and great determination **Splendor of the True** ,2013-05-06 Frithjof Schuon 1907 1998 the leading figure in the perennialist school of comparative religious thought remains one of the most provocative voices on religion Bridging the divide between seeker and scholar Schuon challenges the prevailing notion that religion should be studied with agnostic neutrality He speaks to those who are looking for greater interfaith understanding and a deeper penetration to the esoteric heart of specific traditions while turning the tables on an increasingly noisy chorus of skeptics In *Splendor of the True* James S Cutsinger selects essential writings that reflect the full range of Schuon's thought on religion and tradition metaphysics and epistemology human nature and destiny sacred art and symbolism and spirituality and contemplative method In addition to Schuon's essays the book includes a number of poems artworks and previously unpublished materials drawn from his letters personal memoirs and private texts for disciples An introductory chapter provides a careful examination of Schuon as perennial philosopher Sufi shaykh and teacher of gnosis *The Fullness of God* James S. Cutsinger,2004-03-01 For the first time this book collects from Schuon's vast corpus his writings on Christianity including selections from his personal correspondence and other previously unpublished materials *The Odyssey of a New Religion* Phillip Charles Lucas,1995-02-22 solid scholarship It will not only serve as a model for those studying the New Religious Movements of the late twentieth century but will offer help to mainline and other religious institutions who are struggling with problems of identity and change in our complex society today Church History a thoroughly enjoyable book that would fit well into a graduate readings seminar on new religious movements The book deserves a wide reading Nova Religio Lucas's study provides a model of how best to combine the methodologies and analyses of the history of religions and sociology He has provided the groundwork for continued tracking of developments in this new religious movement for comparative purposes Journal of the American Academy of Religion a carefully researched and well written history of one of the important new religious movements to appear in the United States during the 1960s the volume can be heartily recommended to all students of American religion American Historical Review Lucas has written one of the best informed studies of the evolution of a metaphysical cult into mainline eastern orthodoxy The Reader's Review This is an important book for libraries with holdings in American religion Choice a fascinating narrative a rich feast for the investigator of the subculture of esoteric religion American Studies International especially welcome It offers an in depth meticulously documented history of a church the Holy Order of MANS that arose from the Christian esoteric mystery tradition and then metamorphosed into a traditionalist Orthodox Christian sect This unlikely tale has more twists and turns than a whodunit this volume is that rarest of finds an academic book that is a delight to read Gnosis Magazine Traces the journey of a new religious movement from its start as a monastic style New Age order to its transformation into the more conventional Christ the Savior Brotherhood an Eastern Orthodox sect A remarkable story of social and spiritual change in contemporary America **A Traditionalist History of the Great War, Book II** Alexander Wolfheze,2021-01-27 This book analyzes the world of 1914 by combining the

approaches of traditionalist hermeneutics and 20th century geopolitics The juxtaposition of these two frameworks incorporated in the principles of Sacred Geography and Sea Power allows for a Traditionalist perspective on the choices facing the Ten Great Powers on the eve of the Great War The book's multifaceted approach follows the iconoclastic culture critique method of the Traditional School that was developed by René Guénon, Frithjof Schuon and Julius Evola it shows the pre-war world as essentially different from the post-war world Thus the Ten Great Power protagonists of the Great War may be understood on their own terms rather than through a backward projection of politically correct values on the existentially different human life world of 1914 Dislodging the historical materialist progress premise that underpins contemporary academic historiography this book reasserts the highest claim of the Art of History meta narrative meaning

Religion after Religion Steven M. Wasserstrom, 1999-11-15 By the end of World War II religion appeared to be on the decline throughout the United States and Europe Recent world events had cast doubt on the relevance of religious belief and modernizing trends made religious rituals look out of place It was in this atmosphere that the careers of Scholem Eliade and Corbin the twentieth century s legendary scholars in the respective fields of Judaism History of Religions and Islam converged and ultimately revolutionized how people thought about religion Between 1949 and 1978 all three lectured to Carl Jung s famous Eranos circle in Ascona Switzerland where each in his own way came to identify the symbolism of mystical experience as a central element of his monotheistic tradition In this the first book ever to compare the paths taken by these thinkers Steven Wasserstrom explores how they overturned traditional approaches to studying religion by de emphasizing law ritual and social history and by extolling the role of myth and mysticism The most controversial aspect of their theory of religion Wasserstrom argues is that it minimized the binding character of moral law associated with monotheism The author focuses on the lectures delivered by Scholem Eliade and Corbin to the Eranos participants but also shows how these scholars generated broader interest in their ideas through radio talks poetry novels short stories autobiographies and interviews He analyzes their conception of religion from a broadly integrated comparative perspective sets their distinctive thinking into historical and intellectual context and interprets the striking success of their approaches

New Approaches to the Study of Religion: Regional, critical, and historical approaches Peter Antes, Armin W. Geertz, Randi Ruth Warne, 2004 Internationally recognized scholars from many parts of the world provide a critical survey of recent developments and achievements in the global field of religious studies The work follows in the footsteps of two former publications Classical Approaches to the Study of Religion edited by Jacques Waardenburg 1973 and Contemporary Approaches to the Study of Religion edited by Frank Whaling 1984 85 New Approaches to the Study of Religion completes the survey of the comparative study of religion in the twentieth century by focussing on the past two decades Many of the chapters however are also pathbreaking and point the way to future approaches

The Sunset of Tradition and the Origin of the Great War Alexander Wolfheze, 2018-10-01 From a Traditionalist perspective the cultural history of the Modern Era amounts to the genesis of the Dark Age The Traditionalist meta historical narrative deconstructs the modernist myth of historic progress as an anti intellectual superstition It exposes the quintessential features of Modernity namely secular nihilism historical

materialism socio political egalitarianism and collective narcissism as structural inversions of Traditional values The historic accumulation of these inversions set the stage for a final showdown between Tradition and Modernity In terms of ancient prophecy and Traditionalist philosophy the Great War represents the apocalyptic sunset of the world of Tradition This work follows the forgotten path of the philosophia perennis to trace the historic onset of the Dark Age It clears away a century deep deposit of progressive illusions and politically correct axioms The restored road of Traditional thought will lead a new generation of scholars to their rightful inheritance an intellectual tabula rasa on which history can be written anew

Traditional Islamic Ethics: The Concept of Virtue and its Implications for Contemporary Human Rights Irfaan Jaffer, 2021-09-07 Traditional Islamic Ethics The Concept of Virtue and its Implications for Human Rights concentrates on the subject of Islam and modernity and Islam and human rights a topic that has become popular and relevant with the rise of globalization and the interest in Islamic extremism and human rights This book distinguishes itself by operating within the framework of the traditional school of thought or Islamic Traditionalism In doing so it draws on Islam's 1400 year old spiritual and intellectual tradition and its understanding of ethics and virtue along with truth justice freedom and equality This book argues that Islam's pre modern approach is indispensable in creating an organic and integral human rights model for Muslims The first section

argues that the current understanding and implementation of international human rights needs to be more flexible and inclusive if it truly aims to be universal in scope this is because The Universal Declaration and its offshoots are still underpinned by secular liberal principles and therefore are at odds with other cultural traditions To this end this section critically explores popular human rights histories and contemporary ethical theories that attempt to justify human rights The second section of this book provides a general overview on the subject of Islam and Human Rights After explaining some of the main problems this section examines various solutions offered by Muslim academics and scholars focusing on four different types of Muslim responses to modernity and human rights liberal progressive traditional and fundamentalist It concludes that there are spaces of convergence between modern liberal ethics and traditional Islamic virtue ethics while maintaining that there are also fundamental differences and that these differences should be welcomed by human rights theorists and advocates The book s intended audience is primarily post graduate students and professional academics in the fields of Human Rights Ethical Philosophy and Islamic Studies modern Islamic thought Sufism Islamic theology Islamic Philosophy and Traditionalism It will also appeal to anyone interested in the subject of Islam and modernity in general and Islam and human rights in particular
