in which we were raised or currently live as the default The eleventh edition of *The Tapestry of Culture* uses anthropological tools to translate the concepts ideas and behaviors of other cultures into language recognizable by today s students The book s comparative approach balances the history of ethnography fieldwork and anthropological with today s globalized world including the impact of climate change social movements social media and technology global health issues and shifting political landscapes New to the Eleventh Edition New Chapter 12 Global Health and Wellness examines the historical political and cultural issues that shape disease and health including inequalities in access to physical and mental health services the delivery of health care services and health intervention strategies New Chapter 11 Spaces and Places of Creative Expression explores how social media and internet technologies play a major role in how contemporary audiences view and understand creativity including music dance theater film painting and other performance styles Expanded discussion of the cultural construction of gender and sexuality as well as LGBTQ issues in activism explores gender and sexuality through queer studies and in postcolonial settings Chapter 7 New discussion of critical race theory highlights its contributions to analyzing multiple forms of racism and discrimination while providing an exploration of the challenges of multiculturalism in contexts of nationality ethnicity and political representation Chapter 14 New discussions of environmental anthropology political ecology climate change inequality social movements globalization and transnationalism highlight these contemporary issues as subjects of anthropological inquiry Chapter 1

*Gentle Birth, Gentle Mothering* Sarah Buckley, 2013-02-20 An authoritative guide to natural childbirth and postpartum parenting options from an MD who home birthed her own four children Sarah Buckley might be called a third wave natural birth advocate A doctor and a mother she approaches the question of how a woman and

baby might have the most fulfilling birth experience with respect for the wisdom of both medical science and the human body Using current medical and epidemiological research plus women s experiences including her own she demonstrates that what she calls undisturbed birth is almost always healthier and safer than high technology approaches to birth Her wise counsel on issues like breastfeeding and sleeping during postpartum helps extend the gentle birth experience into a gentle parenting relationship

*Critical Terms for the Study of Gender* Catharine R. Stimpson, Gilbert Herdt, 2014-07-11 Gender systems pervade and regulate human lives in law courts and operating rooms ballparks and poker clubs hair dressing salons and kitchens classrooms and playgroups Exactly how gender works varies from culture to culture and from historical period to historical period but gender is very rarely not at work Nor does gender operate in isolation It is linked to other social structures and sources of identity So write women s studies pioneer Catharine R Stimpson and anthropologist Gilbert Herdt in their introduction to *Critical Terms for the Study of Gender* laying out the wide ranging nature of this interdisciplinary and rapidly changing field The sixth in the series of *Critical Terms* books this volume provides an indispensable introduction to the study of gender through an exploration of key terms that are a part of everyday discourse in this vital subject Following Stimpson and Herdt s careful account of the evolution of gender studies and its relation to women s and sexuality studies the twenty one essays here cast an appropriately broad net spanning the study of gender and sexuality across the humanities and social sciences Written by a distinguished group of scholars each essay presents students with a history of a given term from bodies to utopia and explains the conceptual baggage it carries and the kinds of critical work it can be made to do The contributors offer incisive discussions of topics ranging from desire identity justice and kinship to love race and religion that suggest new directions for the understanding of gender studies The result is an essential reference addressed to students studying gender in very different disciplinary contexts

*Infertility* Robin E. Jensen, 2016-09-29 This book explores the arguments appeals and narratives that have defined the meaning of infertility in the modern history of the United States and Europe Throughout the last century the inability of women to conceive children has been explained by discrepant views that women are individually culpable for their own reproductive health problems or that they require the intervention of medical experts to correct abnormalities Using doctor patient correspondence oral histories and contemporaneous popular and scientific news coverage Robin Jensen parses the often thin rhetorical divide between moralization and medicalization revealing how dominating explanations for infertility have emerged from seemingly competing narratives Her longitudinal account illustrates the ways in which old arguments and appeals do not disappear in the light of new information but instead reemerge at subsequent often seemingly disconnected moments to combine and contend with new assertions Tracing the transformation of language surrounding infertility from barrenness to in fertility this rhetorical analysis both explicates how language was and is used to establish the concept of infertility and shows the implications these rhetorical constructions continue to have for individuals and the societies in which they live
