Sound And Silences:

The Sound of Silence Nancy Epton, 2024-01-11 The Sound of Silence explores how non verbal communication in film shown primarily through the acting of Ryan Gosling provides an expressive space in which passive audience viewing is made more active by removing the expository signifier of dialogue The German Expressionist era may have been brief but the shadows cast since its end nonetheless loom large The silhouetted cigar wielding men of film noir and their respectively dark doom laden haunts mirror the angst inducing atmospheres of their forebearers while also introducing the now familiar figure of the silent hero Considering the numerous silent hero actors in film history there s one that stands out in the 21st century like no other Ryan Gosling His later career has seen some of the most iconic silent heroes of the past decade with films such as Drive Only God Forgives Blade Runner 2049 and First Man cementing him as the go to guy for a monosyllabic taciturn and moody hero whose actions speak louder than words This book argues that it is Gosling s expressive capabilities that keep audiences compelled by his performances With the use of non verbal silence combined with its counterbalance sound a more active emotive audience response can be achieved Looking further into this idea through theorists such as Michel Chion and Susan Sontag the book demonstrates that the sound of silence is one of the most meaningful cinematic sounds of all

Images, Improvisations, Sound, and Silence from 1000 to 1800 - Degree Zero Babette Hellemans, Alissa Jones Nelson, 2025-10-01 The act of drawing a line or uttering a word is often seen as integral to the process of making art This is especially obvious in music and the visual arts but applies to literature performance and other arts as well These collected essays written by scholars from diverse fields take a historical view of the richness of creation out of nothing creatio ex nihilo in order to draw out debates sometimes implicit and sometimes formally stated about the production and reproduction of cultural meaning in a period of great change and novelty between the beginnings of the medieval intellectual tradition and the imprint of the Enlightenment The authors pose the following questions Do tradition and creativity conflict with one another or are they complementary What are the tensions between composition and live performance What is the role of the audience in perceiving the object of art Are such objects fixed or flexible What about the status of the event Is the event part of creation in the sense that it disturbs the still waters of historical continuity These and other questions build on the foundation of Roland Barthes concept of Degree Zero offering new insights into what it means to create *Minds on Music* Michele Kaschub, Janice P. Smith, 2009-06-15 This textbook enhances preservice and practicing music educators understanding of ways to successfully engage children in music composition It offers both a rationale for the presence of composition in the music education program and a thorough review of what we know of children s compositional practices to date Minds On Music offers a solid foundation for planning and implementing composition lessons with students in grades PreK 12 Silence, Sounds, Music Florian Freitag, Laura Katharina Mücke, Peter Niedermüller, 2025-02-20 This book examines the intersections of silence with immersive arts and experiences Silence and immersion may seem antithetical

while immersion is supposedly induced by acoustic and other stimuli silence is commonly understood as the absence or opposite of sound Since the eighteenth century however silence has been established as a multifarious and polyvalent cultural concept Immersion in turn though often used as a simple all inclusive term has old and complex ontological and epistemological roots Organized into three parts this book brings critical historical and theoretical debates on silence into dialogue with different notions of immersion The 16 theoretical articles and case studies engage in discovering and questioning the continued prominence of both concepts in aesthetics culture and media Covering music film digital visual and performance art theater video games and theme parks the chapters discuss both highly canonical and rarely examined artifacts Written by scholars from Germany Austria France and Switzerland the interdisciplinary collection includes perspectives from musicology film studies cultural and media studies gender studies art history and philosophy *Silence Sounds Music* addresses both an academic and a wider audience It will be of interest to anyone interested in music sound immersive experiences the so called experience economy and contemporary art and culture *The Routledge Companion to Creativities in Music Education* Clint Randles, Pamela Burnard, 2022-12-30 Viewing the plurality of creativity in music as being of paramount importance to the field of music education *The Routledge Companion to Creativities in Music Education* provides a wide ranging survey of practice and research perspectives Bringing together philosophical and applied foundations this volume draws together an array of international contributors including leading and emerging scholars to illuminate the multiple forms creativity can take in the music classroom and how new insights from research can inform pedagogical approaches In over 50 chapters it addresses theory practice research change initiatives community and broadening perspectives A vital resource for music education researchers practitioners and students this volume helps advance the discourse on creativities in music education *Sound and Silence* John Paynter, 1979 *Adoor Gopalakrishnan* Gautaman Bhaskaran, 2010 On the life and works of Adoor Gopalakrishnan b 1941 Malayalam film director *Decent People* Norman S. Care, 2000-10-11 In this book Norman S Care addresses the question of what it is to be a good or decent person His discussion is centered on motivation issues rather than on the content of moral principles or the imperatives of ethical theory He argues that decent people are constrained by moral emotional nature to take certain things seriously and this is part of what it means to have a moral life The background of the discussion is the world around us The world is no extension of the affluence that shields a few of us it is instead a sea of pain and despair with only small and sometimes temporary islands of stability and prosperity ***The Etude***, 1901 A monthly journal for the musician the music student and all music lovers *Rendezvous with the Sensuous* John Murungi, 2014-03-17 In *Rendezvous with the Sensuous* readers are drawn to and become situated within the dynamic place of the aesthetic experience While there human sensuousness comes into relief as it combines with the sensuousness that derives from nature In this complex place where artistic expression coalesces with the natural world readers are extended an invitation to share in the journey of a richly diverse synesthetic experience and to

gain a greater appreciation of the important place of the sensuous in illuminating the role of aesthetics in the world of ideas

Concealed Silences and Inaudible Voices in Political Thinking Michael Freeden, 2022 This book investigates silence as a normal ubiquitous and indispensable element of political thinking theory and language It explores the diverse dimensions in which silences mould the different core features of the political as a highly flexible power resource both enabling and constraining major social practices traditions and currents *Number to Sound* P. Gozza, 2013-03-09 Number 10 Sound The Musical Way 10 the Scientific Revolution is a collection of twelve essays by writers from the fields of musicology and the history of science The essays show the idea of music held by European intellectuals who lived from the second half of the 15 century to the early 17 physicians e g Marsilio Ficino scholars of musical theory e g Gioseffo Zarlino Vincenzo Galilei natural philosophers e g Francis Bacon Isaac Beeckman Marin Mersenne astronomers and mathematicians e g Johannes Kepler Galileo Galilei Together with other people of the time whom the Reader will meet in the course of the book these intellectuals share an idea of music that is far removed from the way it is commonly conceived nowadays it is the idea of music as a science whose object musical sound can be quantified and demonstrated or enquired into experimentally with the methods and instruments of modern scientific enquiry In this conception music to be heard is a complex variable structure based on few simple elements e g musical intervals combined according to rules and criteria which vary along with the different ages However the varieties of music created by men would not exist if they were not based on certain musical models e g the consonances which exist in the mind of God or are hidden in the womb of Nature which man discovers and demonstrates and finally translates into the language of sounds **It's Silence, Soundly** John McGreal, 2016-04-21 It's Silence Soundly It's Nothing Seriously and It's Absence Presently continue The It Series published by Matador since The Book of It 2010 They constitute another stage in an artistic journey exploring the visual and aural dialectic of mark word and image that began over 25 years ago In their aesthetic form the books are a decentred trilogy united together in a new concept of The Bibliograph All three present this new aesthetic object which transcends the narrow limits of the academic bibliography The alphabetical works also share a tripartite structure and identical length The Bibliograph itself is characterised by its strategic place within each book as a whole as well as by the complex variations in meaning of the dominant motifs nothingness absence and silence which recur throughout the alphabetical entries that constitute the elements of each text It's Nothing Seriously for example addresses the amusing paradox that so much continues to be written today about nothing The aleatory character of the entries in the texts encourage the modern reader to reflect on each theme and to read them in a new way The reader is invited as well to examine their various intertextual relations across given conventional boundaries in the arts and sciences at several levels of physical psychical social reproduction *"Silence, Music, Silent Music"* Nicky Losseff, 2017-07-05 The contributions in this volume focus on the ways in which silence and music relate contemplate each other and provide new avenues for addressing and gaining

understanding of various realms of human endeavour The book maps out this little explored aspect of the sonic arena with the intention of defining the breadth of scope and to introduce interdisciplinary paths of exploration as a way forward for future discourse Topics addressed include the idea of silent music in the work of English philosopher Peter Sterry and Spanish Jesuit St John of the Cross the apparently paradoxical contemplation of silence through the medium of music by Messiaen and the relationship between silence and faith the aesthetics of Susan Sontag applied to Cage's idea of silence silence as a different means of understanding musical texture ways of thinking about silences in music produced during therapy sessions as a form of communication music and silence in film including the idea that music can function as silence and the function of silence in early chant Perhaps the most all pervasive theme of the book is that of silence and nothingness music and spirituality a theme that has appeared in writings on John Cage but not in a broader sense in scholarly writing The book reveals that unexpected concepts and ways of thinking emerge from looking at sound in relation to its antithesis encompassing not just Western art traditions but the relationship between music silence the human psyche and sociological trends ultimately providing deeper understanding of the elemental places both music and silence hold within world philosophies and fundamental states of being Silence Music Silent Music will appeal to those working in the fields of musicology psychology of religion gender studies aesthetics and philosophy

Quantifying Music H.F. Cohen, 2013-11-11

The soul rejoices in perceiving harmonious sound when the sound is not harmonious it is grieved From these affects of the soul are derived the name of consonances for the harmonic proportions and the name of dissonances for the unharmonic proportions When to this is added the other harmonic proportion which consists of the longer or shorter duration of musical sound then the soul stirs the body to jumping dance the tongue to inspired speech according to the same laws The artisans accommodate to these harmonies the blows of their hammers the soldiers their pace As long as the harmonies endure everything is alive everything stiffens when they are disturbed Thus the German astronomer Johannes Kepler evokes the power of music Where does this power come from What properties of music enable it to stir up emotions which may go far beyond just feeling generally pleased and which may express themselves for instance in weeping in laughing in trembling over the whole body in a marked acceleration of breathing and heartbeat in participating in the rhythm with the head the hands the arms and the feet From the beginning of musical theory the answer to this question has been sought in two different directions

Listening to Noise and Silence Salomé Voegelin, 2010-03-31 Listening to Noise and Silence engages with the emerging practice of sound art and the concurrent development of a discourse and theory of sound In this original and challenging work Salomé Voegelin immerses the reader in concepts of listening to sound artwork and the everyday acoustic environment establishing an aesthetics and philosophy of sound and promoting the notion of a sonic sensibility A multitude of sound works are discussed by lesser known contemporary artists and composers for example Curgenven Gasson and Federer historical figures in the field Artaud Feldman and Cage and that of contemporary canonic

artists such as Janet Cardiff Bill Fontana Bernard Parmegiani and Merzbow Informed by the ideas of Adorno Merleau Ponty and others the book aims to come to a critique of sound art from its soundings rather than in relation to abstracted themes and pre existing categories Listening to Noise and Silence broadens the discussion surrounding sound art and opens up the field for others to follow **A Sound Word Almanac** Bernd Herzogenrath,2023-12-14 This almanac of sound words important to artists and scholars highlights words that expand the way we speak and write about sonic experiences Why write about sound and how If sonic philosophy is the attempt to think about sound by philosophical means then a metaphilosophical debate appears almost immediately on the horizon What is called for is an understanding about sound and language but also about the preconditions of musical understanding What is at stake is the question of language and sound as well as expanding how we speak about sonic experience This almanac tackles these questions from artistic experimental and personal perspectives An assemblage of nearly 70 practitioners and theoreticians artists and scholars offer their favorite sound word These sound words are onomatopoeical mythological practical words of personal importance to the artists and their craft words from their memory related to sound Many entries are not in English some are untranslatable and all are accompanied by a personal explanatory poetic entry These are words that have the potential to change our perspective on listening musicking thinking The 'Imagined Sound' of Australian Literature and Music Joseph Cummins,2019-09-20
