Handbook of Accounting for Natural Resources Larry D. Crumbley, 1986-08-01 *Handbook of Accounting for Natural Resources* D. Larry Crumbley, 1986-01-01 *Routledge Handbook of Natural Resource Governance in Africa* Hany Besada, Cristina D'Alessandro, Tefsi Golla, 2024-03-13

The Routledge Handbook of Natural Resource Governance in Africa provides a comprehensive analysis of African natural resource governance stretching across the continent and encompassing water land extractive resources and mining Africa's natural resources are not only crucial for the continent from an economic environmental and political perspective but they are also of significant geopolitical importance with direct implication for meeting the global challenges outlined in the Sustainable Development Goals Whether an abundance of natural resources proves to be a curse or a blessing depends on the nature extent and outcome of the effort and experience of an individual country in governing and managing such assets It is with this in mind that this ground breaking handbook brings together experts from across the field of natural resource development to reflect on the varied regime types and paradigms within the continent's natural resource sectors the specific challenges they face and their role within global value chains The book first considers governance for sustainable development and discourses of land and development financing before going on to investigate the regulatory and policy impacts and socioeconomic implications of natural resource management Finally the Handbook situates the African continent within the emerging global energy transition examining trends in South South cooperation and new frontiers for the harnessing of critical tools in a sustainable future for natural resource governance and management Overall the Handbook's in depth analysis provides a unique blend of realism and optimism highlighting the importance of building a new sustainable African resource narrative for shared prosperity The handbook will be an essential read for researchers and policy makers with an interest in sustainable development and natural resource governance in Africa

Nature, Economy and Society Nilanjan Ghosh, Pranab Mukhopadhyay, Amita Shah, Manoj Panda, 2015-09-01 This book presents an enquiry into the interface between nature economy and society which is still in its early stages notwithstanding the commendable progress and advances made in the field of environmental and natural resource economics within the ever expanding boundaries of economics as a discipline It further delineates the evolution of an inter disciplinary framework for analyzing the status the future goals mechanisms and policy instruments that can help move towards a more ecologically sustainable economically beneficial and socially just future A pre requisite for preparing a comprehensive and coherent framework involves unfolding the multiple layers of interconnectedness between the three systems nature economy and society each of which has its own internal consistencies as well as externalities Against this backdrop the book presents scholarly contributions that focus on four broadly defined building blocks namely i accounting for ecosystems services for life and human well being ii impacts of economic growth on ecosystems iii social norms equity and governance and iv alternative approaches to green and socio economic systems The analyses presented by some of the most eminent national and

international scholars address the major environmental challenges that nations around the world face today and consider which specific policy directions at the international and national level are needed In particular the choices India and South Asia now face as development and environment both need to be addressed adequately touch on many of these challenges

Environmental and Natural

Resource Economics Jonathan M. Harris, Brian Roach, 2016-05-05 Harris and Roach present a compact and accessible presentation of the core environmental and resource topics and more with analytical rigor as well as engaging examples and policy discussions They take a broad approach to theoretical analysis using both standard economic and ecological analyses and developing these both from theoretical and practical points of view It assumes a background in basic economics but offers brief review sections on important micro and macroeconomic concepts as well as appendices with more advanced and technical material Extensive instructor and student support materials including PowerPoint slides data updates and student exercises are provided

Accounting for Natural Resources in the Foothills Model Forest Michael Neal Patriquin, William Alexander White, Northern Forestry Centre (Canada), Michelle Margaret Spence, Foothills Model Forest, 2004 Natural resource accounts provide useful information for integrated resource management through the identification of both market non market values This report begins with a review of previous studies investigating the theory application of natural resource accounting It then presents a natural resource accounting case study for the Foothills Model Forest region of Alberta that details value estimates for market components forestry trapping agriculture minerals visitor related industries the rest of the economy non market components recreation subsistence resource use environmental control services such as carbon sequestration and biodiversity maintenance The resulting natural resource account represents a baseline of values that can be used to assess the progress of Weldwood of Canada Ltd toward specific objectives related to resource management goals

Assigning Economic Value to Natural Resources National Research Council, Division on Earth and Life Studies, Commission on Geosciences, Environment and Resources, Commission on Geosciences, Environment, and Resources, 1994-02-01 There has been a lot of discussion among policymakers particularly within the Clinton Administration about how to make U S economic indicators such as GNP more accurately reflect the state of the environment This book explores the major issues and controversies involved in incorporating natural resources and the environment into economic accounts The first section of the volume based largely on a three day workshop of experts in the field explains the possibilities and pitfalls in so called green accounting This is followed by a selection of nine individually authored papers including one by Nobel prize winner Robert Solow that probe scientific aspects of this issues in greater depth

The Taxing Road to Sustainable Growth: Resource Productivity and Corporate Taxation Mark Bowler Smith, 2013 This book explores one way in which a tax system might help promote competitiveness and sustainable development Focusing on the UK corporation tax it recommends the introduction of a Resource Productivity Tax Credit where resource productivity is defined as the money value of outputs relative to the money value of material resource and non renewable energy inputs The book is structured such that it first explores the legal mandate to promote competitiveness and sustainable development as contained in article 3 3 of the Treaty of the European Union It then explores what competitiveness and sustainable development actually mean particularly in an EU policy context through the lenses of Europe 2020 and the EU Sustainable

Development Strategy It concludes that not only is there a great deal of common ground between competitiveness and sustainable development as objectives but that increasing resource productivity is a necessary means to those shared ends After exploring EU tax policy and the relevant rules of the UK corporation tax for evidence of any kind of focus on competitiveness and sustainable development as well as examining the suitability of corporate income taxes as policy instruments for increasing resource productivity the book concludes that there is ample scope for a statutory tax incentive to be appended to the UK corporation tax to help fulfil the article 3 mandate The headline objective of the Resource Productivity Tax Credit is to promote higher resource productivity in the trading activities of individual companies in particular targeted sectors through improvements to the knowledge base of those companies rather than through the increased use of raw materials non renewable energy and or intermediate goods

Nature in the Balance Dieter Helm,Cameron Hepburn,2014 This book addresses the economic and policy issues involved in biodiversity protection It brings together conceptual and empirical work on valuation international agreements the policy instruments and the institutions

Social Costs and Sustainability Olav Hohmeyer,Richard L. Ottinger,Klaus Rennings,2012-12-06 Important progress has been made in recent years in the valuation of social costs of energy and transport This progress has encouraged the insight that systems of Green Accounting considering social costs and policy instruments for the internalization of social costs are necessary tools to realize the worldwide goal of sustainable development This workshop report provides an excellent survey of the latest results of social costs in the energy and transport sector Further the theoretical framework of social costs is extended to a broader concept of sustainable development Finally concepts and first experiences of the internalization of social costs e g through least cost planning or an ecological tax reform are reviewed
