Featuring 100 photographs of Frank Sinatra working with orchestras and arrangers, listening to playbacks and, of course, singing, this book tells the whole story of how he created the Sinatra sound and translated the most intense personal emotions into richly worked-out songs of unrivalled expressiveness. One of the thrills of listening to Sinatra is wondering how he did it, and this book explains it all, bringing the dedicated fan and the casual music lover alike into the recording studio to witness the fascinating working methods he introduced and mastered in his quest for recorded perfection. Revealed is how, in addition to introducing and perfecting a unique vocal style, Sinatra was also his own in-studio producer, personally supervising every aspect of his recordings, from choosing the songs and arrangers to making minute adjustments in microphone placement. The Baroque Cello Revival

Paul R. Laird, 2004-09-20. This resource considers the Baroque cello's revival as part of the period instrument movement, from the viewpoints of over forty cellists from three generations and four luthiers who have worked on period cellos. What emerges is a nuanced and detailed picture of the cello in the past and present, and the varied instruments now played under the label Baroque cello. Period instruments played with appropriate techniques have become a major presence in classical music in recent decades. For the cello, which changed substantially between the end of the sixteenth and early eighteenth centuries, it is challenging to describe specific traits for certain time periods, let alone how it was played in those periods. By chronicling the searches of over forty top cellists in England, Europe, and North America, the author goes far in revealing the great variety of forms that exist. This is the first study in which the revival of a single period instrument has been considered in such qualified detail, and will be of great interest to musicologists, luthiers, and anyone interested in string history. **The**
