

Democracy and terrorism

TED PICCONE*

POLICY BRIEF

SEPTEMBER 2017

Summary

The empirical evidence for several decades demonstrated a strong relationship between democracy and terrorism, with hybrid regimes experiencing higher levels of terrorist attacks and casualties, and more established democracies and autocracies both experiencing less.¹ While this pattern continues to prevail, after 2001 it has evolved toward an increased number of terrorist attacks in nondemocratic countries, particularly those in conflict or under military occupation (e.g., Iraq, Afghanistan, Pakistan, Nigeria, and Somalia), and in a handful of consolidated democratic countries actively engaged in suppressing terrorism through the use of force (e.g., Israel, the United States, Spain, France, and the United Kingdom). Regardless of regime type, countries with higher levels of state-sponsored violence and abuse against their citizens were found to have greatly increased risks associated with violent extremism.²

These findings suggest that a country's best defense against terrorism is to improve the legitimacy of the state through more democratic, human rights, and rule of law practices at the local, national, and international levels. Drivers of terrorist violence, nonetheless, derive from multiple and complex sources, many of which are local. Responses must be tailored to specific circumstances and should be comprehensive, involving all relevant actors at the community level.

About the Project

The project seeks to foster greater collaboration among democratic governments, donors, civil society and academics to improve security outcomes and create a more conducive environment for the strengthening of democracy around the world.
