evaluates the text critical evidence it is obvious that they all believe in the inerrancy and retrievability of the NT text

Hill, 2022-01-11 The First Chapters uncovers the origins of the first paragraph or chapter divisions in copies of the Christian Scriptures Its focal point is the magnificent fourth century Codex Vaticanus Vat gr 1209 B 03 perhaps the single most significant ancient manuscript of the Bible and the oldest material witness to what may be the earliest set of numbered

chapter divisions of the Bible The First Chapters tells the history of textual division starting from when copies of Greek literary works used virtually no spaces marks or other graphic techniques to assist the reader It explores the origins of other numbering systems like the better known Eusebian Canons but its theme is the first set of numbered chapters in Codex Vaticanus what nineteenth century textual critic Samuel P Tregelles labelled the Capitulatio Vaticana It demonstrates that these numbers were not as most have claimed late additions to the codex but belonged integrally to its original production The First Chapters then breaks new ground by showing that the Capitulatio Vaticana has real precursors in some much earlier manuscripts It thus casts light on a long continuous tradition of scribally placed visual guides to the reading and interpreting of Scriptural books Finally The First Chapters exposes abundant new evidence that this early system for marking the sense divisions of Scripture has played a much greater role in the history of exegesis than has previously been imaginable

From Erasmus to Maius An-Ting Yi, 2024-07-22 2025 Manfred Lautenschlaeger Award for Theological Promise The famous Codex Vaticanus is currently regarded as one of the most essential sources for reconstructing the Greek New Testament text Although it had already been used by textual critics

in the sixteenth century the manuscript only rose to the prominent status it now holds during the nineteenth century In this volume Yi writes an extensive scholarly history of Codex Vaticanus and describes its changing perceptions among scholars beginning from Desiderius Erasmus until its editio princeps prepared by Angelus Maius By examining critical editions analysing monographs and articles considering book reviews and pamphlets and delving into archive collections Yi delineates the stages of the manuscript s progression from an ancient manuscript held at the Vatican Library to its designation as the Codex Vaticanus It is a study of the many individuals and their stories surrounding this very manuscript stories about accessibility and the dissemination of knowledge authority and head on collisions between the most learned critics and of continuity and changing paradigms in scholarship All in all this book sets out how Codex Vaticanus became the manuscript par excellence in the history of New Testament textual scholarship

The Invention of Jesus Peter Cresswell,2013-06-06 The Invention of Jesus is a pivotal ground breaking work arguably one of the most important ever written in the field of New Testament textual analysis and one that should direct scholastic endeavour for years to come The author has developed some new techniques and taken an indepth look at the earliest surviving manuscripts of the gospels describing the life and death of Jesus as well as letters attributed to Paul and others to the outposts of the early Church There are papyrus fragments some from as early as the second century and then later manuscripts written on parchment with fewer gaps in the text The vast majority are written in Greek the language of Empire and of the early Church Cresswell carefully analyses the surviving texts to show how doctrines such as the divinity of Jesus and the Resurrection have been progressively introduced into the

narrative By establishing what has been added he defines what part of the character of Jesus the Christian Church has over time invented He provides a solution to a highly unusual and hitherto baffling pattern of scribal cooperation in the New Testament of Codex Sinaiticus Clues within the manuscript show that sheets by a second scribe could not have been generated to correct mistakes as others have since contended These must have been written in a division of labour whose purpose was to introduce doctrinally motivated changes to the text In resolving these puzzles the author reveals something of the struggle that took place in the scriptorium as the early Church manipulated the text to impose its message **The Early Textual Transmission of John** Lonnie Bell, 2018-03-12 In *The Early Textual Transmission of John* Lonnie D Bell utilizes a fresh approach for assessing the character of transmission reflected in the second and third century Greek manuscripts of the Gospel of John The textual transmission of New Testament writings in the period prior to the fourth century has been characterized by a number of scholars as error prone free fluid wild and chaotic This study is an inquiry into the validity of this general characterization Since John is the most attested New Testament book among the early papyri is the best attested in the second century and has the highest number of papyri that share overlapping text it serves well as a case study into the level of fluidity and stability of the New Testament text in the earliest period of transmission
