**Sound of Sirens** Jen Minkman, An ancient land protected by a Tower of Light its people ever tempted by Siren song and a girl who falls for the wrong boy On the island of Skylge electricity is only for the Currents the rich ruling class who once came from across the sea and brought the holy fire of St Brandan to Skylge Ever since the light in the Brandaris Tower has protected the islanders Heeding the Siren s call will drown your body and steal your soul but the sacred light in the Tower will chase the merfolk away When Skylger girl Enna welcomes her brother back from a long sea voyage he gives her a special present from the mainland an electronic record only playable on a Current device The problem is that Royce Bolton Current heartthrob and the town s most gifted pianist wants it too After she stubbornly refuses to sell the LP featuring his favorite artist he suggests sharing the record by secretly meeting up in his private summer house Taken aback yet thrilled Enna agrees and discovers that there s more than meets the eye when it comes to Current society and the history of Skylge Why do the Sirens tempt the islanders to give themselves up to the sea And where does the Currents monopoly on electricity really come from While struggling with these questions Enna begins to fall for Royce risking everything to be with a guy who is clearly wrong for her She will learn that the sound of Sirens isn t the most treacherous thing out there to haunt her dreams

Sirens are sounds that confront us in daily life from the sounds of police cars and fire engines to less often tornado warnings Ideologies of sirens embody the protective the seductive and the dangerous elements of siren sounds from the US Cold War public training exercises in the 1950s and 1960s to the seductive power of the sirens entrenched in popular culture from Wagner to Dizzee Rascal from Kafka to Kurt Vonnegut from Hans Christian Andersen to Walt Disney This book argues using a wide array of theorists from Adorno to Bloch and Kittler that we should understand siren sounds in terms of their myth and materiality and that sirens represent a sonic confluence of power gender and destructiveness embedded in core Western ideologies to the present day Bull poses the question of whether we can rely on sirens both in their mythic meanings and in their material meanings in contemporary culture **The Music and Sound of Experimental Film** Holly Rogers,Jeremy Barham,2017-06-29 This book explores music sound image relationships in non mainstream screen repertoire from the earliest examples of experimental audiovisuality to the most recent forms of expanded and digital technology It challenges presumptions of visual primacy in experimental cinema and rethinks screen music discourse in light of the aesthetics of non commercial imperatives Several themes run through the book connecting with and significantly enlarging upon current critical discourse surrounding realism and audibility in the fiction film the role of music in mainstream cinema and the audiovisual strategies of experimental film The contributors investigate repertoires and artists from Europe and the USA through the critical lenses of synchronicity and animated sound interrelations of experimentation in image and sound audiovisual synchresis and dissonance experimental soundscape traditions found footage film re mediation of pre existent

**Czech and Polish Sound Memories of the Second World War** Radmila Švaříčková Slabáková, Marcin Filipowicz, Dobrawa Lisak-Gębala, Sławomir Wieczorek, Andrea Hanáčková, 2025-11-03 This book investigates the crucial yet often overlooked role of sound in shaping the memory of the Second World War Through an interdisciplinary and transnational approach this volume addresses a notable gap in memory studies and argues that auditory experiences are central to how war is remembered commemorated and narrated By placing sound at the heart of collective remembrance this book reveals how sonic elements influence public discourse shape collective identities and contribute to the evolving transformation of war memory Bringing together scholars from the Czech Republic and Poland this volume examines how the Second World War has been remembered through sound since the 1990s across three distinct media museum exhibitions prose fiction and sound art including soundwalks and field recordings This innovative framework underscores the importance of exploring how different media evoke and reproduce sound to grasp the complexity and diversity of wartime memory in Central Europe Focusing on Czech and Polish memory cultures the book demonstrates that sound may function in multiple and sometimes contradictory ways as a means of reinforcing national narratives as a tool for critical engagement or as a medium for experimental and marginal perspectives This volume is essential reading for scholars in memory studies sound studies cultural and public history museology literary theory and musicology as well as for museum professionals and anyone interested in how the past resonates literally and metaphorically through sound

**Sensing Sound** Nina Sun Eidsheim, 2015-11-19 In Sensing Sound Nina Sun Eidsheim offers a vibrational theory of music that radically re envisions how we think about sound music and listening Eidsheim shows how sound music and listening are dynamic and contextually dependent rather than being fixed knowable and constant She uses twenty first century operas by Juliana Snapper Meredith Monk Christopher Cerrone and Alba Triana as case studies to challenge common assumptions about sound such as air being the default medium through which it travels and to demonstrate the importance a performance s location and reception play in its contingency By theorizing the voice as an object of knowledge and rejecting the notion of an a priori definition of sound Eidsheim releases the voice from a constraining set of fixed concepts and meanings In Eidsheim s theory music consists of aural tactile spatial physical material and vibrational sensations This expanded definition of music as manifested through material and personal relations suggests that we are all connected to each other in and through sound Sensing Sound will appeal to readers interested in sound studies new musicology contemporary opera and performance studies

Sound Moves Michael Bull,2015-03-24 This innovative study opens up a new area in sociological and urban studies the aural experience of the social mediated through mobile technologies of communication Whilst we live in a world dominated by visual epistemologies of urban experience Michael Bull argues that it is not surprising that the Apple iPod a sound based technology is the first consumer cultural icon of the twenty first century This book in using the example of the Apple iPod investigates the way in which we use sound to construct key areas of our daily lives The author argues that the Apple iPod acts as an urban Sherpa for many of its users and in doing so joins the mobile army of technologies that many of us habitually use to accompany our daily lives Through our use of such mobile and largely sound based devices the book demonstrates how and why the spaces of the city are being transformed right in front of our ears      **Principles of Sound and Their**
