Symbol and Privilege Ilse Hayden, 1987 The British monarchy on screen Mandy Merck, 2016-02-28 This electronic version has been made available under a Creative Commons BY NC ND open access license Moving images of the British monarchy are almost as old as the moving image itself dating back to an 1895 American drama *The Execution of Mary Queen of Scots* And from 1896 actual British monarchs appeared in the new animated photography led by Queen Victoria Half a century later the 1953 coronation of Elizabeth II was a milestone in the adoption of television watched by 20 million Britons and 100 million North Americans At the century's end Princess Diana's funeral was viewed by 2.5 billion worldwide In the first book length examination of film and television representations of this enduring institution distinguished scholars of media and political history analyze the screen representations of royalty from Henry VIII to William and Kate Seventeen essays by Ian Christie Elisabeth Bronfen Andrew Higson Karen Lury Glynn Davies Jane Landman and other international commentators examine the portrayal of royalty in the actuality picture the early extended feature amateur cinema the movie melodrama the Commonwealth documentary *New Queer Cinema* TV current affairs the big screen ceremonial and the post historical boxed set A long overdue contribution to film and television studies this book will be essential reading for scholars and students of British media and political history **Image, History, and Politics** Paul D. Van Wie, 1999 *Image History and Politics* The Coinage of Modern Europe examines money as a medium of communication laden with artistic and political meaning by studying the last two hundred years of European coinage This book explores the political economic and aesthetic messages carried by coinage therefore providing a special realm in which to view and constantly reevaluate major political and economic developments from the French Revolution through the Cold War with occasional comparative references to earlier time periods The study generally focuses on the pre 1914 Great Powers of Europe France Germany Britain Russia the Hapsburg Monarchy and Italy along with a brief comparative examination of the coinage of Spain Switzerland and Belgium The author demonstrates how every political system consciously or unconsciously constructs a set of symbols as an expression of itself with its coinage enabling historians and social scientists to synthesize political economic and artistic meaning in a historical context **Kingship and State** Christopher Wrigley, 2002-05-16 The precolonial kingdom of Buganda nucleus of the present Uganda state has long attracted scholarly interest Since written records are lacking entirely until 1862 historians have had to rely on oral traditions that were recorded from the end of the nineteenth century These sources provide rich materials on Buganda in the late eighteenth and nineteenth centuries but in this 1996 book Christopher Wrigley endeavours to show that the stories which appear to relate to earlier periods are largely mythology He argues that this does not reduce their value since they are of interest in their own mythical right revealing ancient traces of sacred kingship and also throwing oblique light on the development of the recent state He has written an elegant and wide ranging study of one of Africa's most famous kingdoms *Savage Money* C.A. Gregory, 2005-08-02 This volume is not simply another

general theory of world system It is a theoretically and ethnographically informed collection of essays which opens up new questions through an examination of concrete cases covering global and local questions of political economy

Home and Homeland Linda L. Layne, 2019-01-15 In this provocative examination of collective identity in Jordan Linda Layne challenges long held Western assumptions that Arabs belong to easily recognizable corporate social groups Who is a true Jordanian Who is a true Bedouin These questions according to Layne are examples of a kind of pigeonholing that has distorted the reality of Jordanian national politics In developing an alternate approach she shows that the fluid social identities of Jordan emerge from an ongoing dialogue among tribespeople members of the intelligentsia Hashemite rulers and Western social scientists Many commentators on social identity in the Middle East limit their studies to the village level but Layne's goal is to discover how the identity building processes of the locality and of the nation condition each other She finds that the tribes create their own cultural homes through a dialogue with official nationalist rhetoric and Jordanian urbanites while King Hussein in turn maintains the idea of the homeland in many ways that are powerfully influenced by the tribespeople The identities so formed resemble the shifting irregular shapes of postmodernist landscapes but Hussein and the Jordanian people are also beginning to use a classically modernist linear narrative to describe themselves Layne maintains however that even with this change Jordanian identities will remain resistant to all or nothing descriptions Linda L Layne is Alma and H Erwin Hale Teaching Professor of Humanities and Social Sciences in the Department of Science and Technology Studies at Rensselaer Polytechnic Institute Originally published in 1994 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
