Lavallee, 2011-08-09 The emotional highs and lows of competitive sport whether experienced as a competitor spectator or coach may be the essential ingredient that gives sport its universal and compelling appeal Emotion is clearly a pervasive force within competitive sport and this is reflected in the burgeoning interest over recent decades in athletes emotions and strategies for coping with these emotions The interplay between emotion and coping is a critical factor in determining through its influence on key psychological functions an athlete s potential success in competitive sport This fully revised and updated edition of the classic text on coping and emotion in sport goes further than any other book in examining the central role that these two factors play in sports performance The book explores theory and measurement current research and contemporary issues and special populations respectively Each chapter closely integrates cutting edge research themes with discussion of practical and applied issues with case studies and reflections from practitioners working in elite sport woven throughout the book With contributions from leading international scholars and consultant psychologists this book is vital reading for all students and professionals working in sport psychology **The Positive Psychology of Personal Factors**

Dana S. Dunn, Michael L. Wehmeyer, 2022-01-17 Historically interventions designed to impact the lives of disabled people were predicated upon deficits based models of disability This began to change with the introduction of World Health Organization WHO frameworks particularly the International Classification of Function ICF that emphasized that disability could only be understood in the context of interactions among health environmental factors and personal factors and by examining the impact of such factors on a person s activities and participation The ICF identified personal factors as among the elements of a social ecological model of disability but did not provide an extensive taxonomy of what constitutes such factors The Positive Psychology of Personal Factors examines personal factors that come from the field of positive psychology and as such to begin to identify and build strengths based approaches to promoting the full participation dignity and well being of disabled people *Prisoner Reentry in the 21st Century* Keesha M. Middlemass, Calvin John Smiley, 2019-11-04 This

groundbreaking edited volume evaluates prisoner reentry using a critical approach to demonstrate how the many issues surrounding reentry do not merely intersect but are in fact reinforcing and interdependent. The number of former incarcerated persons with a felony conviction living in the United States has grown significantly in the last decade, reaching into the millions. When men and women are released from prison, their journey encompasses a range of challenges that are unique to each individual, including physical and mental illnesses, substance abuse, gender identity, complicated family dynamics, the denial of rights, and the inability to voice their experiences about returning home. Although scholars focus on the obstacles former prisoners encounter and how to reduce recidivism rates, the main challenge of prisoner reentry is how multiple interdependent issues overlap in complex ways. By examining prisoner reentry from various critical perspectives, this volume depicts how the carceral continuum from incarceration to reentry negatively impacts individuals, families, and communities; how the criminal justice system extends different forms of social control that break social networks; and how the shifting nature of prisoner reentry has created new and complicated obstacles to those affected by the criminal justice system. This volume explores these realities with respect to a range of social, community, political, and policy issues that former incarcerated persons must navigate to successfully reenter society. A springboard for future critical research and policy discussions, this book will be of interest to U.S. and international researchers and practitioners interested in the topic of prisoner reentry, as well as graduate and upper-level undergraduate students concerned with contemporary issues in corrections, community-based corrections, critical issues in criminal justice, criminal justice policies, and reentry.

The Handbook of Evolutionary Psychology David M. Buss, 2005-07-15. The foundations of practice and the most recent discoveries in the intriguing new field of evolutionary psychology. Why is the mind designed the way it is? How does input from the environment interact with the mind to produce behavior? By taking aim at such questions, the science of evolutionary psychology has emerged as a vibrant new discipline producing groundbreaking insights. In *The Handbook of Evolutionary Psychology*, leading contributors discuss the foundations of the field as well as recent discoveries currently shaping this burgeoning area of psychology. Guided by an editorial board made up of such luminaries as Leda Cosmides, John Tooby, Don Symons, Steve Pinker, Martin Daly, Margo Wilson, and Helena Cronin, the text's chapters delve into a comprehensive range of topics covering the full range of the discipline: Foundations of evolutionary psychology, Survival, Mating, Parenting, and kinship, Group living, Interfaces with traditional disciplines of evolutionary psychology, and Interfaces across disciplines. In addition to an in-depth survey of the theory and practice of evolutionary psychology, the text also features an enlightening discussion of this discipline in the context of the law, medicine, and culture. An Afterword by Richard Dawkins provides some final thoughts from the renowned writer and exponent of evolutionary theory. Designed to set the standard for handbooks in the field, *The Handbook of Evolutionary Psychology* is an indispensable reference tool for every evolutionary psychologist and student.

Psychotherapy and Aphasia Kate Meredith, Giles Yeates, 2019-12-05 Psychotherapy and Aphasia Interventions for Emotional Wellbeing and Relationships is an exciting international collaboration among clinical neuropsychologists speech and language therapists and family therapists that details a range of innovative psychotherapeutic interventions to enable people with communication disorders and their families to access meaningful support. People with aphasia and other acquired communication disorders can face significant challenges accessing emotional support. Many traditional forms of psychotherapy are based on spoken language rendering it inaccessible for many people with communication disorders. But the book details a range of techniques that move away from reliance on spoken language including total communication strategies, the use of meaningful objects, experiential process, group experience and mind/body practices. Featuring clinical examples which cover a range of stroke and neurology service contexts, the book includes contributions from a range of therapeutic models from speech and language therapy and family therapy to clinical neuropsychology, cognitive behavioural, systemic narrative and mind/body traditions. It therefore provides clinicians with a wide range of practical and theoretical tools to explore when supporting survivors who experience psychological distress during rehabilitation. It is the only book aimed at both speech and language therapists and psychotherapists and will open up new pathways to support.

Psychosocial Health and Well-being in High-Level Athletes Nick Galli, 2019-05-03 The psychological health of competitive athletes is of paramount importance to performance, retention and well-being in sport and national governing bodies are increasingly concerned with its promotion. Psychosocial Health and Well-being in High Level Athletes offers students, researchers and practicing sport psychologists an accessible and rigorous grounding in the manifestations of psychosocial health in athletes, the threats athletes face to their psychosocial health and the interventions which can be designed to enhance it. Seeking to guide future research and expand professional understanding of psychosocial issues in sport, the book is based on a model of cognitive, emotional, social and spiritual health. It clearly defines these dimensions in a sporting context before discussing pertinent threats such as career transitions, injuries and abuse and interventions including adversarial growth, life skill interventions, prevention and organization policy and mindfulness based interventions. Providing an innovative and integrated perspective on psychosocial health and well-being in competitive sport, this book is essential reading for upper level students taking any clinical sport psychology modules and for sport psychologists, coaches and administrators working with competitive athletes.
