Re-writing Pasts, Imagining Futures Gomia, Victor N.,Ndi, Gilbert Shang,2018-02-20 The papers in this volume focus on fiction and theatre in their traditional forms as well as in their encounters with novel and innovative forms and avenues of dissemination As a cultural practice that emerged from a process of protest and contestation of hegemony it is understandable that one main concern in African literature and literary criticism is the resistance against the emergence of marginalizing centers in formerly or currently marginalized societies with regard to discourses aesthetics and media of creation These new centers that sometimes undermine the strategic tactical exploitation of the relative advantage procured by each medium run the risk of leading to new forms of stratification that mitigate the import of African and African diasporic literatures The collection of essays therefore seeks to analyze the representation of pertinent socio political and historical questions in a variety of postcolonial texts from Africa and the African diasporas notably the Caribbean islands and the United States of America However far from re writing of history in a way that cedes to conservative worldviews creative writers and critics simultaneously attempt to chart ways forward for socially all inclusive futures In the context of colonial and neo colonial legacies that seem to forestall any sense of individual and collective self fulfillment contributors to this volume examine the pertinence of African fiction and theatre in imagining new vistas of re conceptualizing the postcolonial condition in ways that re galvanize the belief in an enabling future

**Sign-Communication System for Special Populations, Volume 1.** John D. Bonvillian, Nicole Kissane Lee, Tracy T.

Dooley, Filip T. Loncke, 2020-07-30 Simplified Signs presents a system of manual sign communication intended for special populations who have had limited success mastering spoken or full sign languages It is the culmination of over twenty years of research and development by the authors The Simplified Sign System has been developed and tested for ease of sign comprehension memorization and formation by limiting the complexity of the motor skills required to form each sign and by ensuring that each sign visually resembles the meaning it conveys Volume 1 outlines the research underpinning and informing the project and places the Simplified Sign System in a wider context of sign usage historically and by different populations Volume 2 presents the lexicon of signs totalling approximately 1000 signs each with a clear illustration and a written description of how the sign is formed as well as a memory aid that connects the sign visually to the meaning that it conveys While the Simplified Sign System originally was developed to meet the needs of persons with intellectual disabilities cerebral palsy autism or aphasia it may also assist the communication needs of a wider audience such as healthcare professionals aid workers military personnel travellers or parents and children who have not yet mastered spoken language The system also has been shown to enhance learning for individuals studying a foreign language Lucid and comprehensive this work constitutes a valuable resource that will enhance the communicative interactions of many different people and will be of great interest to researchers and educators alike

**Objects, Abstraction, Data Structures and Design** Elliot B.

Koffman, Paul A. T. Wolfgang, 2005-10-20 Koffman and Wolfgang introduce data structures in the context of C programming They embed the design and implementation of data structures into the practice of sound software design principles that are introduced early and reinforced by 20 case studies Data structures are introduced in the C STL format whenever possible Each new data structure is introduced by describing its interface in the STL Next one or two simpler applications are discussed then the data structure is implemented following the interface previously introduced Finally additional advanced applications are covered in the case studies and the cases use the STL In the implementation of each data structure the authors encourage students to perform a thorough analysis of the design approach and expected performance before actually undertaking detailed design and implementation Students gain an understanding of why different data structures are needed the applications they are suited for and the advantages and disadvantages of their possible implementations Case studies follow a five step process problem specification analysis design implementation and testing that has been adapted to object oriented programming Students are encouraged to think critically about the five step process and use it in their problem solutions Several problems have extensive discussions of testing and include methods that automate the testing process Some cases are revisited in later chapters and new solutions are provided that use different data structures The text assumes a first course in programming and is designed for Data Structures or the second course in programming especially those courses that include coverage of OO design and algorithms A C primer is provided for students who have taken a course in

another programming language or for those who need a review in C Finally more advanced coverage of C is found in an appendix Course Hierarchy Course is the second course in the CS curriculum Required of CS majors Course names include Data Structures and Data Structures Algorithms

**Signs In Law - A Source Book** Jan M. Broekman, Larry Catá Backer, 2014-11-06 This volume provides a critical roadmap through the major historical sources of legal semiotics as we know them today The history of legal semiotics now at least a century old has never been written a non event itself pregnant with semiotic possibility As a consequence its sources are seldom clearly exposed and as word object and meaning change are sometimes lost They reach from an English translation of the 1916 inaugural lecture of the first Chair in Legal Significs at the Amsterdam University via mid 20th century studies on property or contract to equally fascinating essays on contemporary semiotic problems produced by former students of the Roberta Kevelson Semiotics Roundtable Seminar at Penn State University 2012 and 2013 Together the materials in this book weave the fabric of semiotics and significs two names for the unfolding of semiotics in law and legal discourse at least until the second half of the 20th century and both of which covered a lawyer's focus on sign and meaning in law The latter is embedded within the cultural imperatives of the civilization that gave these terms meaning and made them an effective tool for the dissection of law its reconstitution as an instrument to be used by the lawyer to advance the interests of her clients and for judges as a means to restructure language as a narrative of law whose power could bend behavior to its strictures Legal semiotics has become an indispensable part of the elite lawyer's toolkit and a fundamental approach to analysis of legal texts Two previous volumes published in 2011 and 2012 explored the conceptual methodological and epistemological progress in the field of legal semiotics the modern forms of semiotics study and the mechanics of meaning making processes by lawyers Yet the great lessons of semiotics requires a focus on the origins of the concepts and frameworks that would become contemporary legal semiotics its origins as an object of the consciousness of meaning making one whose roots as lessons for the oracular

conversations of law are expanded in this volume      Auditory Physiology and Perception Y. Cazals,K. Horner,L. Demany,2013-10-22 Auditory Physiology and Perception documents the proceedings of the 9th International Symposium on Hearing held in Careens France 9 14 June 1991 The aim of the symposium was to promote exchanges between hearing scientists working with different approaches from cell biology to psychology The volume is organized into 10 parts Part I contains papers on the biology of inner ear cells Part II presents studies on auditory periphery functioning Part III examines frequency selectivity while Part IV contains papers that deal with the subject of pitch The papers in Part V examine the coding of intensity Parts VI and VII discuss temporal analyses and spectral shape analysis respectively Part VIII takes up spectro temporal processing Part IX covers binaural interactions and sound localization The studies in Part X focus on pathologies such as the relations between evoked otoacoustic emissions and pure tone audiometry and the effect of short duration acoustic trauma on activity of single neurons in the ventral cochlear nucleus The final chapter of the text is a tribute to Professor Zwicker a leading scientist in hearing who passed away some months before the symposium      **Structure and Functional Properties of Colloidal Systems** Roque Hidalgo-Alvarez,2009-11-18 Integrating fundamental research with the technical applications of this rapidly evolving field Structure and Functional Properties of Colloidal Systems clearly presents the connections between structure and functional aspects in colloid and interface science It explores the physical fundamentals of colloid science new developments of synthesis
