Sword In Anglo Saxon England:

The Sword in Anglo-Saxon England Hilda Roderick Ellis Davidson, 1998 This study concerns the importance of the sword in Anglo Saxon and Viking society with reference to surviving swords and literary sources especially Beowulf **The Sword in Anglo-Saxon England** Paul Mortimer, Matt Bunker, 2019-03 The contributors to this book bring their practical and academic knowledge to an exploration of new ideas and information about the making and use of swords in the early Anglo Saxon period They provide an insight to the symbolism of swords their decoration and place in society Other items carried and worn by warriors are similarly treated In addition to those who have written the essays there are many others who have contributed to the ideas theories and discussions presented in this book Illustrations 180 colour 76 black white **The Sword in Anglo-Saxon England** Hilda Roderick Ellis Davidson, 1962 Weapons and Warfare in Anglo-Saxon England Sonia Chadwick Hawkes, 1989 Thirteen essays on the practice of war in Anglo Saxon times from weapon types to social effects *The Sword in Early Medieval Northern Europe* Sue Brunning, 2019 A wide ranging study of the significance of swords throughout the whole Anglo Saxon period offering valuable insights into the meaning of and attitude towards swords Swords were special in Anglo Saxon England Their names deeds and pedigrees were enshrined in writing Many were curated for generations revealed by their worn and mended condition Few ended their lives as casual discards placed instead in graves hoards and watercourses as part of ritualised acts Contemporary sources leave no doubt that complex social meanings surrounded these weapons transcending their use on the battlefield but they have yet to transcend the traditional view that their primary social function was as status symbols Even now half a century after the first major study of Anglo Saxon swords their wider significance within their world has yet to be fully articulated This book sets out to meet the challenge Eschewing modern value judgements it focuses instead on contemporary perceptions exploring how those who made used and experienced swords really felt about them It takes a multidisciplinary and holistic approach bringing together insights from art archaeology and literature Comparison with Scandinavia adds further nuance revealing what was and was not distinctive of Anglo Saxon views of these weapons Far from elite baubles swords are revealed to have been dynamic living artefacts with their own identities histories and places in social networks ideas fuelled by their adaptability durability and unique role in bloodshed Sue Brunning is Curator of European Early Medieval Collections at The British Museum *Wills and Will-making in Anglo-Saxon England* Linda Tollerton, 2011 A study of the implications and practices of wills and will making in Anglo Saxon society and of the varieties of inheritance strategies and commemorative arrangements adopted A remarkable series of Anglo Saxon wills have survived spanning the period from the beginning of the ninth century to the years immediately following the Norman Conquest Written in Old English they reflect the significance of the vernacular not only in royal administration during this period but in the recording of a range of individual transactions They show wealthy laymen and women and clerics from kings and bishops to those of the only status disposing of land and chattels and

recognising ties of kinship friendship lordship and service through their bequests and whilst land is of prime importance the mention in some wills of such valuable items as tableware furnishings clothing jewellery and weapons provides an insight into lifestyle at the time Despite their importance no study has hitherto been specifically devoted to Anglo Saxon wills in their social and historical context a gap which this book aims to fill While the wills themselves can be vague and allusive by establishing patterns of bequeathing and by drawing on other resources the author sheds light on the factors which influenced men and women in making appropriate provision for their property Linda Tollerton gained her PhD from the University of York

The Sword in the Age of Chivalry Ewart Oakeshott, 1998 The Resplendent image of the medieval knight is concentrated in the symbolism of his sword The straight two edged cross hilted knightly sword of the European middle ages was an object of vital importance a lethal weapon on the battlefield and a badge of chivalry in that complex social code Ewart Oakeshott draws on his extensive research and expert eye and hand for he has a special sense for the feel of a sword to develop a typology for and recount the history of the sword from the knightly successors of the Viking weapon to the emergence of the Renaissance sword that is roughly from 1050 to 1550 Within this time span two distinct groups of swords successively evolved Problems of dating are acute and evidence is adduced from literature and art as well as from archaeology for a sword or some parts of a sword could have been in use several generations after it first saw battle To deal with such overlap Ewart Oakeshott develops refines and illustrates a detailed typology of swords which takes in entire swords pommel forms cross guards and the grip and scabbard

Globalism in the Middle Ages and the Early Modern Age Albrecht Classen, 2023-09-05 Although it is fashionable among modernists to claim that globalism emerged only since ca 1800 the opposite can well be documented through careful comparative and transdisciplinary studies as this volume demonstrates offering a wide range of innovative perspectives on often neglected literary philosophical historical or medical documents Texts images ideas knowledge and objects migrated throughout the world already in the pre modern world even if the

quantitative level compared to the modern world might have been different In fact by means of translations and trade for instance global connections were established and maintained over the centuries Archetypal motifs developed in many literatures indicate how much pre modern people actually shared But we also discover hard core facts of global economic exchange import of exotic medicine and on another level intensive intellectual debates on religious issues Literary evidence serves best to expose the extent to which contacts with people in foreign countries were imaginable often desirable and at times feared of course The pre modern world was much more on the move and reached out to distant lands out of curiosity economic interests and political and military concerns Diplomats crisscrossed the continents and artists poets and craftsmen traveled widely We can identify for instance both the Vikings and the Arabs as global players long before the rise of modern globalism so this volume promises to rewrite many of our traditional notions about pre modern worldviews economic conditions and the literary sharing on a global level as perhaps best expressed by the genre of the fable

Bloodied Banners Robert W. Jones, 2010 Groundbreaking reassessment of the role played by armour weapons and heraldry in medieval warfare showing their cultural as well as military significance A penetrating investigation of medieval martial display The reader is struck by its originality and by its sophisticated and critical interpretative engagement with historical and literary sources Particularly notable is the author's subtle exploration of the function of armour not only its practical role but as a form of display A refreshingly different approach to the world of the medieval combatant and his place within that host of many colours that was a medieval army it adds a new dimension to our understanding of medieval warfare Dr ANDREW AYTON Senior Lecturer in History University of Hull The medieval battlefield was a place of spectacle and splendour The fully armed knight bedecked in his vivid heraldic colours mounted on his great charger riding out beneath his brightly painted banner is a stock image of war and the warrior in the middle ages Yet too often the significance of such display has been ignored or dismissed as the empty preening of a militaristic social elite Drawing on a broad range of source material and using innovative historical approaches this book completely re-evaluates the way that such men and their weapons were viewed showing that martial display was a vital part of the way in which war was waged in the middle ages It maintains that heraldry and livery served not only to advertise a warrior's family and social ties but also announced his presence on the battlefield and right to wage war It also considers the physiological and psychological effect of wearing armour both on the wearer and those facing him in combat arguing that the need for display in battle was deeper than any medieval cultural construct and was based in the fundamental biological drives of threat and warning ROBERT W JONES gained his PhD from Cardiff University
