## **Swimming Upstream Teaching And Learning Psychotherapy In A Biological Era:**

*Swimming Upstream* Jerry M. Lewis, 2013-10-28 First published in 1991 The experiential base from which this book is written the author's seminar for psychiatric residents which emphasizes that self disclosure with colleagues is an important aspect of becoming a therapist The ability to look at and listen to one's own work along with one's peers is important in the maturation process In order to construct a context in which it is possible to learn from each other I share many of my own psychotherapeutic experiences More than this however Lewis shares personal experiences when they seem appropriate to the teaching learning process

*Self-Supervision* Patrick J. Morrisette, 2021-08-23 Self Supervision synthesizes the literature on the theory and practice of self supervision and provides counselors and human service professionals with a plan for the pursuit of independent professional growth The classic edition includes a new preface from the author reflecting on his work and on the changes in society and the field since the book's initial publication In these chapters professionals will find cost effective and efficient strategies for developing their skills while still ensuring that they're providing quality treatment They'll also find a diverse array of strategies for self supervision and a thoughtful discussion of reflective processes required to effectively evaluate one's own practices

**Doing Better** Jeffrey Kottler, W. Paul Jones, 2004-11-23 Doing Better is intended to help therapists and counselors to explore more fully and systematically the processes of self improvement in their work and lives

Famous Marriages Jerry M. Lewis M. D., Jerry Lewis, 2005-11 Everyone brings differing expectations and a variable capacity for compromising to the marital relationship These personality characteristics play a large role in determining how satisfying the relationship will be perceived as being By studying the marriages of ten famous couples including Franklin and Eleanor Roosevelt The Duke and Duchess of Windsor and Robert and Elizabeth Barrett Browning Dr Jerry M Lewis examines what they can teach us about what works and what doesn't work in constructing this life altering relationship Dr Lewis relies on over thirty years of research on marital family systems His studies focus on the important differences between those relationships that promote growth heal early wounds or are destructive to all concerned Marriages are for better or worse They encourage the individual psychological maturity of husbands and wives as well as their children But when it's severely dysfunctional it may contribute to the development of psychiatric disorders Marriage and other long term committed relationships also decisively influence life satisfaction physical health and the establishment of life's meaning Learn from the mistakes and triumphs of famous marriages to make your own marriage stronger and healthier

**Marriage A Search For Healing** Jerry M. Lewis, 2013-06-17 This work reveals those key elements that make for greater bonding with couples in therapy The author believes that improvement in the couples he treats almost always involves greater closeness and the development of greater capacity for intimacy Change can come about in different ways for different couples For some insight appears to play an important role Learning about one's central problematic relationship of childhood and its re

enactment with one's partner in adult life frequently involves also learning about the ways one subtly recreates this dysfunctional relationship structure. For others improvement appears to be closely related to experiencing new ways of dealing with conflict. This avenue of improvement relies in part on the understanding but even more on learning the approaches to conflict resolution. It is as if these couples need to hear over and over again the recordings that document their insensitivities and consequent failure. They must offer Each Other The Experiences That Are Emotionally Supportive And Crucial for emotional and physical health and also give life its meaning. Finally the treatment approach outline also has significant effects on the therapists. Indeed it may be difficult to know who learns most. Involvement as a couples therapist may have all sorts of impact on the therapists and it will come as surprise that it is in the area of the therapist's capacity for intimacy that the greatest effect can be experienced.

**Effective Interviewing of Children** Michael Zwiers, Patrick J. Morrisette, 2013-08-21 Interviews comprise the majority of professionals' interactions with children. In order to conduct effective interviews professionals must possess effective communication skills as well as knowledge of growth and developmental issues, data collection and analysis. Though this is an important area of study there has yet to be a book that effectively addresses this topic. In most cases students studying to become clinicians are forced to rely on the observations of practicing professionals to learn child focused interview techniques. *Effective Interviewing of Children* is unique in that it is the only comprehensive resource for information on child focused interviews. The authors differentiate between child and adult focused interviews, present an integrated account of the literature on child focused interviews and offer techniques and suggestions for addressing developmental differences. Chapters address a wide range of topics including child and professional variables, effective use of language, children with special needs, ethics in interviewing, research interviews and diagnostic clinical interviews. Aimed at upper level undergraduate and graduate students, this book is essential for clinically oriented programs such as mental health counseling, social work, psychology and marriage and family therapy. The book is also of interest to practicing professionals who seek to expand their knowledge of child focused interview techniques.

Lewis, 1996 Now a distinguished psychiatrist draws on his 40 years of research and treatment of individuals, couples and families to describe the basic nature of these relationships and how they shape our lives.
